Thank you for purchasing a **Smithco** product.

Read this manual and all other manuals pertaining to the Bunker Rake carefully as they contain safety, operating, assembly and maintenance instructions. Failure to do so could result in personal injury or equipment damage.

Keep manuals in a safe place after operator and maintenance personnel have read them. Right and left sides are from the operator's seat, facing forward.

### **WARNING**

#### CALIFORNIA

Proposition 65 Warning
Engine exhaust and some of its constituents
are known to the State of California to
cause cancer, birth defects, and other
reproductive harm.

All **Smithco** machines have a Serial Number and Model Number. Both numbers are needed when ordering parts. Serial number tag is located on left rear ROPs mount post. Refer to engine manual for placement of engine serial number.

For product and accessory information, help finding a dealer, or to register your procuct please contact us at www.Smithco.com.

Information needed when ordering replacement parts:

- 1. Model Number of machine
- 2. Serial Number of machine
- 3. Name and Part Number of part
- 4. Quantity of parts

For easy access record your Serial and Model numbers here.

### **SAFE PRACTICES**

- 1. It is your responsibility to read this manual and all publications associated with this machine (engine, accessories and attachments).
- 2. Never allow anyone to operate or service the machine or its attachments without proper training and instructions. Never allow minors to operate any equipment.
- 3. Learn the proper use of the machine, the location and purpose of all the controls and gauges before you operate the equipment. Working with unfamiliar equipment can lead to accidents.
- 4. Wear all the necessary protective clothing and personal safety devises to protect your head, eyes, ears, hands and feet. Operate the machine only in daylight or in good artificial light.
- 5. Inspect the area where the equipment will be used. Beware of overhead obstructions and underground obstacles. Stay alert for hidden hazards.
- 6. Never operate equipment that is not in perfect working order or without decals, guards, shields, or other protective devices in place.
- 7. Never disconnect or bypass any switch.
- 8. Carbon monoxide in the exhaust fumes can be fatal when inhaled, never operate a machine without proper ventilation.
- 9. Fuel is highly flammable, handle with care.
- 10. Keep engine clean. Allow the engine to cool before storing and always remove the ignition key.
- 11. After engine has started, machine must not move. If movement is evident, the neutral mechanism is not adjusted correctly. Shut engine off and readjust so the machine does not move when in neutral position.
- 13. Never use your hands to search for oil leaks. Hydraulic fluid under pressure can penetrate the skin and cause serious injury.
- 14. This machine demands your attention. To prevent loss of control or tipping of the vehicle:
  - A. Use extra caution in backing up the vehicle. Ensure area is clear.
  - B. Do not stop or start suddenly on any slope.
  - C. Reduce speed on slopes and in sharp turns. Use caution when changing directions on slopes.
  - D. Stay alert for holes in the terrain and other hidden hazards.
- 15. Before leaving operator's position for any reason:
  - A. Disengage all drives.
  - B. Lower all attachments to the ground.
  - C. Shut engine off and remove the ignition key.
- 16. Keep hands, feet and clothing away from moving parts. Wait for all movement to stop before you clean, adjust or service the machine.
- 17. Keep the area of operation clear of all bystanders.
- 18. Never carry passengers.
- 19. Stop engine before making repairs/adjustments or checking/adding oil to the crankcase.
- 20. Use parts and materials supplied by **Smithco** only. Do not modify any function or part.

These machines are intended for professional maintenance on golf courses, sports turf, and any other area maintained turf and related trails, paths and lots. No guaranty as to the suitability for any task is expressed or implied.

Optional: 23-10.50 x 12 Turf Tires 5 psi (.34 bar)Smithco # 48-265

**SPEED** 

Forward Speed 0 to 10 m.p.h. (0-16 kph)
Reverse Speed 0 to 5 m.p.h. (0-8 kph)

BATTERY Automotive Type SP 35

BCI Group Size 35
Cold Cranking Amps 375
Ground Terminal Polarity Maximum Length 7.5" (19 cm)
Maximum Width 5" (12,7 cm)
Maximum Height 7.5" (19 cm)

**FLUID CAPACITY** 

Crankcase Oil See Engine Manual Fuel 20 quarts (18.93 liters) Hydraulic Fluid 20 quarts (18.93 liters)

Grade of Hydraulic Fluid SAE 10W-40 API Service SJ or higher Motor Oil

### **MAINTENANCE**

Before servicing or making adjustments to machine, stop engine and remove key from ignition.

NOTE:

Use all procedures and parts prescribed by the manufacturer's. Read the engine manual.

#### LUBRICATION

Use No. 2 General purpose Lithium Base Grease and lubricate every 100 hours. The Sand Star has four grease fittings. One located on the steering cylinder (45-003), two on the rake lift, on the rod end of the center lift cylinder and one is located on the steering chain tensioner (45-001 and 45-002).

#### REMOTE AIR CLEANER

- 1. Un-clip the two clips, remove the cover and pull out the element.
- 2. To service, clean by tapping gently on flat surface. Do not oil. Replace if very dirty or damaged.
- 3. Clean out the inside of the body and cover.
- 4. Place the element into the body and put the cover back on.

#### **TOWING**

When it is necessary to move the Super Star without engine running, bypass valve built into hydrostatic pump must be "open" by turning it counterclockwise. The valve is located on the right side of the pump. An "open" valve allows fluid to pass through the wheels freely. When normal, driven, operation is desired, valve should be "closed by turning it clockwise. Failure to "close" the valve with engine running means no power to wheels. The machine can be moved for a short distance with the engine off, but we **do not** recommend this as a standard procedure. When towing **do not** tow the machine faster than 2-3 MPH (3-5 km/h) because the drive system may be damaged. The tires may lock up if the machine is towed too fast. If this occurs, stop towing the machine. If the machine must be moved a considerable distance, transport it on a truck or trailer.

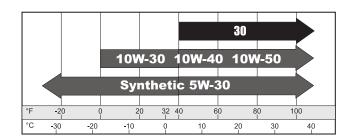

#### TIRF PRFSSURF

Caution must be used when inflating a low tire to recommended pressure. Over inflating can cause tires to explode. Tires should be 5 psi (0.34 bar). Improper inflation will reduce tire life considerably.

#### **ENGINE**

Change and add oil according to chart below. Do not overfill. Use a high quality detergent oil classified "For Service SJ or higher" SAE 30 oil. Use no special additives with recommended oils. Do not mix oil with gasoline.

#### SAE VISCOSITY GRADES

A quick twist and pull motion to open, push to close. Allows a quick and easy way to change oil without the mess

Engine Oil Drain Valve

#### Starting Temperature Range Anticipated Before Next Oil Change

Use of multi-viscosity oils (10W-30, etc.) above 40° F (4° C) will result in nign oil consumption and possible engine damage. Check oil level more frequently if using these types of oils.

SAE 30 oil, if used below 40° F (4° C), will result in hard starting and possible engine bore damage due to inadequate lubrication.

#### HYDRAULIC OIL

- 1. Use SAE 10W-40 API Service SJ or higher motor oil.
- 2. For proper warranty, change oil every 500 hours or annually, which ever is first and change filter after the first 50 hours, then every 250 hours thereafter.
- 3. The oil level should be 2" to 21/2" from top of tank when fluid is cold. Do not overfill.
- 4. After changing oil and/or filter, run the machine for a few minutes. Check oil level and for leaks.
- 5. Always use caution when filling hydraulic oil tank or checking level to keep system free of contaminants. Check and service more frequently when operating in extremely cold, hot or dusty conditions.
- 6. If natural color of fluid is black or smells burnt, it is possible that an overheating problem exists.
- 7. If fluid becomes milky, water contamination may be a problem.
- 8. If either of the above conditions happen, change oil and filter immediately after fluid is cool and find cause. Take fluid level readings when system is cold.
- 9. In extreme temperatures you can use straight weight oil. We recommend SAE 30W API Service SJ or higher when hot (above 90°F (33°C)) and SAE 10W API Service SJ or higher when cold (below 32°F (0°C) ambient temperature. Use either motor oil or hydraulic oil, but do not mix.
- 10. Oil being added to the system must be the same as what is already in the tank. Mark tank fill area as to which type you put in.

### **MAINTENANCE**

#### WHEEL MOUNTING PROCEDURE

- 1. Turn machine off and remove key.
- 2. Block one of the other wheels.
- 3. Loosen nuts slightly on wheel to be removed.
- Jack up machine being careful not to damage underside of machine.
- Remove nuts. Remove wheel.
- Place new wheel on hub lining up bolt holes.
- 6. Torque nuts to 64-74 ft/lb (87-100 Nm) using a cross pattern. Re-torque after first 8 hours and every 250 hours thereafter.
- 7. Lower machine to ground and remove blocks and jack.

#### **BATTERY**

Batteries normally produce explosive gases which can cause personal injury. Do not allow flames, sparks or any ignited object to come near the battery. When charging or working near battery, always shield your eyes and always provide proper ventilation.

Battery cable should be disconnected before using "Fast Charge".

Charge battery at 15 amps for 10 minutes or 7 amps for 30 minutes. Do not exceed the recommended charging rate. If electrolyte starts boiling over, decrease charging.

Always remove grounded (-) battery clamp first and replace it last. Avoid hazards by:

- 1. Filling batteries in well-ventilated areas.
- 2. Wear eye protection and rubber gloves.
- 3. Avoid breathing fumes when electrolyte is added.
- 4. Avoid spilling or dripping electrolyte.

Battery Electrolyte is an acidic solution and should be handled with care. If electrolyte is splashed on any part of your body, flush all contact areas immediately with liberal amounts **WARNING** of water. Get medical attention immediately.

#### JUMP STARTING

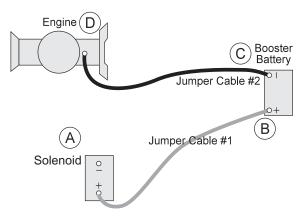

Use of booster battery and jumper cables. Particular care should be used when connecting a booster battery. Use proper polarity in order to prevent sparks.

To jump start (negative grounded battery):

- 1. Shield eyes.
- 2. Connect ends of one cable to positive (+) terminals of bottom post on solenoid first (A), then positve post of booster battery. (B).
- 3. Connect one end of other cable to negative (-) terminal of booster battery (C).
- 4. Connect other end of cable (D) to engine block on unit being started.

To prevent damage to other electrical components on unit being started, make certain that engine is at idle speed before disconnecting jumper cables.

Before servicing or making adjustments to the machine, stop engine, set park break, block wheels and remove key from ignition.

NOTE:

Follow all procedures and ONLY use parts prescribed by the manufacturer. Read the engine manual before maintenance.

The suggested maintenance checklist is not offered as a replacement for the manufacturer's engine manual but as a supplement. You must adhere to the guidelines established by the manufacturer for warranty coverage. In adverse conditions such as dirt, mud or extreme temperatures, maintenance should be more frequent.

Maintenance Service Interval	Maintenance Procedure
After the first 8 operating hours	Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm))
After the first o operating hours	Change the engine oil filter.
	Check the engine oil level.
	Clean area around muffler and controls.
Before each use daily	Check the hydraulic fluid level.
Delete each ace daily	Check the tire pressure.
	Check condition of hydraulic hoses and fittings.
	Inspect and clean the machine.
After the first 50 hours	Change Hydraulic Oil Filter.
	Clean or change air filter.1
	Clean pre-cleaner.1
	Change engine oil and filter.
	Replace spark plug .
Every 100 hours	Lubricate machine.
	Clean or change remote air cleaner.
	Check the battery fluid level and cable connections
	Check muffler and spark arrestor.
	Check belt tension.
	Check engine valve clearance and adjust if necessary.
	Check idle speed.
Every 250 hours	Clean battery terminals.
	Change hydrauilic oil filter.
	Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm))
	Change fuel filter.
	Change hydrauilic oil and filter.
Every 500 hours or yearly	Clean oil cooler fins.1
	Clean air cooling system.1
	Check safety filter in remote air cleaner.
In dusty conditions or when airborn	e debris is present, clean more often.

REVERSE

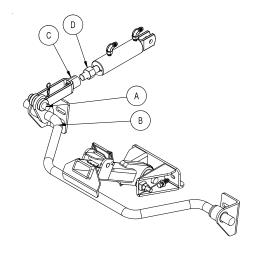

#### RAKE LIFT CYLINDER

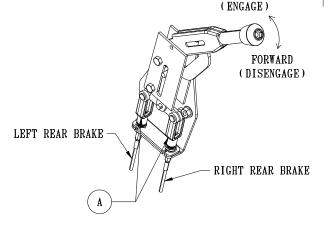

Completely lower Rake Lift. Remove the clevis pin (A). Twist lift linkage (C) so clevis pin end of cylinder extension lines up with holes in attachment lift arm (B). Replace clevis and cotter pins. Tighten Jam Nut (D). Raise and lower Rake Lift to check for proper clearance.

