Thank you for purchasing a **SMITHCO** product.

Read this manual and all other manuals pertaining to the Sweep Star V62 carefully as they have safety, operating, assembly and maintenance instructions. Failure to do so could result in personal injury or equipment damage.

Keep manuals in a safe place after operator and maintenance personnel have read them. Right and left sides are from the operator's seat, facing forward.

All **SMITHCO** machines have a Serial Number and Model Number. Both numbers are needed when ordering parts. The serial number plate on the Sweep Star V62 is located on the left front frame. Refer to engine manual for placement of engine serial number.

Information needed when ordering replacement parts:

- 1. Model Number of machine
- 2. Serial Number of machine
- 3. Name and Part Number of part
- 4. Quantity of parts

SAFE PRACTICES

- 1. It is your responsibility to read this manual and all publications associated with this machine (engine, accessories and attachments).
- Never allow anyone to operate or service the machine or its attachments without proper training and instructions. Never allow minors to operate any equipment.
- 3. Learn the proper use of the machine, the location and purpose of all the controls and gauges before you operate the equipment. Working with unfamiliar equipment can lead to accidents.
- 4. Wear all the necessary protective clothing and personal safety devises to protect your head, eyes, ears, hands and feet. Operate the machine only in daylight or in good artificial light.
- 5. Inspect the area where the equipment will be used. Beware of overhead obstructions and underground obstacles. Stay alert for hidden hazards.
- 6. Never operate equipment that is not in perfect working order or without decals, guards, shields, or other protective devices in place.
- 7. Never disconnect or bypass any switch.
- 8. Carbon monoxide in the exhaust fumes can be fatal when inhaled, never operate a machine without proper ventilation.
- 9. Fuel is highly flammable, handle with care.
- 10. Keep engine clean. Allow the engine to cool before storing and always remove the ignition key.
- 11. Never use your hands to search for oil leaks. Hydraulic fluid under pressure can penetrate the skin and cause serious injury.
- 12. This machine demands your attention. To prevent loss of control or tipping of the vehicle:
 - A. Use extra caution in backing up the vehicle. Ensure area is clear.
 - B. Do not stop or start suddenly on any slope.
 - C. Reduce speed on slopes and in sharp turns. Use caution when changing directions on slopes.
 - D. Stay alert for holes in the terrain and other hidden hazards.
 - E. Run up and down slopes, never across the face.
- 13. Before leaving operator's position for any reason:
 - A Disengage all drives.
 - B. Lower all attachments to the ground.
 - C. Shut engine off and remove the ignition key.
- 14. Keep hands, feet and clothing away from moving parts. Wait for all movement to stop before you clean, adjust or service the machine.
- 15. The rubber fingers, sweeper and vacuum pick up and propel debris and small objects in its path during operation. Keep the area of operation clear of all bystanders.
- 16. Never carry passengers.
- 17. Stop engine before making repairs/adjustments or checking/adding oil to the crankcase.
- 18. Use parts and materials supplied by SMITHCO only. Do not modify any function or part.
- 19. Do not remove the radiator cap when the engine is hot. When cooled, loosen cap slightly to the stop to relieve any pressure before removing the cap completely.
- Avoid sharp turns. Watch the tires of the tractor while turning to make sure they do not contact the tongue of the Sweep Star V62.
- 21. Shut down power source before attempting to unclog any part of the machine.
- 22. If reel deck begins to vibrate abnormally, immediately shut off power and determine the cause.
- 23. Do not tow on public roads.

These machines are intended for professional maintenance on golf courses, sports turf, and any other area maintained turf and related trails, paths and lots. No guaranty as to the suitability for any task is expressed or implied.

