3) Establish Target Application Rates

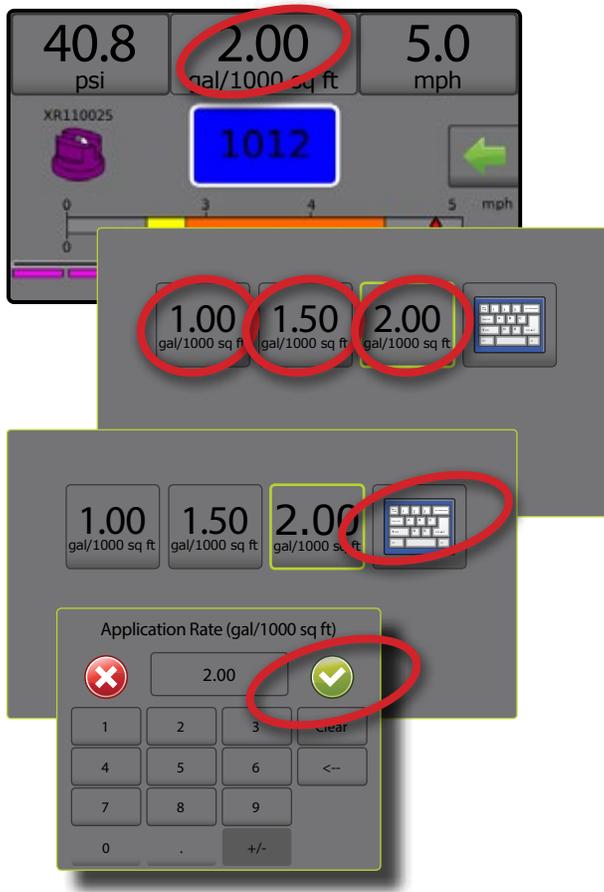

The selected target rate can be changed either on the Operation screen or in Settings->Job Parameters.

Application Rate displays or give access to:

- ▶ Application Rate – while application is active, displays the actual application rate
- ▶ Target Application Rate – while application is inactive, displays the target rate of product to apply.
 - ◀ Automatic regulation mode – Target Application Rate symbol will be active 
 - Use the Boost/Step Percent Increase/Decrease buttons   to adjust the Target Application Rate
 - ◀ Manual Regulation Mode – manual regulation symbol will remain active 
- ▶ Preset Target Application Rates Options Menu – defines the target rate of product to apply for the selected number. These settings will be the same for all active jobs. Range is 0 to 700.6 gallons/acre / 6,554 litres/hectare / 16.08 gallons/1,000 square feet.

1. Press the Application Rate selectable section.
2. Select the Target Application rate to be changed.
3. Press KEYBOARD button .
4. Type the desired rate then press the ACCEPT icon .

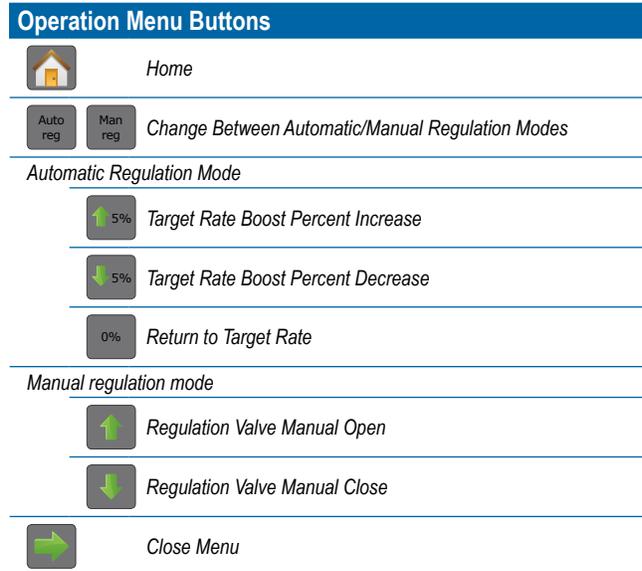

Figure 4: Set three different Target Application Rates

4) Chose Between Regulation Modes

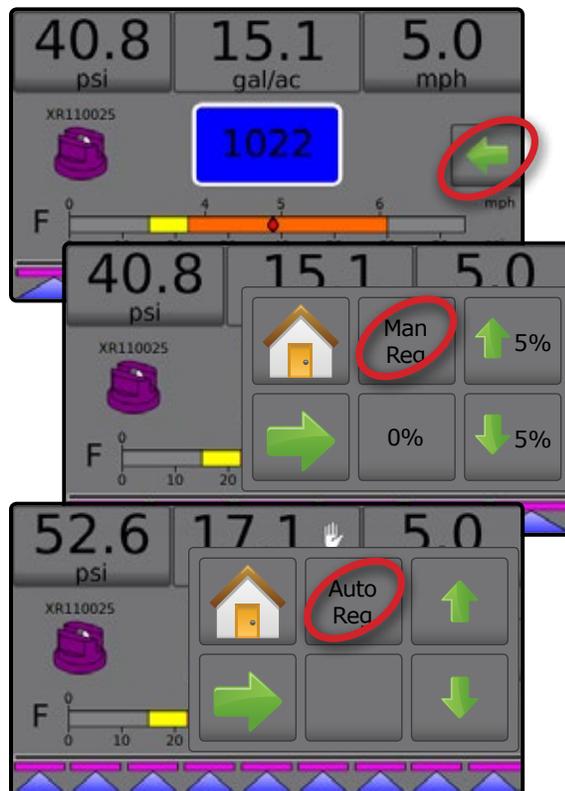

Automatic Regulation Mode will automatically adjust the application rate based on the current speed in reference to the target rate.

Manual Regulation Mode will retain an established regulation valve setting regardless of speed.

NOTE: The Regulation button displays the regulation mode that may be selected not the active regulation mode.