Tigten until there is sufficient tension between lift arm and quick hitch and will not move in full up position.

When the rear rake attachment is lowered while the machine is in forward motion, the forward speed of the machine will slow drastically. Operator should be prepared for a rapid change in speed

#### PARK BRAKE

The park brake is located on the left hand side of the machine and operates both rear wheels. Pull lever back to engage and push forward to disengage.

To adjust, turn the knob on the end of the handle.

#### **DRUM BRAKE ADJUSTMENT**

The brake can be adjusted through the access hole in the backing plate. Remove the rubber plug from the backing plate. Using a drum brake adjusting tool, or a suitable flat blade screw driver, rotate the adjusting star towards the axle shaft to expand the shoes,one click at a time. Expand the shoes until slight contact is made with the drum. It is highly recommended that you adjust 1 click at a time with the maximum adjustment being 2 clicks. Rotate the drum back and forth to insure the brake is not rubbing excessively, if so back off the adjuster star. Slight rubbing is acceptable as the brake is used it will seat in. Test after each adjustment.

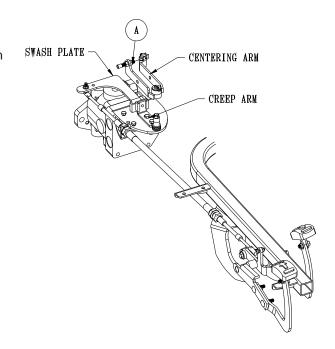

#### WHEEL 'CREEP' ADJUSTMENT

'Creep' is when engine is running and hydrostatic transmission is in neutral, but due to inadequate alignment, wheels still move. Do the following procedures to stop this motion.

- 1. Lift up and support machine so all wheels are off the ground and can turn freely.
- 2. On the top of the pump there is a Creep Arm. Loosen bolts.
- 3. With engine running adjust the creep arm side to side in slot so centering arm centers on the swash plate.
- 4. Tighten all fasteners and test by using foot pedal linkage to see that the "creep" is removed.
- 5. Turn engine off and lower machine.

#### TO ADJUST FOOT PEDAL THROTTLE CABLE

- 1. Jack up unit so that all drive wheel are off the ground. (Use jack stands)
- 2. Start the engine, make certain that the hand throttle is in the idle position (1200 engine RPM).
- Engine speed must increase as soon as the foot pedal begins to move in either direction. At the full forward position, the engine RPM must be 3600 RPM ± 100.
- 4. Minor adjustment can be made by backing out (unscrewing) Retainer (Ref A) until you reach full engine RPM with the foot pedal fully depressed in the forward position. Be sure to recheck after the nuts are fully tightened.

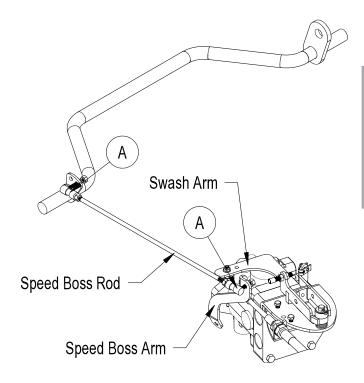

- 5. Major adjustment needs to be made by pulling the slack out of the cable. Loosen the screw in the wire block on the engine that is clamped onto the end of the cable and sliding it up to the cable block that is through the throttle plate. Do not let the throttle plate move to increase idle speed. Tighten the screw.
- 6. Test run to determine that there is no binding and that engine idle speed is 1200 RPM and that it is 3600 RPM at full forward position of the foot pedal.

#### SPEED BOSS

Speed Boss allows the machine to operate at a proper speed while raking sand traps on golf courses. This speed boss has been factory set at an average speed of 3-4 m.p.h. (5-6.5 kph). The Speed Boss will only limit the speed while the rake is lowered into the operating position. The speed setting may be adjusted by turning the Ball Joint (A) counterclockwise to make the machine operate slower or turn clockwise to go faster. Tighten jam nut. Check to make sure nothing is binding and test drive to check desired speed.

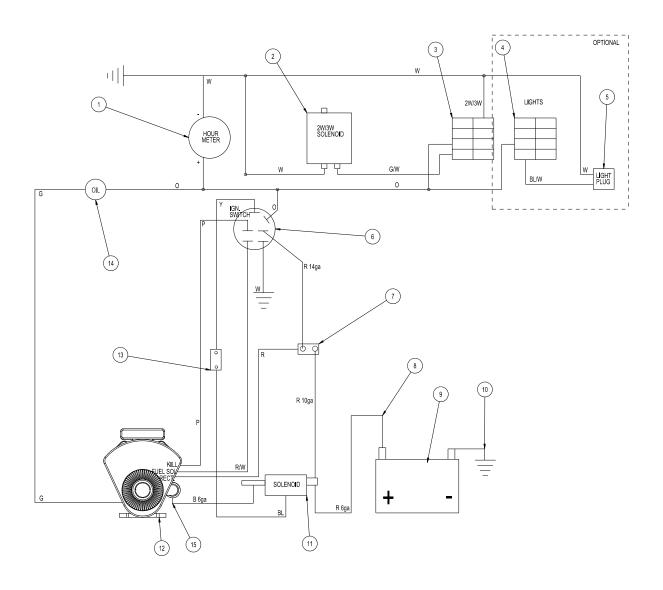

For RBS System, Spiker and Grader Box remove the speed boss arm and the speed boss rod from machine so it does not interfere with other operations.

### **STORAGE**

When storing, remove the key from the key switch to avoid unauthorized persons from operating machine.

- 1. Before storing clean machine thoroughly.
- 2. Check bolts and nuts, tighten as necessary.
- 3. Make all repairs that are needed and remove any debris.
- 4. Remove the battery, adjust the electrolyte level and recharge it. Store the battery in a dry, dark place.
- 5. Store in a clean and dry area, but NOT near a stove, furnace or water heater which uses a pilot light or any device that can create a spark.
- 6. Engines stored over 30 days need to be protected or drained of fuel to prevent gum from forming in a fuel system or on essential carburetor parts. Check the engine manual and follow the instructions for the storage of the engine.

#### 45-004 ROPS

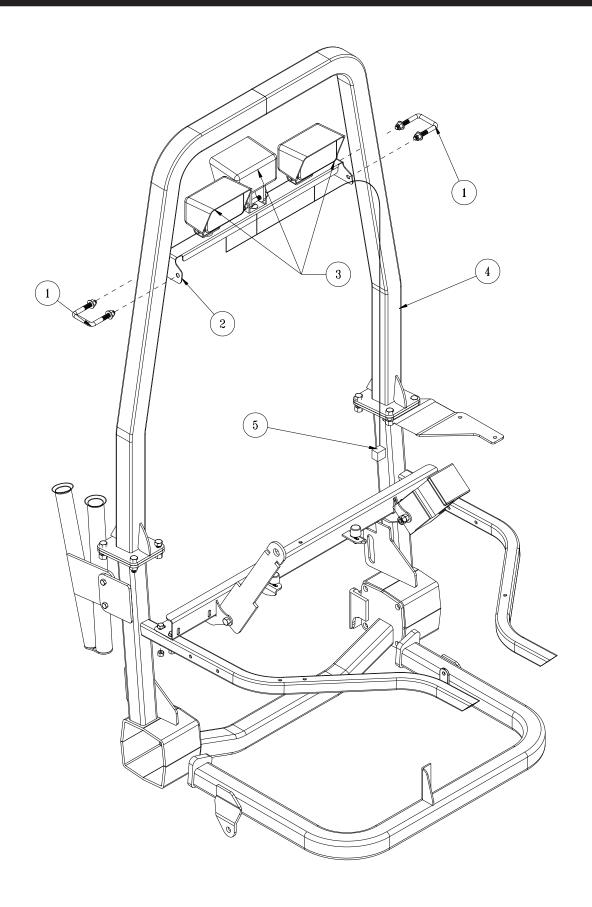

REF#	PART#	DESCRIPTION	QUANTITY
1	HB-716-14-100	Bolt <sup>7</sup> / <sub>16</sub> - 14 x 1	2
2	HNTL-716-14	Lock Nut <sup>7</sup> / <sub>16</sub> - 14	8
3	HB-716-14-125	Bolt $^{7}/_{16}$ - $14^{\circ}$ x $1^{1}/_{4}$	6
4	45-082	Seat Belt Brace	1
5	76-198-03	Seat Belt	1
6	45-060	Roll Bar	1
7	HB-716-14-150	Bolt $\frac{7}{16}$ - 14 x 1 $\frac{1}{2}$	2

#### *INSTALLATION INSTRUCTIONS*

The Following instructions apply to all Sand Star Machines.

- 1. Line up the mount plate on the roll bar to the square mounting plate by the seat. Mount vertically, not leaning back toward the rear of the machine.
- 2. Place four 1-1/4" bolts in the right mount plate holes and tighten. Place two 1-1/4" bolts on left rear and two 1-1/2" bolts on left front. Bolts are longer in the left front to accommodate remote air cleaner option.
- 3. If your machine has a remote air cleaner you will have to remove the 2 bolts holding the air filter mount. Place the roll bar on top of the air filter mount. Replace bolts and tighten down.
- 4. Mount seat belts onto seat belt brace using 1" bolts. The strap goes on the right side and the lock goes on the left side.
- 5. Tighten all hardware.

ROPs are certified to meet ISO 21299 and restraints meet OSHA 1928.51

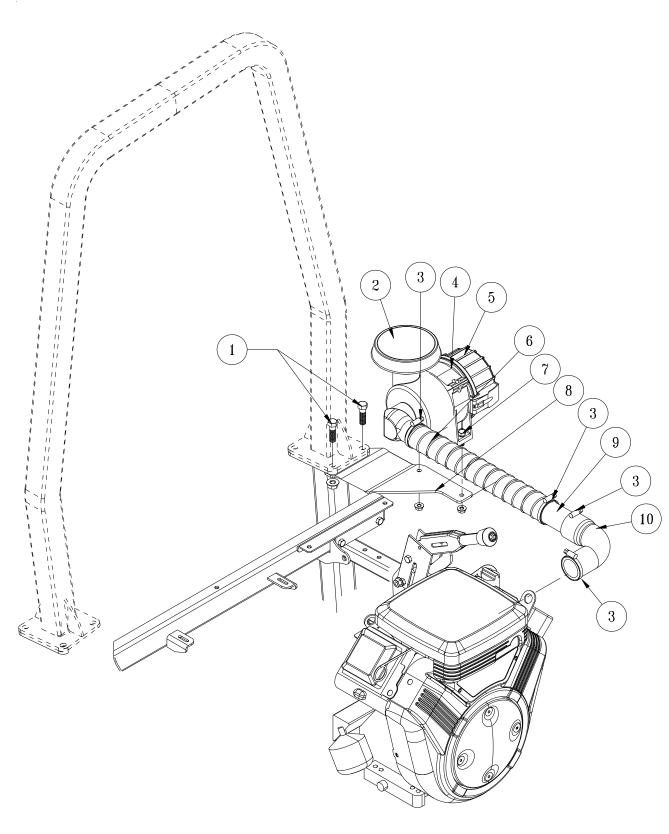

#### 45-016 LIGHT KIT PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	17-537	Square U-bolt	2
2	45-081	Light Bar	1
3	34-201	Light	3
4	45-004	Roll Bar Kit	1
5	43-505	Light Wire Harness	1

#### *INSTALLATION INSTRUCTIONS*

45-004-K ROPs Kit is required for Light Kit on all Sand Star Machines.

- 1. Mount lights to light bar. Outside two facing forwards and center light facing to the rear.
- 2. Using the square u-bolts, mount light bar assembly to the roll bar.
- 3. Tighten u-bolts down and make sure light bar and lights are secure.
- 4. Tighten all hardware.
- 5. Center toggle switch is wired for lights via the main machine wire harness. The plug for the light wire harness is zip tied to the left rear post (Ref 5). Hook light wire harness from lights to the plug on the left rear post.
- 6. Use the tie straps provided to secure the light wire harness to the roll bar and the light bar.
- 7. Test lights.