SPECIFICATIONS FOR SWEEP STAR V62

WEIGHTS AND DIMENSIONS

 Length
 151" (384 cm)

 Width
 68" (172 cm)

 Height
 87" (221 cm)

 Weight
 1500 lb (680 kg)

SOUND LEVEL

At ear level 98 dB At 3 ft (0.914 m) 104 dB At 30 ft (9.14 m) 86 dB

ENGINE

Make Kawasaki
Model# FD661D
Horsepower 22 Hp (16 kW)
Fuel Unleaded 87 Octane
Gasoline Minimum

Cooling System Liquid Cooled Lubrication System Full Pressure Alternator 20 Amp

TIRES & WHEELS Two 24 x 13.00 x 12 NHS (18 psi (1.3 bar))

Castor: 9 x 3.5 x 4 (20 psi (1.4 bar))

BATTERY (optional) Automotive type 45- 12 volt

BCI Group Size 45
Cold Cranking Amps 480 minimum
Ground Terminal Polarity Negative (-)
Maximum Length 9" (23 cm)
Maximum Width 5.38" (14 cm)
Maximum Height 9" (23 cm)

FLUID CAPACITY

Crankcase Oil See Engine Manual
Fuel 5 gallon (19 liters)
Hydraulic Fluid 2.88 gallon (10.9 liters)
Cooling 2.8 quarts (2.7 liters)

Grade of Hydraulic Fluid SAE 10W-40 API Service SJ or higher Motor Oil

OPTIONAL EQUIPMENT

78-201 Replacement Brush Reel 78-207 Hydraulic Lift System

78-202 Replacement Finger Reel 78-208 Filter System 78-203 Hard Surface Sweeper 78-209 Ball Hitch

78-204 5th Wheel Hitch 78-210 Nylon Brush Head 78-205 Remote Vacuum Hose 78-211 Rubber Finger Head

78-206 Clevis Hitch 22-073 Battery

78-215 Electric Braker

MAINTENANCE

Before servicing or making adjustments to machine, stop engine and remove key from ignition.

Use all procedures and parts prescribed by the manufacturer's. Read the engine manual before operation.

LUBRICATION

Use No. 2 General Purpose Lithium Base Grease and lubricate every 100 hours. The Sweep Star V62 has seventeen grease fittings. All bearings are sealed bearings. When inserting grease, be careful not to ruin the seal, if this happens, replace the bearing at once.

Be sure to wipe grease fitting clean before injecting grease. Give only one or two pumps of grease at each lubrication.

REF# LOCATION 1 One on all four castor wheels. 2 One on right and left hopper door arms. 3 One on each mounted bearing for reel shaft. 4 One on right and left deck lift arm. 5 one on all four castor wheel mount brackets. 6 One on the jack stand. 7 Two on machine control panel that go to the blower shaft mounted bearing.

HYDRAULIC OIL

- 1. Use SAE 10W-40 API Service SJ or higher motor oil.
- 2. For proper warranty, change oil every 500 hours or annually, which ever is first and change the filter after the first 20 hours, then at 100 hours, then every 250 hours thereafter.
- 3. The oil level should be 2" to 21/2" from top of the tank when fluid is cold. Do not overfill.
- 4. After changing oil and/or filter, run the machine for a few minutes. Check oil level and for leaks.
- 5. Always use caution when filling hydraulic oil tank or checking level to keep system free of contaminants. Check and service more frequently when operating in extremely cold, hot or dusty conditions.
- 6. If natural color of fluid is now black or smells burnt, it is possible that an overheating problem exists.
- 7. If fluid becomes milky, water contamination may be a problem.
- 8. If either of the above conditions happen, change oil and filter immediately after fluid is cool and find cause. Take fluid level readings when system is cold.
- 9. In extreme temperatures you can use straight weight oil. We recommend SAE 30W API Service SJ or higher when hot (above 90°F (33°C)) and SAE 10W API Service SJ or higher when cold (below 32°F (0°C)) ambient temperature. Use either motor oil or hydraulic oil, but do not mix.
- 10. Oil being added to the system must be the same as what is already in the tank. Mark tank fill area as to which type you put in.