REF#	PART#	DESCRIPTION	QUANTITY
1	HB-716-14-150	Bolt <sup>7</sup> / <sub>16</sub> - 14 1 <sup>1</sup> / <sub>2</sub>	2
	HNTL-716-14	Lock Nut <sup>7</sup> / <sub>16</sub> - 14	2
2	42-834-02	Hood	1
3	18-116	Hose Clamp	4
4	42-834-01	Band	1
5	42-834	Air Cleaner	1
6	8959-26	Flex Hose x 26"	1
7	HB-516-18-100	Bolt <sup>5</sup> / <sub>16</sub> - 18 x 1	2
	HNFL-516-18	Flange Lock Nut <sup>5</sup> / <sub>16</sub> - 18	2
8	45-058	Air Filter Mount	1
9	42-776	Air Cleaner Hose Sleeve	1
10	27-113	Rubber Elbow	1

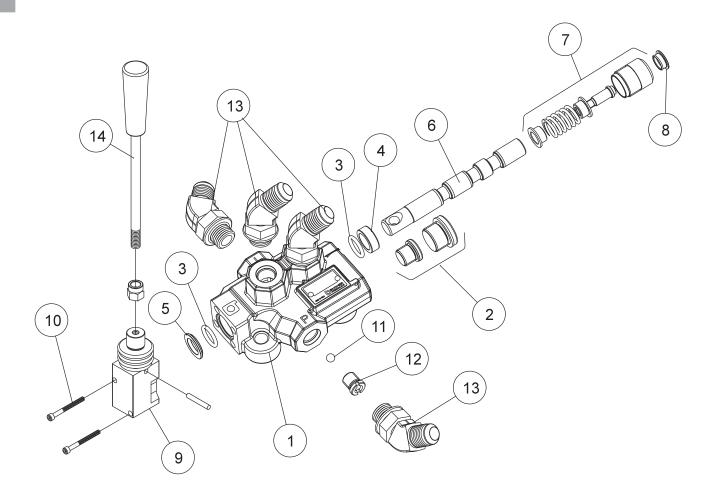

#### *INSTALLATION INSTRUCTIONS*

- 1. Assemble air cleaner, band and hood. (Ref 2, 4 and 5)
- 2. Install air cleaner assembly on air filter mount (Ref 8).
- 3. Install air cleaner and mount onto left main frame post using  $^{7}/_{16}$  bolts and lock nuts (Ref 1). If roll bar is installed, remove bolts from left side and slide air filter mount (Ref 8) between roll bar and main frame post. Use  $^{7}/_{16}$  14  $^{11}/_{2}$  in the front and roll bar bolts you removed in the back.
- 4. Make sure all bots are tightened.
- 5. Place rubber elbow (Ref 10) on engine and use hose clamp (Ref 3) to hold in place.
- 6. Attache hose sleeve (Ref 9) to rubber elbow with another hose clamp (Ref 3).
- 7. Install flex hose (Ref 6) from air cleaner (Ref 5) to hose sleeve (Ref 9) using two hose clamps (Ref 3).
- 8. Tighten all hose clamps.

## 45-005 HYDRAULIC SAND PLOW DRAWING

## HYDRAULIC VALVE PLUMBING DRAWING

#### 45-005 HYDRAULIC SAND PLOW INSTRUCTIONS

#### ENGINE MUST BE COOL BEFORE DISCONNECTING THE HOSES.

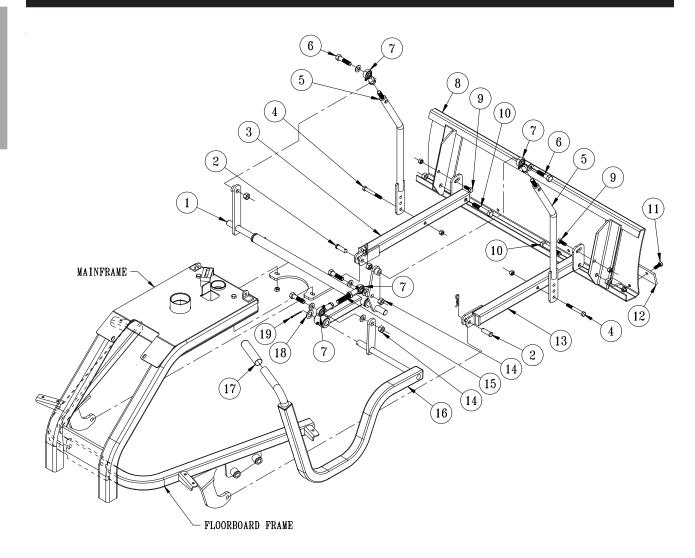

- 1. Assemble pusher bars (Ref# 14 and 17) to plow blade (Ref# 6) using one <sup>3</sup>/<sub>8</sub>-16 x 1<sup>1</sup>/<sub>4</sub> bolt (Ref# 10) and one <sup>3</sup>/<sub>8</sub>-16 x 3 bolt (Ref#11) per pusher bar. There are 2 holes to bolt (Ref# 10) hardware in. Using hole closest to the blade will result in a shallow cut, whereas using the hole furthest from the blade will result in a deeper cut. The slot on the pusher bar is for a more fine tuned adjustment.
- 2. Assemble the plow cross tube (Ref# 15) to the front pusher bars (Ref# 14 and 17) using  $\frac{3}{8}$  16 x  $2^{1}/_{2}$  bolts and lock nuts (Ref# 12).
- 3. Assemble the ram mount (Ref# 1) to the main frame using the two studs that are welded to the frame and below the front of the console. Install rod end (Ref# 7) onto cylinder with 5/8 jam nut.
- 4. Using a 5/8 x 13/4 clevis pin (Ref# 16) and 1/8" bridge pin (Ref#3) mount the hydraulic cylinder (Ref# 4) to the plow crossbar (Ref# 15). Connect the other end of the hydraulic cylinder to the ram mount (Ref# 1) using 5/8 x 1½ Clevis Pin (Ref# 2) and 1/8" bridge pin (Ref#3).
- 5. Slide the plow/pusher bar assembly under machine and connect to machine. Secure using  $\frac{1}{2}$  x  $\frac{1}{2}$  clevis pins (Ref# 13) and  $\frac{1}{8}$  bridge pins (Ref# 3).
- 6. Thread four, 45° elbow fittings (Ref# 18) into the single bank valve (Ref# 22), one each in the **A** port, **B** port, **IN** port and **OUT** port. Reference <u>Single</u> Bank Hydraulic Valve Drawing for a detailed view of the valve.
- 7. Thread two, <sup>3</sup>/<sub>8</sub> straight thread elbow fittings (Ref# 5) into the ports on the hydraulic cylinder (Ref# 4). Make sure the fittings on the hydraulic cylinder are pointing towards the machine.
- 8. Next connect the 43" hose (Ref# 24) to the fitting in the **B** port and connect the 51.5" hose (Ref# 23) to the fitting in the **A** port.
- Using the valve mount as a template, Measure in approximately 4.25 inches from edge of right fender and mark. Line valve mount up with contour of the fender and the right side of the line you just marked. Trace holes onto fiberglass. Drill holes out.
- 10. Mount the single bank hydraulic Valve (Ref# 22) to the valve mount (Ref# 19) as illustrated, using the two ¼ 20 x 2 bolts (Ref# 20). Secure with the two ¼ 20 flange whiz-lock nuts. Connect the straight handle (Ref# 21) to the valve. Reference <u>Single Bank Hydraulic Valve Drawing</u> for a detailed view of the valve.

- 11. Route the 43" hose (Ref# 24) from the **B** port on the single bank hydraulic valve to the top port on the hydraulic cylinder. Route the 51.5" hose (Ref# 23) from the **A** port on the single bank hydraulic valve to the bottom port on the cylinder.
- 12. Disconnect the negative (-) ground battery cable from the battery. Place a drain pan under the valve on the machine. **ENGINE MUST BE COOL BEFORE DISCONNECTING THE HOSES.**
- 13. Disconnect hose (Ref# 26) from the **IN** port on the two-bank hydraulic valve (Ref#25). Connect this hose (Ref# 26) to the "**P**" port of the single bank valve (Ref# 22). Connect the 26" hose (Ref# 27) from the "**T**" port on the single bank valve (Ref# 22) to the **IN** port of the two-Bank valve (Ref# 25). Fasten to the frame using the 14½" nylon ties.
- 14. Reconnect the negative (-) ground battery cable to battery.
- 15. Make sure that everything is clear of the machine. Start the machine, work the valve so that the plow will both raise and lower. Also, do this with both the attachment lift and the rake lift. Work the lift a number of times until all air works out of the plow circuit and the cylinder works smoothly. At this time look for hydraulic leaks. If there are leaks, turn engine off and repair, start up and check again.
- 16. Check the hydraulic oil level. The level should be 2" to 2½" below the top of the tank. If more is needed, use SAE 10W-40 API service SG motor oil.

## 45-009 ALUMINUM SAND PLOW DRAWING

#### 45-009 ALUMINUM SAND PLOW PARTS LIST

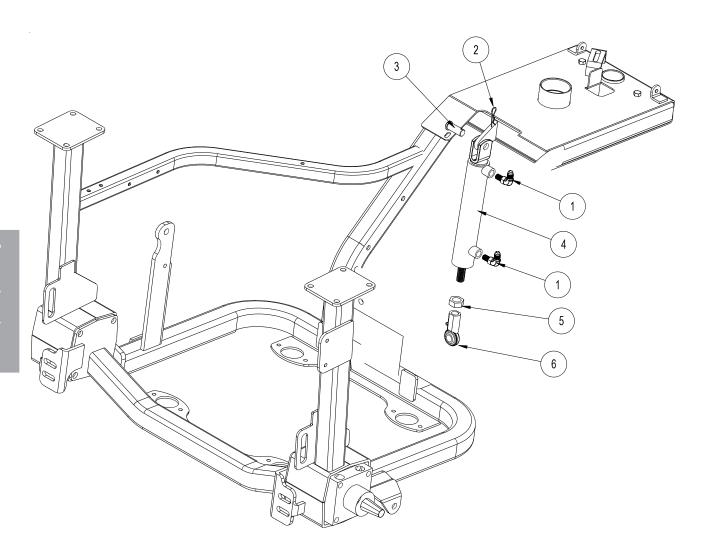

REF#	PART#	DESCRIPTION	QUANTITY
1	45-106	Lift Assembly	1
	18-221	Flange Bushing	2
2	HCP-12-150	Clevis Pin 1/2 x 11/2	2

18	HMB-34-14	Machine Bushing <sup>3</sup> / <sub>4</sub> - 14GA	1
19	HP-18-150	Cotter Pin 1/8 x 11/2	1

#### SAND PLOW INSTALLATION

- 1. Assemble (Ref# 3 and 13) Pusher Bars to (Ref# 8) Plow using (Ref# 9 and 10) hardware. There are 2 holes to bolt (Ref# 9) hardware in. Using hole closest to the blade will result in a shallow cut, whereas using the hole furthest from the blade will result in a deeper cut. The slot on the pusher bar is for a more fine tuned adjustment.
- 2. Assemble the (Ref# 1) Lift Assembly to the Main Frame using the two studs that are under the frame and below the front of the console.
- 3. Attach the (Ref# 6) Lift Handle to the lift assembly using (Ref# 18 & 19) Cotter Pin and Machine Bushing. Using (Ref# 15 & 7) Rod and Yoke attach the handle to the lift assembly.
- 4. Put (Ref# 7) Rod Ends onto (Ref# 10) Lift Rods with Jam Nut first. Adjust to equal lengths. Bolt Lift Rods to Lift Arms with Ball Joints to the outside. Bolt from outside with the 1/2" Machine Bushing between Rod End and Lift Arm and the 1/2 13 nut on the inside. Use (Ref# 6) Hardware.
- 5. Slide Plow under machine and connect to machine. Use (Ref# 2) Clevis Pin and Bridge Pin.
- 6. Lift up the plow using the bottom hole in the Lift Rod as a starting point. Secure to the Pusher Bars. Use (Ref# 4) hardware. For maximum blade clearance use the second hole from the front of the pusher bar. The three holes in the lift rods are for adjusting the hand lever. The top hole moves the lever forward. Each hole down moves the lever to the rear of the machine.
- 7. For fine tuning of blade height off ground twist (Ref# 7) rod end on (Ref# 15) rod. Twisting the rod end out will increase down pressure. Twisting the rod end onto the rod will decrease down pressure.

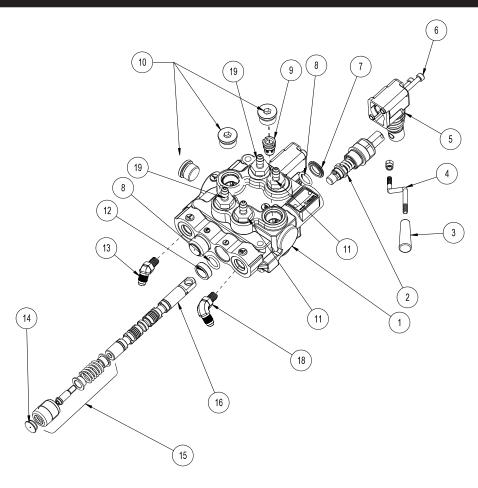

# 45-018 CENTER ATTACHMENT LIFT KIT

REF#	PART#	DESCRIPTION	QUANTITY

# 45-014 WEED CULTIVATOR

REF#	PART#	DESCRIPTION	QUANTITY
1	HHP-18	Bridge Pin <sup>1</sup> / <sub>s</sub>	3
2	HCP-12-200	Clevis Pin 1/2 x 2	2
3	45-185	Center Bar Lift	1
4	HB-38-16-125	Bolt, $\frac{3}{8}$ - 16 x $\frac{11}{4}$	8
5	13-096	Blade Assembly •	4
6	HNFL-38-16	Flange Nut, <sup>3</sup> / <sub>s</sub> - 16	8
7	HCP-58-250	Clevis Pin 5/, x 21/,	1

- 1. Blade assemblies (Ref 5) should be bolted to the center lift bar (Ref 3). Use the  $^{3}/_{8}$  16 x  $1^{1}/_{4}$  bolt (Ref 4) and flange lock nut (Ref 6).
- 2. Attach the center lift bar to main frame using (Ref 1 and 2) clevis pin and bridge pin.
- 3. Lift center lift bar up or extend cylinder so rod end lines up with the holes on the center of the attachment lift. Use clevis pin and bridge pin (Ref 7 and 1) to fasten cylinder to sand cultivator.
- 4. Turn machine on and test for proper operation.

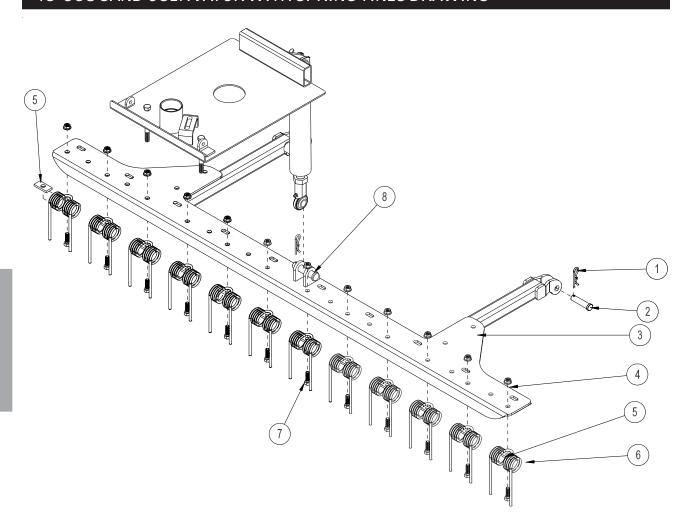

## 45-006 SAND CULTIVATOR PARTS LIST

REF#	PART#	DESCRIPTION	QTY
1	HHP-18	Bridge Pin <sup>1</sup> / <sub>8</sub>	3
2	HCP-12-200	Clevis Pin 1/2 x 2	2
3	45-184	Center Lift Bar	1
4	HNTL-38-16	Lock Nut 3/8 - 16	10
5	42-038	Tine Segment	5
6	HB-38-16-100	Bolt <sup>3</sup> / <sub>8</sub> - 16 x 1	10
7	HCP-58-250	Clevis Pin 5/8 x 21/2	1

- 1. Tine segments (Ref 5) should be bolted to the center lift bar (Ref 3). Use the <sup>3</sup>/<sub>8</sub> 16 x 1 bolt (Ref 6) and lock nut (Ref 4).
- 2. Attach the center lift bar to main frame using (Ref 1 and 2) clevis pin and bridge pin.
- 3. Lift center lift bar up or extend cylinder so rod end lines up with the holes on the center of the attachment lift. Use clevis pin and bridge pin (Ref 7 and 1) to fasten cylinder to sand cultivator.
- 4. Turn machine on and test for proper operation.

## 45-008 SAND CULTIVATOR WITH SPRING TINES DRAWING

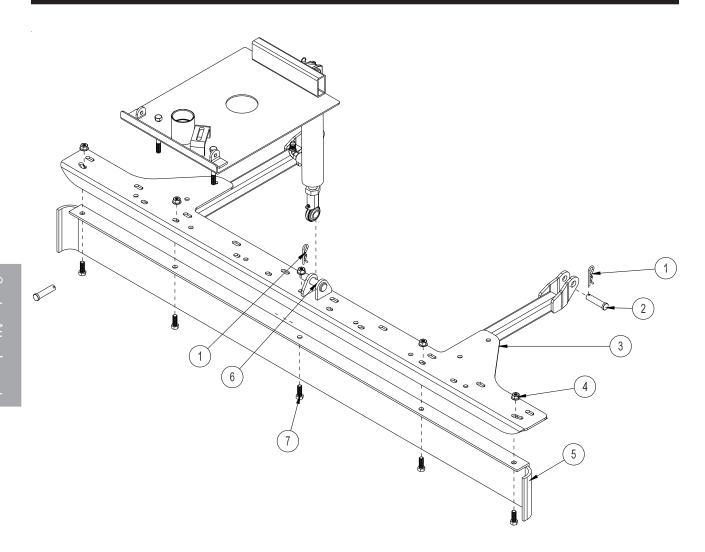

### 45-008 SAND CULTIVATOR WITH SPRING TINES PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	HHP-18	Bridge Pin <sup>1</sup> / <sub>8</sub>	3
2	HCP-12-200	Clevis Pin ½ x 2	2
3	45-185	Center Lift Bar	1
4	HNTL-516-18	Lock Nut <sup>5</sup> / <sub>16</sub> - 18	12
5	42-177	Spring Holder	12
6	42-122	Rake Spring	12
7	HB-516-18-100	Hex Bolt <sup>5</sup> / <sub>16</sub> - 18 x 1	12
8	HCP-58-250	Clevis Pin 5/8 x 21/2	1

- 1. Springs (Ref 6) should be bolted to the center lift bar (Ref 3) with the spring holder (Ref 5) between center lift bar and the spring. Bolt in place with 5/16 18 x 1 bolt (Ref 7) and lock nut (Ref 4).
- 2. Attach the center lift bar to main frame using (Ref 1 and 2) clevis pin and bridge pin.
- 3. Lift center lift bar up or extend cylinder so rod end lines up with the holes on the center of the attachment lift. Use clevis pin and bridge pin (Ref 8 and 1) to fasten cylinder to sand cultivator.
- 4. Turn machine on and test for proper operation.

## 45-012 CONSTRUCTION LEVELING BLADE DRAWING

## 45-012 CONSTRUCTION LEVELING BLADE PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	HHP-18	Bridge Pin 1/8	3
2	HCP-12-200	Clevis Pin 1/2 x 2	2
3	45-116	Center Lift Bar	1
4	HNTL-38-16	Lock Nut <sup>3</sup> / <sub>8</sub> - 16	5
5	42-097	Leveling Blade	1
6	HCP-58-250	Clevis Pin 5/8 x 21/2	1
7	HB-38-16-100	Bolt <sup>3</sup> / <sub>8</sub> - 16 x 1	5

- 1. Bolt leveling blade (Ref 5) to center lift bar (Ref 3) using five 3/8 16 x 1 bolts (Ref 7) and five 3/8 16 lock nuts (Ref 4) as shown on drawing.
- 2. Attach the center lift bar to amain frame using clevis pin and bridge pin (Ref 1 and 2).
- 3. Lift center lift bar up or extend cylinder so rod end lines up with the holes on the center of the center lift bar. Use  $\frac{5}{8}$  x  $2^{1/2}$  clevis pin and bridge pin (Ref 6 & 1) to fasten cylinder to cultivator.
- 4. Turn machine on and test for proper operation.

12	42-202	Tire & Wheel	2
13	HNTL-12-13	Lock Nut ½ - 13	2
14	HCP-58-250	Clevis Pin 5/8 x 21/2	1
15	HMB-34-14	Machine Bushing ¾ x 14GA	2
16	42-206	Right Castor Wheel Bracket	1
	10-025	Flange Bushing (Part of 42-289)	2
	HG-14-28-180	Grease Fitting 1/4 - 28 x 180° (Part of 42-289)	1
17	42-215	Short Spacer	2
18	HMB-34-10	Machine Bushing 3/4 x 10GA	8
19	42-214	Long Spacer	2
20	42-539	Lynch Pin ¼"	2
21	HB-38-16-100	Hex Bolt <sup>3</sup> / <sub>8</sub> - 16 x 1	6
	HW-38	Washer <sup>3</sup> / <sub>8</sub>	6
	HNTL-38-16	Lock Nut <sup>3</sup> / <sub>8</sub> - 16	6

- 1. Assemble seven digger blades (Ref 6) to the center lift bar (Ref 5) using the  $^{3}/_{8}$  16 x 1 $^{1}/_{4}$  bolts, washers and nuts (Ref 4 & 13). Do not put the two digger blades on that mount with the caster arm hardware (Ref 20).
- 2. Mount the right and left caster wheel brackets (Ref 4 and 15) to the center lift bar (Ref 5) using  $^{3}/_{8}$  16 x 1 bolts, washers and nuts (Ref 21). Mount the last two digger blades at this time using the  $^{3}/_{8}$  16 x 1 $^{1}/_{2}$  bolts, washers and nuts (Ref 20).
- 4. Slide the Scarifier under the machine lining up the hydraulic cylinder and the center of the center lift bar.
- 5. Extend hydraulic cylinder all the way down by pushing the lever forward.
- 6. Mount the rod end of the cylinder onto the center lift bar and secure with a clevis pin (Ref 12) and bridge pin (Ref 1).
- 7. Attach the arms on the center lift bar to the main frame on the machine and secure with clevis pin (Ref 2) and bridge pin (Ref 1).
- 8. Turn machine on and test for proper operation.
- 9. Adjust castor wheels (Ref 12) by placing the short (Ref 16) or long spacer (Ref 18) on the castor wheel fork before placing the castor wheel assembly into the castor wheel brackets. Be sure both castor wheels are adjusted to the same height.

## 45-007 INFIELD SCARIFIER WITH VERTICAL BLADES DRAWING

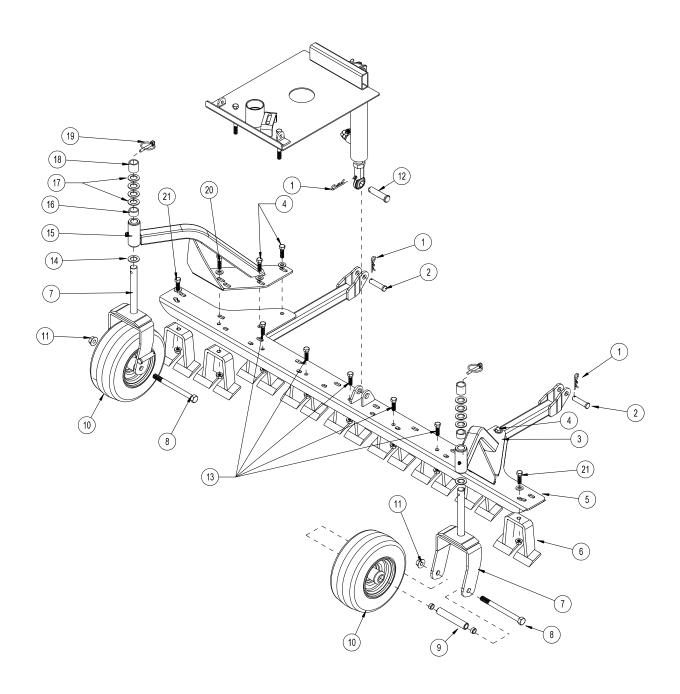

#### 45-007 INFIELD SCARIFIER WITH VERTICAL BLADES PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	HHP-18	Bridge Pin 1/8	3

- 1. This product only fits on a Sand Star I and II. Will NOT fit on Sand Star III>
- 2. Center lift bar must be installed on our machine. This kit does not come with a lift bar.
- 3. If your center lift bar has castor wheels on it, you must remove the castor wheels and brackets.
- 4. Install Brush Motor Support (Ref 8) on your right side of center lift arm using the holes where the caster wheel would bolt to. Bolt in place with hardware (Ref 7).
- 5. Place Hub Assembly (Ref 13) on brush (Ref 14) with the (Ref 13) hardware.
- 6. Place motor (Ref 11) on Motor mount (Ref 19) and then mount that assembly tot the Brush Motor Support (Ref 8).
- 7. Connect the brush and hub assembly to the motor and tighten set screws.
- 8. Place adapter (Ref 10) into motor. The place the Coupler (Ref 5) on the inside adapter and the nipple (Ref 12) on the outside adapter.
- 9. Assembly the valve as shown in the drawing.
- 10. The Valve assembly mounts on the right front fender. The valve goes underneath the fender with the handle pointing outward. The valve mount plate (Ref 4) mounts on the outside of the fender.
- Mount the Single Bank Hydraulic Valve (Ref # 18) to the Valve Mount (Ref # 4) as illustrated, using the two <sup>5</sup>/<sub>16</sub> 18 x 2 Bolts (Ref # 3). Secure with the two Lock Nuts. Connect the Straight Handle (Ref # 2) to the Valve.
- 12. Connect 42" hoses (Ref 15) from the pump to the valve. Connect the 21" hose from the valve to the cooler. The return hose on the 2-bank valve connects to the single bank valve.
- 13. Test operation of the broom before using on turf.