TIRF PRESSURE

Caution must be used when inflating a low tire to recommended pressure. Over inflating can cause tires to explode. Tires on the machine should be 18 psi (1.3 bar), castor wheels should be 20 psi (1.4 bar). Improper inflation will reduce tire life considerably.

ENGINE OIL KAWASAKI

Change and add oil according to chart below. Do not overfill. Use a high quality detergent oil. For Kawasaki engine API Service Classification: SJ or higher. Use no special additives with recommended oils. Do not mix oil with gasoline.

SAE VISCOSITY GRADES

Starting Temperature Range Anticipated Before Next Oil Change

Use of multi-viscosity oils (10W-30, etc) will result in increased oil consumption. Check oil level more frequently if using these types of oils.

WHEEL MOUNTING PROCEDURE

MACHINE WHEELS

- 1. Turn machine off and remove key.
- 2. Be sure unit is on a level surface. Unhitch from tow vehicle if possible.
- 3. Block the opposite wheel then the one you are working on.
- 4. Loosen nuts slightly on wheel to be removed.
- 5. Jack up machine being careful not to damage underside of machine.
- 6. Remove nuts, remove wheel.
- 7. Place new wheel on hub lining up bolt holes.
- 8. Torque nuts to 64-74 ft/lb (87-100 Nm) using a cross pattern. Torque again after first 10 hours and every 200 hours thereafter.
- 9. Lower machine to ground and remove blocks and jack.

FILTER SYSTEM

Filter pack may be cleaned by shaking or spraying off with low pressure water. Filter will disintegrate if high pressure is used on it.

MAINTENANCE (CONTINUED)

BATTFRY

Batteries normally produce explosive gases which can cause personal injury. Do not allow flames, sparks or any ignited object to come near the battery. When charging or working near battery, always shield your eyes and always provide proper ventilation.

Battery cable should be disconnected before using "Fast Charge".

Charge battery at 15 amps for 10 minutes or 7 amps for 30 minutes. Do not exceed the recommended charging rate. If electrolyte starts boiling over, decrease charging.

Always remove grounded (-) battery clamp first and replace it last. Avoid hazards by:

- 1. Filling batteries in well-ventilated areas.
- 2. Wear eye protection and rubber gloves.
- 3. Avoid breathing fumes when electrolyte is added.
- 4. Avoid spilling or dripping electrolyte.

Battery Electrolyte is an acidic solution and should be handled with care. If electrolyte is splashed on any part of your body, flush all contact areas immediately with liberal amounts of water. Get medical attention immediately.

JUMP STARTING

Use of booster battery and jumper cables. Particular care should be used when connecting a booster battery. Use proper polarity in order to prevent sparks.

To jump start (negative grounded battery):

- 1. Shield eyes.
- 2. Connect ends of one cable to positive (+) terminals of each battery, first (A) then (B).
- 3. Connect one end of other cable to negative (-) terminal of "good" battery (C).
- Connect other end of cable (D) to engine block on unit being started (NOT to negative (-) terminal of battery)

To prevent damage to other electrical components on unit being started, make certain that engine is at idle speed before disconnecting jumper cables.

OVERLOADING DEBRIS HOPPER AND WEAR ON VACUUM HOUSING

OVERLOAING DEBRIS HOPPER

Smithco Sweeper-Vacs are designed to carry the following maximum loads:

Model 72-000 Big Vac 1500 lbs. (608 kg) Model 78-200 & 78-500 Sweep Star V62 860 lbs. (400 kg)

PLEASE NOTE THE FOLLOWING:

- 1. Loads heavier than that will damage the unit.
- 2. Such damage is not covered by warranty.
- 3. Overloading is particularly easy when collecting aerifier cores.
- 4. The hoppers on the Big Vac and V62 are large in order to hold 7 and 4 cubic yards respectively, of thatch, grass clippings, leaves and trash.
- 5. They will not hold 7 or 4 cubic yards of aerifier cores.
- 6. The maximum depth (in the debris hopper) of aerifier cores is:

Model 72-000 Big Vac 12 in. (30 cm)
Model 78-200 & 78-500 Sweep Star V62 40 in. (101 cm)

VACUUM HOUSING WEAR

The Big Vac & V62 are fitted with a wear resistant liner in the vacuum housing. This will provide additional husing life. Be sure the following points are explained to the user:

- The vacuum housing and impeller must be cleaned each time the unit is used so the housing liner is inspected daily. Only Smithco Sweeper-Vacs provide a clean out/inspection port for easy inspection and cleaning.
- 2. When bare steel is visible at any point in the housing lining, the lining must be replaced. It is expected the liner will wear and be replaced. It is a vast improvement over competitive units with no liners.
- 3. Replacement of the liner or the vacuum housing due ti wear is normal and is not covered by warranty.
- 4. Collection of aerifier cores causes extreme wear on the liner (and if unchecked, on the housing).
- 5. Caution users that, while Smithco Sweeper-Vacs do an excellent job collecting cores, the lining (and the housing) will wear quickly in such use.

RUBBERIZED BOOT

The rubberized boot between main unit and sweeper head is subject to wear and damage from debris. Unless defective, replacement of this boot is not covered by warranty.

MAXIMUM LOAD CAPACITY

There are decals on each side of the hopper to indicate the maximum depth of aeration cores. The maximum depth for aeration cores in the hopper is 40" (101 cm). The maximum depth of sand and dirt in hopper is 20" (50cm). The maximum load capacity of the Sweep Star V-62 is 860 lbs (400 kg).

Overloading will cause damage that is not covered by the warranty.

SERVICE CHART

Before servicing or making adjustments to the machine, stop engine, set park break, block wheels and remove key from ignition.

Follow all procedures and ONLY use parts prescribed by the manufacturer. Read the engine manual before maintenance.

	O Daily	As Required	100 Hours	200 Hours	250 Hours	300 Hours	400 Hours	Every 500 Hours/Yearly

C=Check or Clean at specified intervals

R=Replace at specified intervals

- * Tire pressure: Machine Tires 18 psi (1.3 bar) Castor Wheels 20 psi (1.4 bar)
- † Replace hydraulic filter after the first 20, 100, and every 250 there after.
- § Torque tire nuts after the first 10 hours and every 200 hours there after (64 to 74 ft/lb (87-100 Nm))
- # Kawasaki change oil after first 8 hours.
- £ Change oil every 25 hours when operating under heavy load or in high ambient temperatures.
- ‡ Clean more often under dusty conditions or when airborne debris is present , replace air cleaner parts, if very dirty.

The suggested maintenance checklist is not offered as a replacement for the manufacturer's engine manual but as a supplement. You must adhere to the guidelines established by the manufacturer for warranty coverage. In adverse conditions such as dirt, mud or extreme temperatures, maintenance should be more frequent.

ADJUSTMENTS

ADJUSTMENT OF BELT TENSIONER

There are two belt tensioners on the Sweep Star V62. One controls the tension on the belt from the engine to blower shaft the other controls the belt on the finger or brush reel. The proper tension of the idler should be 12 to 15 as per the gauge (A) on the side of the tightener. Over tightening the belt will shorten the life of the belt and the machine may not perform to the best of its ability. To adjust belt tensioner, loosen bolt holding tensioner. Bring idler pulley tight to belts and turn tensioner into belts to 15°. Tighten holder bolt.

CASTOR WHEELS

Install castor wheels onto the brush/finger head assembly. You may put the machine bushings and spacers (A) on in any combination to get desired height. You should leave one machine bushing on the very bottom and one on the very top next to the lockpin. Check the tire pressure on Castor Wheels they should be 20 psi (1.4 bar).

STORAGE

When storing, remove the key from the key switch to avoid unauthorized persons from operating machine.