# 42-3910 72"(183CM) PROBRUSH TOURNAMENT RAKE DRAWING

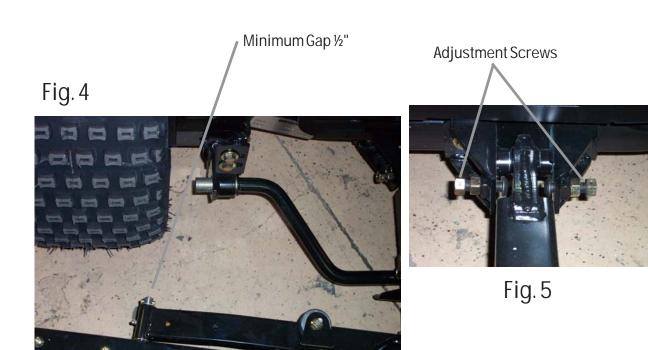

#### PROBRUSH TOURNAMENT RAKE ASSEMBLY INSTRUCTIONS

Your ProBrush TOURNAMENT RAKE comes mostly assembled.

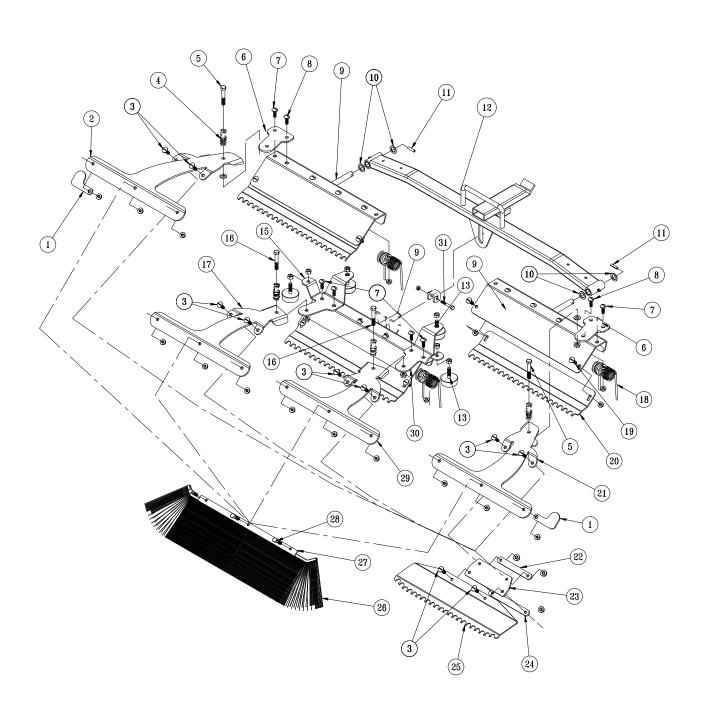

- Before assembly please note the two Brush/Finish Blade Assemblies (Refs A & C in Fig.1) that are
  mounted on the outside (RH & LH) have flat washers that are between the Brush Arms (Refs 2 & 21) and
  the Brush Arm Mount (Ref 6).
- 2. Also please note the placement of the Brush/Finish Blade Assemblies as illustrated in Fig 1. They must be mounted as illustrated to work as intended.
- 3. Begin assembling your ProBrush TOURNAMENT RAKE by inserting the Outside and Center Groomer Blade Assemblies (Refs A, B & C in Fig.1) in their locations as illustrated. Secure the Outside Assemblies with the ¼" Pin (Ref 11) and the Center Assembly with the ¼" x 1¾" Bolt and Lock Nut (Ref 13).
- 4. Mount the Brush/Finish Blade Assemblies to the Brush Arm Mounts (Refs 6, 30 & 15) as illustrated using the <sup>3</sup>/<sub>8</sub> x 2½ Bolts and Lock Nuts. Assemble with the Springs (Ref 4) as shown in Fig. 2. Please note that the <sup>3</sup>/<sub>8</sub>" Flat Washers are used only on the Outside Assemblies. Secure when assembled.
- 5. Mount your ProBrush TOURNAMENT RAKE to the trap rake quick hitch. Position the Rake so it is centered and equal distance away from the right and left hand tires (2-3 inches). Fig. 4. Once positioned, set the Adjustment Screws on the Hitch so they touch the trap rake hitch. Fig. 5.
- 6. Run machine and test for operation of the Rake by raising and lowering the assembly and with rake down turn sharp corners in both directions to ensure rake is not contacting the tires. Test Rake in sand to ensure tire tracks are covered when turning sharp corners. If the tire tracks are not covered by the Rake, turn the Adjustment Screws on the Rake Hitch so the rake comes closer to the tires when turning. For reference see Fig. 4 and 5 below.

#### NOTE:

The Outside Brush/Finish Blade Assemblies may be rotated 180° for transport and for working in narrow areas, as illustrated in Fig.3 on the facing page.

## 42-392Q 84"(213CM) PROBRUSH TOURNAMENT RAKE DRAWING

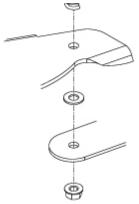

Fig. 3

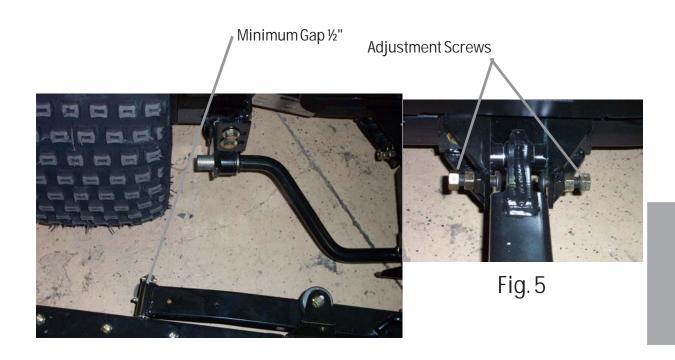

#### PROBRUSH TOURNAMENT RAKE ASSEMBLY INSTRUCTIONS

Your ProBrush TOURNAMENT RAKE comes mostly assembled.

- Before assembly please note the two Brush/Finish Blade Assemblies (Refs A & C in Fig.1) that are
  mounted on the outside (RH & LH) have flat washers that are between the Brush Arms (Refs 2 & 21) and
  the Brush Arm Mount (Ref 6).
- 2. Also please note the placement of the Brush/Finish Blade Assemblies as illustrated in Fig 1. They must be mounted as illustrated to work as intended.
- 3. Begin assembling your ProBrush TOURNAMENT RAKE by inserting the Outside and Center Groomer Blade Assemblies (Refs A, B & C in Fig.1) in their locations as illustrated. Secure the Outside Assemblies with the ¼" Pin (Ref 11) and the Center Assembly with the ½" x 1¾" Bolt and Lock Nut (Ref 13).
- 4. Mount the Brush/Finish Blade Assemblies to the Brush Arm Mounts (Refs 6, 30 & 15) as illustrated using the <sup>3</sup>/<sub>8</sub> x 2½ Bolts and Lock Nuts. Assemble with the Springs (Ref 4) as shown in Fig. 2. Please note that the <sup>3</sup>/<sub>8</sub>" Flat Washers are used only on the Outside Assemblies. Secure when assembled.
- 5. Mount your ProBrush TOURNAMENT RAKE to the trap rake quick hitch. Position the Rake so it is centered and equal distance away from the right and left hand tires (2-3 inches). Fig. 4. Once positioned, set the Adjustment Screws on the Hitch so they touch the trap rake hitch. Fig. 5.
- 6. Run machine and test for operation of the Rake by raising and lowering the assembly and with rake down turn sharp corners in both directions to ensure rake is not contacting the tires. Test Rake in sand to ensure tire tracks are covered when turning sharp corners. If the tire tracks are not covered by the Rake, turn the Adjustment Screws on the Rake Hitch so the rake comes closer to the tires when turning. For reference see Fig. 4 and 5 below.

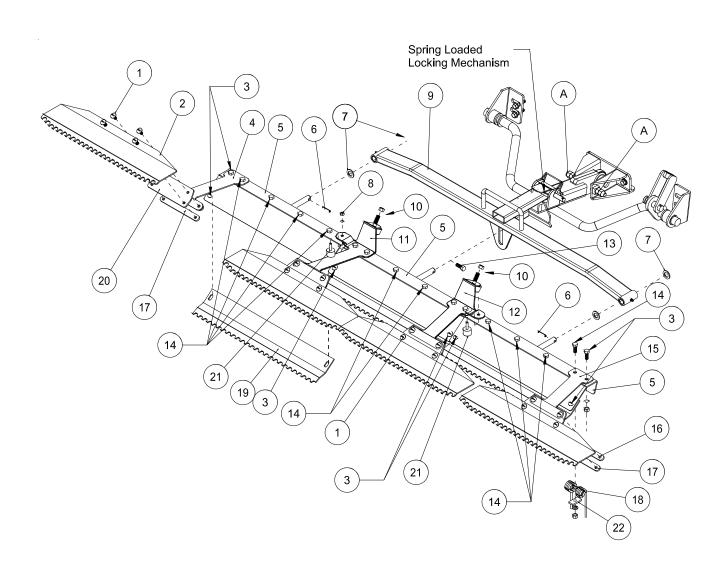

#### NOTE:

The Outside Brush/Finish Blade Assemblies may be rotated 180° for transport and for working in narrow areas, as illustrated in Fig.3 on the facing page.

# 42-130084" (213CM) MILD STEEL TOURNAMENT RAKE DRAWING

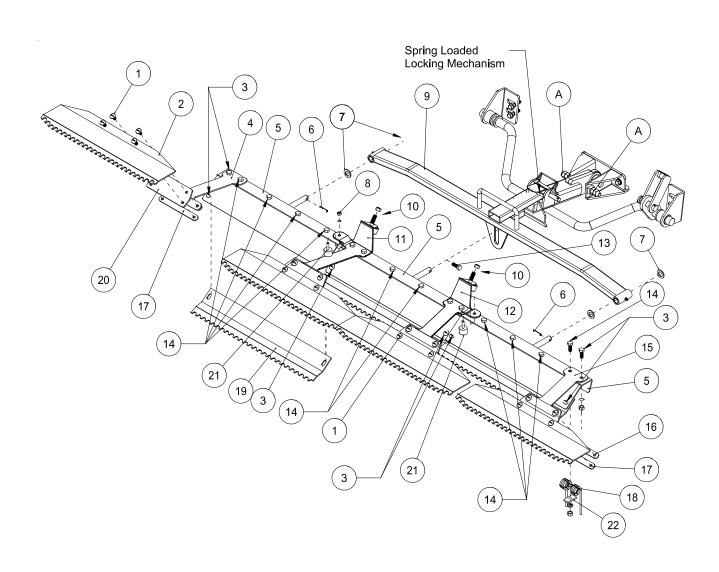

#### RAKE ASSEMBLY INSTRUCTIONS

- 1. Bolt rake spring (Ref 18) to rake frames (Ref 5) using hardware (Ref 14). Leave the two outside holes on right, left, and center rake open.
- 2. Attach rubber bumper (Ref 22) using cap nut and washer (Ref# 8). Attach rubber grommet (Ref 10) to inside mounts (Ref 11 & 12)
- 3. Attach the left outside mount (Ref 4), the left inside mount (Ref 11), the outside trowel mount (Ref 15), and the inside trowel mount (Ref 12) to the outside and center rakes (Ref 5) as shown. Use the 1<sup>1</sup>/<sub>4</sub>" truss head screws (Ref 14) on the outside hole of each rake. Use the spring holder (Ref 23) and the 1<sup>1</sup>/<sub>4</sub>" truss head screws (Ref 21) to attach rake springs (Ref 18) to the rakes under the left outside and inside mounts and the outside and inside trowel mounts.
- 4. Slide a machine bushing onto outside rake frames then slide the outside rake frames (Ref 5) into the tubing on the end of the drawbar. Hold in place with another machine bushing and a roll pin (Ref 6).
- 5. Attach center rake (Ref 5) to draw bar (Ref 9) as shown, using 1½ bolts and lock nuts (Ref 13) with the shaft of the center rake in the slot on the bottom of the drawbar.
- 6. Attach the matting (Ref 20) and the top strap (Ref 16) to the inside and outside mounts using the truss head screw <sup>5</sup>/<sub>16</sub> 18 x 1 (Ref 1). Attach four finishing blades (Ref 2) to the matting on the inside and outside mounts with the truss head screw <sup>5</sup>/<sub>16</sub> 18 x 1 (Ref 1) going through the finishing blade, matting, and bottom strap (Ref 17).
- 7. Place the three groomer blades (Ref 19) under the three rake assemblies as shown, using (Ref 3).
- 8. Attach the rake lift to the trap rake quick hitch, by sliding the hitch into the spring loaded locking mechanism.
- 9. With the rake on the ground pull the rake to the right side until it is 2-3 inches from the tire.
- 10. Using the adjustment bolts (Ref A) on the side of hitch, adjust the bolts until it hits the trap rake hitch. Lock jam nut so adjustment will not change.
- 11. Repeat steps for the left side.
- 12. Turn machine on and test for operation of rake assembly by raising and lowering the rake assembly. Also with rake down, turn sharp corners to check that rake does not touch wheels.

**NOTE:** Test rake in sand to assure tire tracks are covered by the rake when turning sharp corners in either direction. If there are tire tracks, readjust using the adjusting screws on the hitch, so the rake comes closer to the tire.

#### RAKE ASSEMBLY INSTRUCTIONS

- 1. Bolt rake spring (Ref 18) to rake frames (Ref 5) using hardware (Ref 14). Leave the two outside holes on right, left, and center rake open.
- 2. Attach rubber bumper (Ref 22) using cap nut and washer (Ref# 8). Attach rubber grommets (Ref 10) to inside mounts (Ref 11 & 12)
- 3. Attach the left outside mount (Ref 4), the left inside mount (Ref 11), the outside trowel mount (Ref 15), and the inside trowel mount (Ref 12) to the outside and center rakes (Ref 5) as shown. Use the 1<sup>1</sup>/<sub>4</sub>" truss head screws (Ref 14) on the outside hole of each rake. Use the spring holder (Ref 23) and the 1<sup>1</sup>/<sub>4</sub>" truss head screws (Ref 21) to attach rake springs (Ref 18) to the rakes under the left outside and inside mounts and the outside and inside trowel mounts.
- 4. Slide a machine bushing onto outside rake frames then slide the outside rake frames (Ref 5) into the tubing on the end of the drawbar. Hold in place with another machine bushing and a roll pin (Ref 6).
- 5. Attach center rake (Ref 5) to draw bar (Ref 9) as shown, using 1½ bolts and lock nuts (Ref 13) with the shaft of the center rake in the slot on the bottom of the drawbar.
- 6. Attach the matting (Ref 20) and the top strap (Ref 16) to the inside and outside mounts using the truss head screw <sup>5</sup>/<sub>16</sub> 18 x 1 (Ref 1). Attach four finishing blades (Ref 2) to the matting on the inside and outside mounts with the truss head screw <sup>5</sup>/<sub>16</sub> 18 x 1 (Ref 1) going through the finishing blade, matting, and bottom strap (Ref 17).
- 7. Place the three groomer blades (Ref 19) under the three rake assemblies as shown, using (Ref 3).
- 8. Attach the rake lift to the trap rake quick hitch, by sliding the hitch into the spring loaded locking mechanism.
- 9. With the rake on the ground pull the rake to the right side until it is 2-3 inches from the tire.
- 10. Using the adjustment bolts (Ref A) on the side of hitch, adjust the bolts until it hits the trap rake hitch. Lock jam nut so adjustment will not change.
- 11. Repeat steps for the left side.
- 12. Turn machine on and test for operation of rake assembly by raising and lowering the rake assembly. Also with rake down, turn sharp corners to check that rake does not touch wheels.

**NOTE:** Test rake in sand to assure tire tracks are covered by the rake when turning sharp corners in either direction. If there are tire tracks, readjust using the adjusting screws on the hitch, so the rake comes closer to the tire.

11	HCP-12-150	Clevis Pin <sup>1</sup> / <sub>2</sub> - 1 <sup>1</sup> / <sub>2</sub>	2
12	43-145	Drawbar	1
13	HB-58-11-400	Bolt <sup>5</sup> / <sub>8</sub> - 11 x 4	2
14	13-417	Connector Link	10
*	13-090	Rake Teeth Kit (25 Studs and Hardware)	1

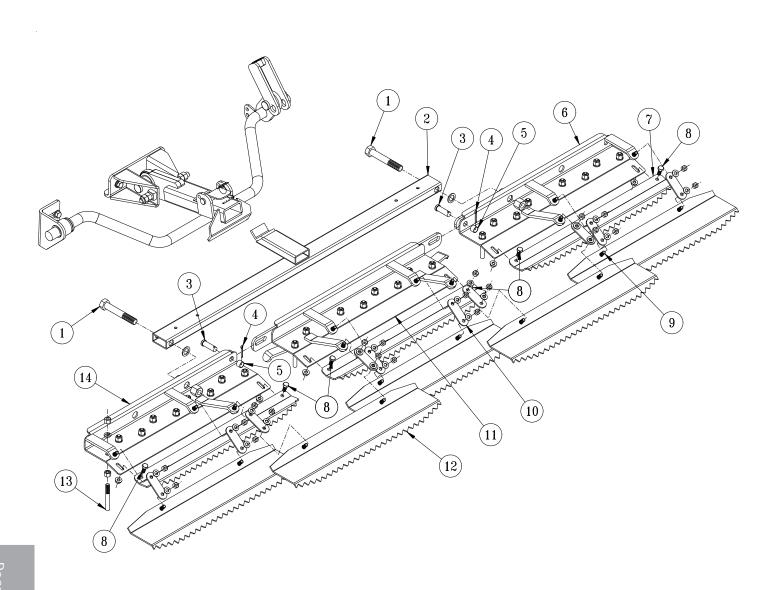

## *INSTALLATION INSTRUCTIONS*

- 1. Bolt rake teeth (Ref 9) to frames, keeping all the same length. Leave the two outside holes on right and left rake open (Ref A).
- 2. Lay out rake frames (Ref 1,6 and 8). Connect them using clevis pin, machine bushing and cotter pin (Ref 11, 4 and 5).
- 3. Attach drawbar to left and right frames using bolt, machine bushing, and nut (Ref 13, 2 and 3).
- 4. Attach five finishing blades (Ref 7) to the tabs of the rake frames using master link (Ref 14). Blades may be mounted with saw tooth up or down, depending on the desired finish of the sand trap.
- 5. Attach the rake lift to the trap rake quick hitch, by sliding the hitch into the spring loaded locking mechanism
- 6. With the rake on the ground pull the rake to the right side until it is 2-3 inches from the tire.
- 7. Repeat steps on left side.
- 8. Turn machine on and test for operation of rake assembly by raising and lowering the rake assembly. Also with rake down, turn sharp corners to check that rake does not touch wheels.
- 9. **NOTE:** Test rake in sand to assure tire tracks are covered by the rake when turning sharp corners in either direction. If there are tire tracks, readjust using the adjusting screws on the hitch, so the rake comes closer to the tire.

#### GROOMER BLADES - GOLF COURSE USE ONLY.

- 1. Place the three groomer blades (Ref 10) under the three rake assemblies (Ref 1, 6 and 8).
- Center blades below rear most row of rake teeth. The blade is designed to miss the outside two "teeth' and fit around the center 'tooth'.
- 3. Remove the two 'teeth' that line up with slots of each groomer blade. Move blade up and into position and reattach 'teeth'. Blade thickness should be accounted for by shortening the 'teeth' an equal length.

#### 13-758 MAX FLEX SAND RAKE

REF#	PART#	DESCRIPTION	QUANTITY
1	HB-58-11-400	Bolt, <sup>5</sup> / <sub>8</sub> - 11 x 4	2
	HMB-58-14	Machine Bushing, 5/8 x 14GA	2
	HNCL-58-11	Lock Nut, <sup>5</sup> / <sub>8</sub> - 11	2
2	43-145	Drawbar	1
3	HCP-12-150	Clevis Pin, <sup>1</sup> / <sub>2</sub> - 1 <sup>1</sup> / <sub>2</sub>	2
4	HP-18-100	Cotter Pin, <sup>1</sup> / <sub>8</sub> x 1	2
5	76-275	Spacer	2
6	13-762	Right Rake	1
7	13-759	Grooming Blade	3
8	HB-516-18-075	Bolt, $\frac{5}{16}$ - 18 x $\frac{3}{4}$	6
	HNFL-516-18	Flange Lock Nut, <sup>5</sup> / <sub>16</sub> - 18	6
9	HBFL-516-18-100	Flange Lock Bolt, $\sqrt[5]{}_{16}$ - 18 x 1	20
	HNTL-516-18	Nylon Lock Nut, 5/ <sub>16</sub> - 18	20
	HW-516	Flat Washer, 5/16	20
10	13-757	Rake Connect Strap	10
11	13-761	QH Center Rake	1
12	13-443	Finishing Blade	5
14	13-763	Left Rake	1
13*	13-445	Rake Teeth Kit (27 Studs and Hardware)	1

#### **INSTALLATION INSTRUCTIONS**

- 1. Bolt rake teeth (Ref 13) to frames, keeping all the same length.
- 2. Lay out rake frames (Refs 6, 11 & 14). Connect them using Clevis Pin (Ref 3), Spacer (Ref 5) and Cotter Pin (Ref 4).
- 3. Attach Left Frame (Ref 14) and Right Frame (Ref 6) to Drawbar (Ref 2) using 5/8 Bolt, Machine Bushing, and Center Lock Nut (Ref 1).
- 4. Attach the three Groomer Blades (Ref 7), one to each of the Rake Frames (Refs 6, 11 & 14) using two Hex Bolts and Flange Lock Nuts (Ref 8). Slide Groomer Blades to end of slot and tighten hardware.
- 5. Attach the five Finishing Blades (Ref 12) to the tabs of the rake frames using two Rake Connect Strap (Ref 10) per Finishing blade. Secure using Flange Lock Bolt, Flat Washer and Nylon Lock Nut (Ref 9).

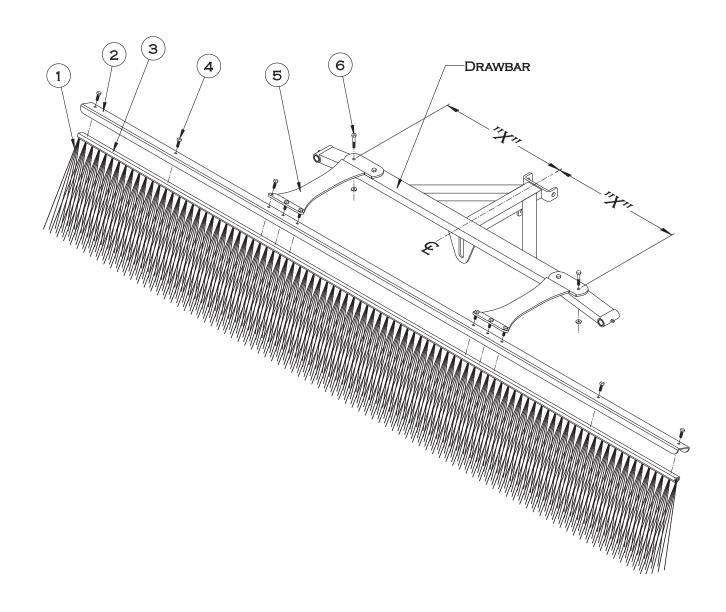

NOTE: Attach Straps using hardware as illustrated, placing Flat Washer on Strap then secure with Lock Nut. Attaching with the Flange Bolt in contact with the Strap will cause the Strap to bind and misalign Finishing Blade.

- 6. Attach the rake to the trap rake quick hitch by sliding the drawbar hitch into the spring loaded locking mechanism.
- 7. With the rake on the ground pull the rake to the right side until it is 2-3 inches from the tire.
- 8. Repeat steps on left side.
- 9. Turn machine on and test for operation of rake assembly by raising and lowering the rake assembly. Also with rake down, turn sharp corners to check that rake does not touch wheels.
- 10. **NOTE:** Test rake in sand to assure tire tracks are covered by the rake when turning sharp corners in either direction. If there are tire tracks, readjust using the adjusting screws on the hitch, so the rake comes closer to the tire.