- 1. Before storing clean machine thoroughly.
- 2. Check bolts and nuts, tighten as necessary.
- 3. Make all repairs that are needed and remove any debris.
- 4. Remove the battery, adjust the electrolyte level and recharge it. Store the battery in a dry, dark place.
- 5. Store in a clean and dry area, but NOT near a stove, furnace or water heater which uses a pilot light or any device that can create a spark.
- 6. Engines stored over 30 days need to be protected or drained of fuel to prevent gum from forming in a fuel system or on essential carburetor parts. Check the engine manual and follow the instructions for the storage of the engine.

	HWL-716	Lockwasher 7/16	8
11	78-408	LH Brake Assembly	1
	78-410	Wire Harness	1

INSTALLATION INSTRUCTIONS

- 1. Block rear of machine up. Remove the rear tires and rear hubs. All parts except hubs to be reused.
- 2. There is a right and left brake (Ref 9 & 11). Place the brake on the axle and bolt to axle using the $^{7}/_{16}$ 20 nuts and lockwashers (Ref 10).
- 3. Then place the hub and drum assembly (Ref 3) over the brake. Be sure to install the grease seal (Ref 2) and the bearing cup and cone (Ref 5) as shown in the drawing.
- 4. Put tires back on and hold in place with the ½-20 lug nuts (Ref 8). Put slotted jam nut (Ref 6), cotter pin (Ref 4) and dust cap (Ref 7) on axle end.
- 5. Check all nuts and be sure they are tight.
- 6. Take the wire harness and hook the female space connectors to the male spade connectors on the brake assemblies. Run wire harness up side of main frame to front of machine. Hold wire harness in place with the tie straps.
- 7. Dealer must provide the connector that hooks to the tow unit. Place one side of connector onto wire harness, connect the other half to the tow unit.
- 8. Check all connections and hardware. Test brakes before putting machine into service.

This unit is not intended for highway use.

9	78-350	Handle Holder	1
	8803-17	Trim	1
10	78-354	Hose Handle	1
11	15-019	Round Grip	2

INSTALLATION INSTRUCTIONS

You will need two people and the tailgate open with an empty hopper. One person will have to be inside hopper. Be sure engine is off. You will need an $^{11}/_{32}$ and $^{9}/_{32}$ drill.

- 1. Remove the two bolts (Ref 3) from the chute. Bolt the hose rack (Ref 2) in place using the two bolts you removed from the chute. Using an $^{11}/_{32}$ drill, drill through the hopper using the hose rack as a guide. Use the $^{5}/_{16}$ -18 x $^{3}/_{4}$ bolt and lock nut (Ref 1). The nut should be on the inside of the hopper. The person in the hopper can get out now.
- 2. Center the handle holder (Ref 9) between the bends on the brush guard (Ref B) with the handle holder flush on the inside of the brush guard. Mark the two holes and drill through the brush guard with a $\frac{9}{32}$ drill. Use the two $\frac{1}{4}$ 20 x 1 $\frac{1}{2}$ bolts and lock nuts (Ref 8) to bolt handle holder to the brush guard. Cut and put trim into the two notches that hold the hose handle.
- 3. Connect the hose to the hose handle (Ref 10) with the hose on the same side as the long handle. Then put other end of hose to remote hose connector (Ref 4). Use the two hose clamps (Ref 6) to hold hose in place.
- 4. Remove cover plate from in front of the vacuum housing and place in pocket on chute. Place the remote hose connector into the pocket that the cover plate came out of. The cover plate and the remote hose connector must be switched depending which operation you are doing.
- 5. For storage, loop the vacuum hose over the hose rack (Ref 2) and place the hose handle (Ref 10) into the handle holder (Ref 9).
- 6. When you are going to operate the vacuum, pull handle stop (Ref 5) towards the front of machine and lift up handle (Ref A). While holding handle (Ref A) up, push handle stop (Ref 5) back so that it holds the handle (Ref A) up.
- 7. You may want to remove the hose handle, hose and remote hose connector if you are not going to use the vacuum for an extended amount of time.

78-204 5™ WHEEL HITCH DRAWING

78-204 5[™] WHEEL HITCH PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	HB-516-18-100	Bolt ⁵ / ₁₆ - 18 x 1	2
•	HNTL-516-18	Lock Nut ⁵ / ₁₆ - 18	2

6	HB-516-18-150	Bolt $\frac{5}{16}$ - 18 x $\frac{1^{1}}{2}$	1
	HNTL-516-18	Lock Nut ⁵ / ₁₆ - 18	1
7	HB-12-13-125	Bolt ¹ / ₂ - 13 x 1 ¹ / ₄	4
	HNTL-12-13	Lock Nut ¹ / ₂ - 13	4
8	78-391	Gooseneck	1
9	HNW-38-16	Wing Nut 3/8 - 16	1
	HW-38	Washer ³ / ₈	1
10	HNTL-38-16	Lock Nut 3/8 - 16	1
11	78-390	Ball Lock Arm	1

INSTALLATION INSTRUCTIONS

Use two people to install hitches.

- 1. Block both wheels so machine does not roll.
- 2. Use the jack that is part of the sweeper to raise or lower sweeper to comfortable working height.
- 3. Slide the gooseneck (Ref 8) over the tabs on the front of the sweeper frame. Hitch must be on the outside. Use the four $^{1}/_{2}$ 13 x $^{1}/_{4}$ bolts (Ref 7) on the outside and four lock nuts on the inside. Tighten all four bolts.
- 4. Install the control panel mount (Ref 3) on the front of the gooseneck (Ref 8) as shown, using two ³/₈ 16 x 2¹/₄ bolts (Ref 2). On the bottom bolt use lock nut (Ref 9) and just tighten snug. On the top bolt use the ³/₈ washer and wing nut (Ref 10). Tighten both after adjusting for the proper position.
- 5. The control panel has all hose, wiring and throttle cable connected to it and the sweeper. The control panel is wrapped and fastened to the front of the sweeper.
- 6. Remove the control panel from the sweeper, bring it forward with the hoses to the rear and the throttle on the left hand side.
- 7. Fasten the control panel to the control panel mount with the four truss head machine screws $^{1}/_{4}$ 20 x $^{3}/_{4}$ (Ref 4) and four flange whiz lock nuts $^{1}/_{4}$ 20.
- 8. Put the two handles onto the valve and tighten the lock nuts with the handles pointing forward.
- 9. Lay the hoses, wiring and throttle cable on top of the gooseneck and place the hose hold-down (Ref 5) over the top. At the rear most hole on top of the gooseneck fasten the hose hold-down with ⁵/₁₆ -18 x 1¹/₂ bolt and lock nut (Ref 6).

Do not tow on public roads.

	HNCL-58-11	Center Lock Nut 5/8 - 11 (part of 78-244)	2

INSTALLATION INSTRUCTIONS

Use two people to install hitches.