# 13-740 SAND RAKE BRUSH KIT DRAWING

#### For use with 42-130

## 13-740 SAND RAKE BRUSH KIT PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	13-738	Brush, 89 x 11	1
2	13-737	Brush Channel	1
3	13-739	Brush Track	1
4	HB-14-20-075	Bolt $\frac{1}{4}$ - 20 x $\frac{3}{4}$	10
	HNFL-14-20	Flange Whiz-Lock Nut 1/4 - 20	10
5	13-681	Mounting Brackets	2
6	HB-14-20-150	Bolt $\frac{1}{4}$ - 20 x $\frac{1}{2}$	4
	HNFL-14-20	Flange Whiz-Lock Nuts 1/4 - 20	4

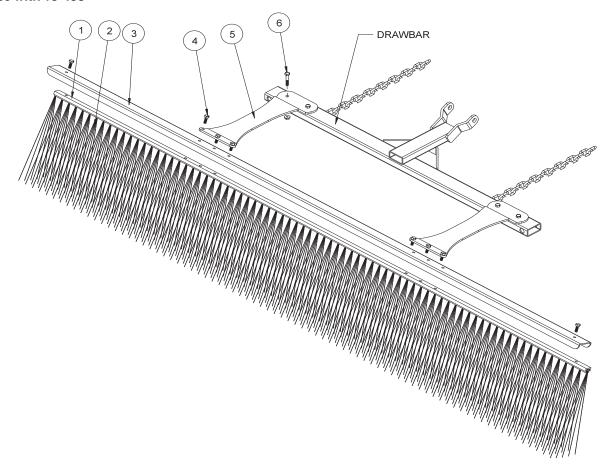

## *INSTALLATION INSTRUCTIONS*

- 1. Place the Brush (Ref 1) into the Brush Track (Ref 3). Place the Brush Channel (Ref 2) between the brush track and the mounting brackets. Now bolt the Mounting Brackets (Ref 5) to the brush track using the 3/4" bolts and flange whiz-lock nuts(Ref 4).
- 2. To mount the Brush Assembly (Refs 1-5) to the Rake Drawbar, first align the Mounting Brackets so the Brush Assembly is centered ("X" measurements are equal) on the Rake Drawbar. Mark the locations for the four holes that will need to be drilled. Note: To fit the curve of the Rake Drawbar, a small amount of twist will need to be put in the Mounting Brackets. This can be done by clamping the Mounting Brackets to the Drawbar.
- 3. Mount the Brush Assembly to the Rake Drawbar using the four 1½" bolts and flange whiz-lock nuts(Ref 6).

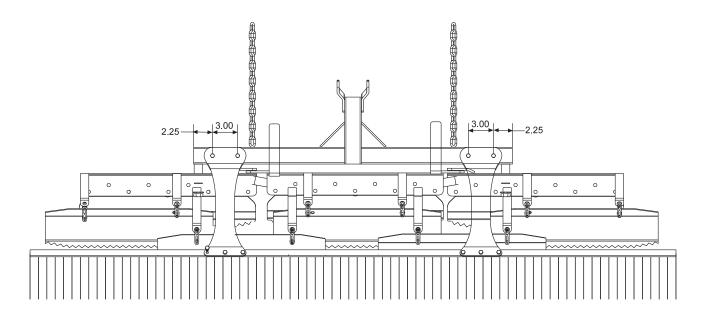

# 13-684 SAND RAKE BRUSH KIT DRAWING

#### For use with 13-438

# **HOLE LOCATION**

# 13-684 SAND RAKE BRUSH KIT PARTS LIST

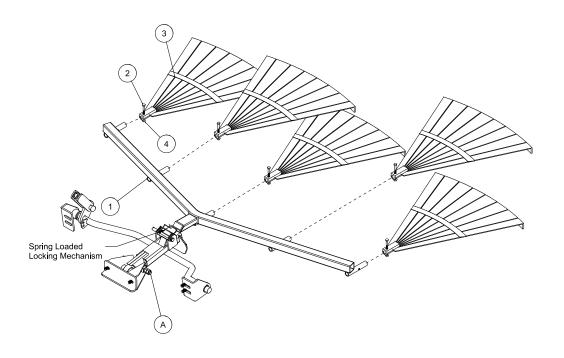

REF#	PART#	DESCRIPTION	QUANTITY
1	13-683	Brush Track	1
2	13-682	Brush 77 x 11	1
3	13-688	Brush Channel	1
4	HB-14-20-075	Bolt <sup>1</sup> / <sub>4</sub> - 20 x <sup>3</sup> / <sub>4</sub>	8
	HNFL-14-20	Flange Whiz-Lock Nut 1/4 - 20	8
5	13-681	Mounting Brackets	2
6	HB-14-20-150	Bolt $\frac{1}{4}$ - 20 x $\frac{1}{2}$	4
	HNFL-14-20	Flange Whiz-Lock Nuts 1/4 - 20	4

## *INSTALLATION INSTRUCTIONS*

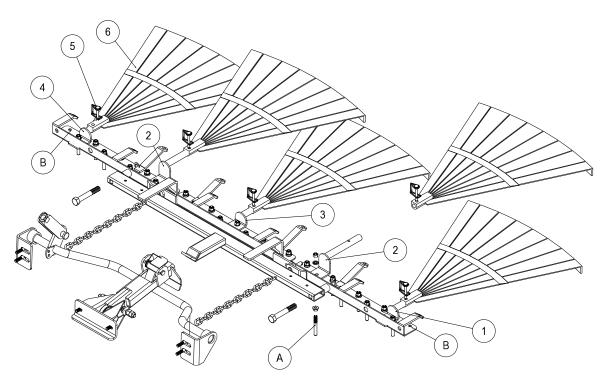

- 1. Place the brush (Ref 2) into the brush track (Ref 1). Place the brush channel (Ref 3) between the brush track and the mounting brackets. Now bolt the mounting brackets (Ref 5) to the brush track using the <sup>3</sup>/<sub>4</sub>" bolts and flange whiz-lock nuts (Ref 3).
- 2. Two holes need to be drilled into the drawbar of the rake to install the brush. Drill two .281 holes 2<sup>1</sup>/<sub>4</sub>" in from each end and 3" apart (see drawing).
- 3. Mount the brush assembly to the drawbar using four 3/4" bolts and flange whiz-lock nuts (Ref 5).

# 13-298Q FAN RAKE ATTACHMENT DRAWING

# 13-319-K FAN RAKE KIT DRAWING

#### 13-298Q FAN RAKE ATTACHMENT PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	43-153	Frame	1
2	HB-14-20-200	Bolt <sup>1</sup> / <sub>4</sub> - 20 x 2	5
3	13-310	Rake	5
4	HNCL-14-20	Center Lock Nut 1/4 - 20	5

#### *INSTALLATION INSTRUCTIONS*

- Assemble the five rakes (Ref 3) to the frame using the bolt and center lock nuts (Ref 2 and 4). Slide the fan rake assembly under the rear of the trap rake to the hitch.
- Attach the rake lift to the trap rake quick hitch, by sliding the hitch into the spring loaded locking mechanism.
- 3. With the rake on the ground pull the rake to the right side until it is 2-3 inches from the tire.
- 4. Repeat steps on left side.
- 5. Turn machine on and test for operation of rake assembly by raising and lowering the rake assembly. Also with rake down, turn sharp corners to check that rake does not touch wheels.

#### 13-319-K FAN RAKE KIT PARTS LIST

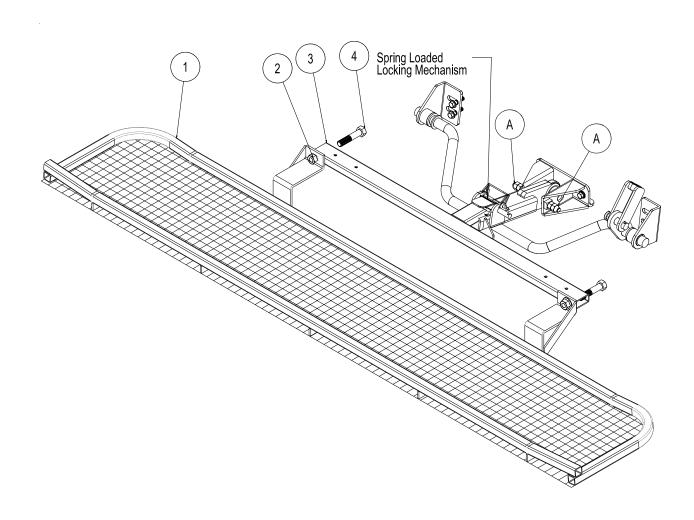

REF#	PART#	DESCRIPTION	QUANTITY
1	13-326	Left Holder	1
2	13-329	Long Holder	2
3	13-327	Center Holder	1
4	13-328	Right Holder	1
5	29-541	Lock Pin	5
6	13-310	Rake	5
В	No Studs in first	slot - Leave Empty.	

## FAN RAKE KIT INSTRUCTIONS

- 1. Remove connector links that hold rake blades to rake frame if desired.
- 2. Remove groomer blades from rake frame that are held on with rake teeth studs (Ref A). Replace rake teeth studs, if desired.
- 3. Place left holder (Ref 1), angle side up, to the second rake tooth hole from the end and install rake tooth stud. The first rake tooth hole from each end (Ref B) have no rake teeth in them.
- 4. Remove the 8th rake tooth stud from the end of right and left rake frame and place long holders (Ref 2) on top, reinstall rake teeth studs.
- 5. Remove rake tooth in direct center of rake and install the center holder (Ref 3). Reinstall rake teeth studs.
- 6. Place right holder (Ref 4), angle side up, to the second rake tooth hole from the end and install rake tooth stud. The first rake tooth hole from each end (Ref B) have no rake teeth in them.
- 7. Slide fan rake (Ref 6) onto holders and pin with lock pin (Ref 5).

# 26-0070 PROFESSIONAL INFIELD FINISHER DRAWING

# Sear Attachment

## 26-007Q PROFESSIONAL INFIELD FINISHER PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	26-045	Leveling Screen	1
2	HNCL-58-11	Center Lock Nut 5/8 - 11	2
3	43-152	Drawbar	1
4	HB-58-11-300	Bolt <sup>5</sup> / <sub>8</sub> - 11 x 3	2

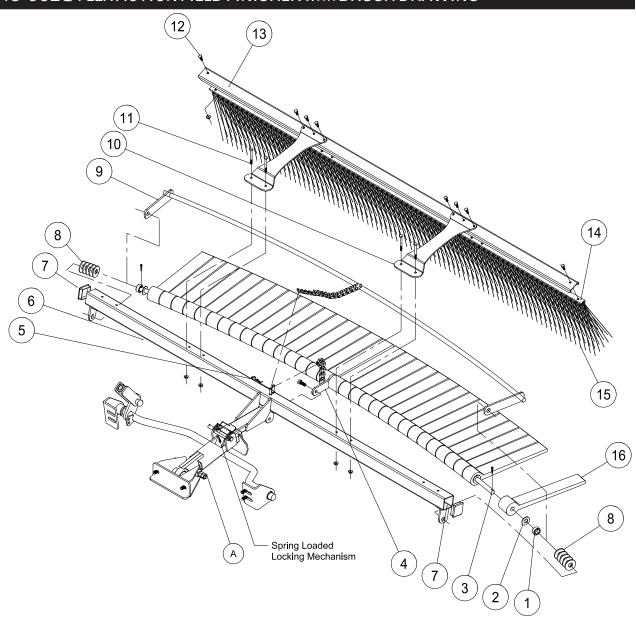

## *INSTALLATION INSTRUCTIONS*

The Professional Field Finisher is used for smoothing and leveling fields to professional standards.

- 1. Attach leveling screen (Ref 1) to drawbar (Ref 3) using two bolts (Ref 4) and center lock nuts (Ref 2).
- 2. Mount Professional Field Finisher to the hitch on the trap rake by sliding the drawbar into the quick hitch locking mechanism.
- 3. When Professional Field Finisher is attached, adjust bolts on hitch (Ref A) to hold Finisher in desired position.
- 4. **NOTE:** When assembled properly, rake will angle down from front to back. If front of finisher is not higher than the back, damage will result to infield.
- 5. When removing the attachment from machine. Push down on quick hitch locking mechanism and pull accessory out.