- 1. Block both wheels so machine does not roll.
- 2. Use the jack that is part of the sweeper to raise or lower sweeper to comfortable working height.
- 3. Slide the tongue (Ref 3) over the tabs on the front of the sweeper frame. Hitch must be on the outside. Use the four ½ 13 x 1¼ bolts (Ref 10) on the outside and four lock nuts on the inside. Tighten all four bolts.
- 4. Install adjustment slide (Ref 5) to tongue (Ref 3) using the four flange bolts $^{1}/_{4}$ 20 x $^{3}/_{4}$ and four flange whiz lock nuts $^{1}/_{4}$ 20 (Ref 4).
- 5. Loosen adjustment locks (Ref 6) on control panel adjustment (Ref 7) and put control panel adjustment onto the adjustment slide.
- 6. Tighten one adjustment lock (Ref 6).
- 7. Slide the control panel mount (Ref 8) through the control panel adjustment (Ref 7) and tighten the other adjustment lock (Ref 6).
- 8. The control panel has all the hoses, wiring and throttle cable connected to it and to the sweeper. The control panel is wrapped and fastened to the front of the sweeper.
- 9. Remove the control panel from the sweeper, bring it forward with the hoses to the rear and the throttle on the left hand side.
- 10. Fasten the control panel to the control panel mount with the four truss head machine screws $^{1}/_{4}$ 20 x $^{3}/_{4}$ and four flange whiz lock nuts $^{1}/_{4}$ 20 (Ref 9).
- 11. Put the two handles onto the valve and tighten the lock nuts with the handles pointing forward.
- 12. Place three hoses and the throttle cable on the left hand side of the adjustment slide.

DECAL LIST

This is a list of decals on the Sweep Star V62. Part numbers, description, and location will help in reordering decals.

16-088	Decal, Moving Parts/Hot	Top Reel Belt Guard & Left Side Frame
17-128	Decal, Radiator Coolant	Radiator Shield
25-004	Decal, Serial#	Left Front Main Frame
25-277	Decal, Battery Warning	Above Battery
25-286	Decal, Pinch Point	2 Ea. Side Tailgate
25-307	Decal, Refueling w/ Gasoline	Above Gas Tank
25-344	Decal, 3" Star	Right Side Belt Guard
25-355	Decal, Tire Pressure (18 psi)	Rear Wheels
25-356	Decal, Tire Pressure (20 psi)	Castor Forks
25-359	Decal, Smithco (3.25 x 17.312)	Front Chute & Rear Tailgate
25-361	Decal, Technical Assistace	Main Frmae
25-362	Decal, Danger Fire	Hopper Front
25-363	Decal, Max. Depth	Hopper Sides
27-093	Decal, Hydraulic Oil	Front Oil Tank Bracket
76-305	Decal, Rotating Parts	2 Blower Housing, Front Panel, Cover Plate
78-217	Decal, Operator Control Panel	Operator Control Panel
78-369	Decal, Sweep Star V62	2 Hopper Sides
78-307	Decal, Machine Control Panel	Machine Control Panel
78-407	Decal, Max. Load	Hopper Front

Permanent Type Antifreeze for Aluminum Engine and

Radiator Green. 50% Solution of Ethylene Glyco.

LIMITED WARRANTY

SMITHCO warrants this product to be free from defects in material and workmanship under normal use for one year from the date of purchase by the original user. (60 days if product is used for rental purposes.) All warranty claims must be handled through a SMITHCO authorized dealer or by SMITHCO, INC. All transportation charges must be paid by the purchaser.

There is no further express warranty. All implied warranties, including those of merchantability and fitness for a particular purpose, are limited to one year, (60 days if product is used for rental purposes) from the date of purchase by the original user, and to the extent permitted by law any and all implied warranties are excluded and disclaimed after the expiration of such period.

All incidental and consequential damages, including pickup and delivery of the unit, communication, mileage charges and/or rental of a replacement unit during repair, are not covered under this warranty, nor is any loss of income and/or other loss resulting from the failure of the product to function due to a warranty defect.

The following items are not covered under the SMITHCO warranty, and are warranted by their respective manufacturer.

- (a) Engine and engine parts, including starters, generators, alternators and filters.
- (b) Transaxle, differentials, gear boxes and mechanical pumps.
- (c) Hydrostatic transmissions, hydraulic pumps and motors.
- (d) Batteries.
- (e) Wheels and tires.

A copy of the warranty for the above items is furnished if necessary with each SMITHCO product.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitations of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights, which may vary from state to state.

Federal law now requires disclosure of the warranty which applies to this product prior to the sale to a customer. Please leave this statement attached to the product and allow the buyer to remove it after purchase.