# 43-002 Q FLEX ACTION FIELD FINISHER WITH BRUSH DRAWING

#### 43-002Q FLEX ACTION FIELD FINISHER WITH BRUSH INSTRUCTIONS

#### ASSEMBLY INSTRUCTIONS

- 1. Install flail bar strap (Ref 4) to center of mounting bar (Ref 3) with chain on top of flail bar strap and mounting bar bent away from you. Apply a light coat of lubricant to overall length of mounting bar.
- 2. Install one rasp flail (Ref 16) with knobby side down adjacent to sides of flail bar strap. Now install a flat washer (Ref 2) so it sits adjacent with the outside of the rasp flail. Continue to install flails with knobby sides down with washers between until you have 16 flails and washers on each side of bar strap. Force all flails tightly toward bar strap.
- 3. After all 32 flails have been installed, place one spacer (Ref 1) to each end of mounting bar adjacent to washer.
- 4. Install leveler bar (Ref 9) to mounting bar, with curved leveler bar resting on top on the smooth sides of flails. If all flails and washers do not fit snugly at this time, remove leveler bar and install enough machine bushings to ensure a snug fit. Then reinstall leveler bar.
- 5. Lay the frame (Ref 6) on the floor or bench with welded tabs facing up. Install ends of assembled mounting bar, with knobby sides of flails up, into welded tabs on each end of frame and secure with 1/8 x 1 cotter pin.
- 6. Install flail bar strap (Ref 4) to center tab on frame with 3/8 -16 x 1 bolt and 3/8 -16 center lock nut. Loose fit is required. Do not over tighten.
- 7. Flip assembly over so knobby sides of flails are now facing down. Install hitch to frame with clevis pin (Ref 3) and cotter pin (Ref 24). The hitch should be attached to the frame as shown.
- 8. Install bar strap chain over welded pin on frame. Install leveler bar chain on to pin and secure in place with bridge pin. Use last bridge pin and clevis pin to hitch field finisher to your machine.

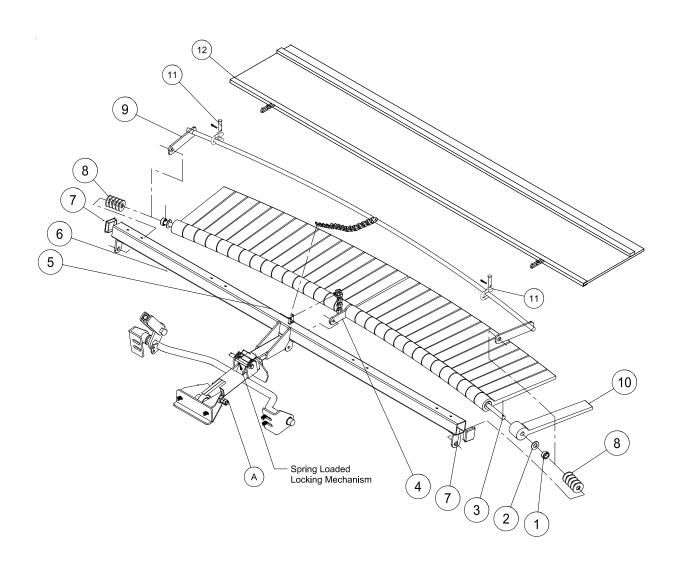

#### OPERATING INSTRUCTIONS

Running attachment with all flails down, flat on the surface, will provide a leveling function. Running attachment partially raised and flails at a 20° - 40° angle in relation to the level surface, will provide a finishing function. The flails increase down pressure for desired finish. Drive in wide circular patterns and increase or decrease ground speed to achieve desired finish.

#### **BRUSH ASSEMBLY**

- 1. Place the brush (Ref 15) into the brush track (Ref 14). Place the brush channel (Ref 13) between the brush track and the mounting brackets. Now bolt the mounting brackets (Ref 10) to the brush track using the  $^{1}/_{4}$  20 x  $^{3}/_{4}$  bolts and  $^{1}/_{4}$ -20 flange whiz-lock nuts (Ref 12).
- 2. Mount the brush assembly to the frame using the (4)  $^{1}/_{4}$ -20 x  $2^{1}/_{2}$  bolts and  $^{1}/_{4}$ -20 flange whiz-lock nuts (Ref 11).

# 26-008QFLEX ACTION FIELD FINISHER DRAWING

	HNFL-14-20	Flange Whiz-Lock Nut, 1/4 - 20	4

## INSTALLATION INSTRUCTIONS

- 1. Remove the mesh finisher from your unit, it will not be used with the brush.
- 2. Place the brush (Ref 1) into the brush track (Ref 2). Place the brush channel (Ref 4) between the brush track and the mounting brackets (Ref 5). Now bolt the mounting brackets (Ref 5) to the brush track using the  $^{1}/_{4}$  20 x  $^{3}/_{4}$ " bolts and  $^{1}/_{4}$  20 flange whiz-lock nuts (Ref 3).
- 3. Four holes need to be drilled into the frame of the Flex Action Finisher to mount the brush. Drill two  $\emptyset^9/_{32}$  holes 23" in from each end and 3" apart (see Reference drawing).
- 4. Mount the brush assembly to the frame using the four  $^{1}/_{4}$  20 x  $2^{1}/_{2}$ " bolts and  $^{1}/_{4}$  20 flange whiz-lock nuts (Ref 5).

# 43-008 DRAG MAT DRAWING

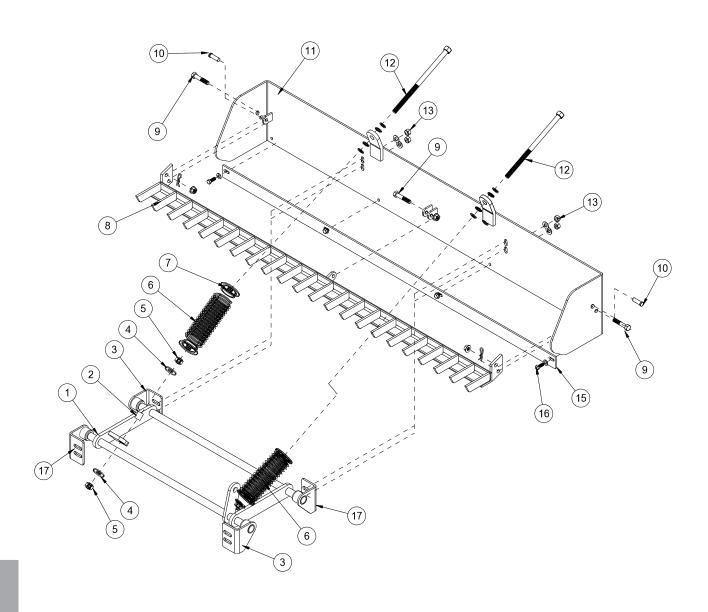

## 43-008 DRAG MAT PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	HB-716-14-125	Bolt, 7/16 - 14 x 1-1/4	4
	HW-716	Washer, 7/16	4

	HHP-18	Bridge Pin, 1/8	1
4	19-601	Steel Drag Mat	1
5	13-752	Left Carrier Mount	1

## *INSTRUCTIONS*

- 1. The Drag Mat Kit can be installed on all Super Star with or without the optional Roll Bars.
- 2. Remove the two insides bolts from the roll bar mounts. Install the flat washers and secure right and left carrier mounts on opposite sides. Tighten all hardware.
- 3. Install the tow hitch insert into the quick hitch. This is where the tow chain on the drag mat attaches to the machine.

#### ADJUSTMENTS AND OPERATION INSTRUCTIONS

#### **ADJUSTMENT**

The springs are preset for maximum down pressure, and should not need to be adjusted. If you feel the need to adjust the springs please call for further instructions. The unit comes pre-adjusted for most models. The four adjustment holes on the hitch are for making sure all three rollers are touching the ground at the same pressure. When installing roller system start with the lower mounting holes on hitch.

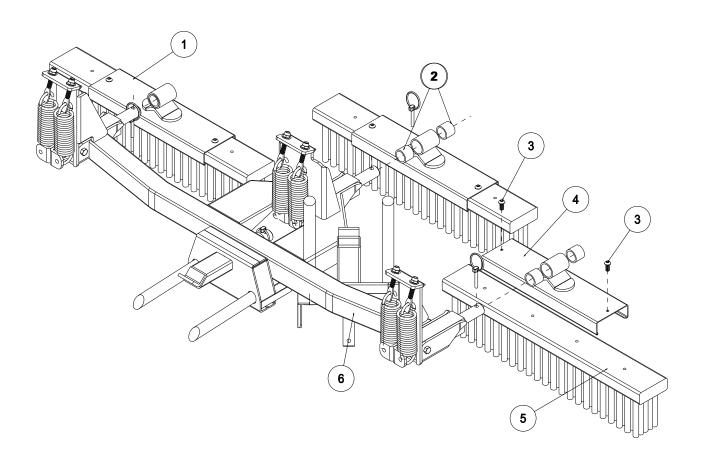

Tire pressure should be 4 psi in the front and 7 psi in the rear tire for best traction.

#### **OPERATION**

Make sure the rolling system has been installed and adjusted properly for your model of bunker rake. Always transport in fully raised position. Always remove flag pole before rolling green. Do not stop on green while rolling. Do not roll up steep slopes or loss of traction may result. Do not turn while rolling.

To begin rolling, lower unit all the way down as you come across collar and continue straight across green until reaching other collar and raise as you come off of green. Overlap stripes the same as if you were mowing.

## 42-585 GREEN STAR RBS BRUSH SET (3) PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	42-539	Lynch Pin <sup>5</sup> / <sub>16</sub> (part of main frame)	4
2	18-295	Oilite Bushing (part of 42-579)	6

4	42-579	Brush Bracket	3
5	42-545	Brush Head	3
6	42-586Q	Green Star RBS Main Frame	1

## ADJUSTMENTS AND OPERATION INSTRUCTIONS

#### **ADJUSTMENT**

The springs are preset for maximum down pressure, and should not need to be adjusted. If you feel the need to adjust the springs please call for further instructions. The unit comes pre-adjusted for most models. The four adjustment holes on the hitch are for making sure all three brushes are touching the ground at the same pressure. When installing brush system start with the lower mounting holes on hitch.

Tire pressure should be 4 psi in the front and 7 psi in the rear tire for best traction.

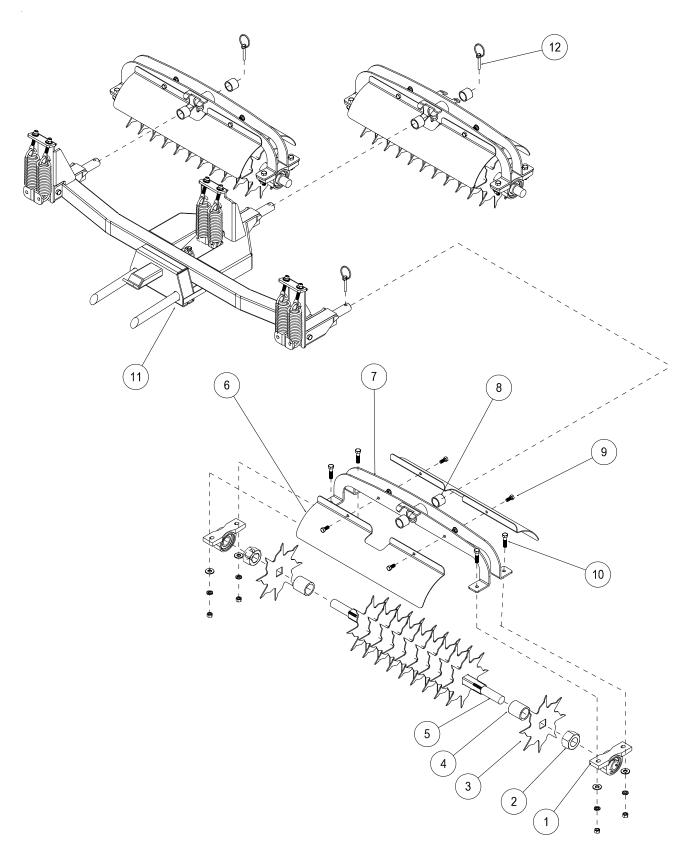

#### **OPERATION**

Make sure the brush system has been installed and adjusted properly for your model of bunker rake. Always transport in fully raised position. Always remove flag pole before brushing green. Do not stop on green while brushing. Do not brush up steep slopes or loss of traction may result. Do not turn while brushing.

For drag brushes use hydraulics to control the amount of down pressure required to move your top dressing material. We recommend reversing drag brushes after each use for even wear. To begin brushing, lower unit as you come across collar and continue straight across green until reaching other collar and raise as you come off of green. Overlap stripes the same as if you were mowing.

# 42-582 GREEN STAR RBS SPIKER SET (3) DRAWING

## ADJUSTMENTS AND OPERATION INSTRUCTIONS

#### **ADJUSTMENT**

The springs are preset for maximum down pressure, and should not need to be adjusted. If you feel the need to adjust the springs please call for further instructions. The unit comes pre-adjusted for most models. The four adjustment holes on the hitch are for making sure all three spikers are touching the ground at the same pressure. When installing spiker system start with the lower mounting holes on hitch.

Tire pressure should be 4 psi in the front and 7 psi in the rear tire for best traction.

#### **OPERATION**

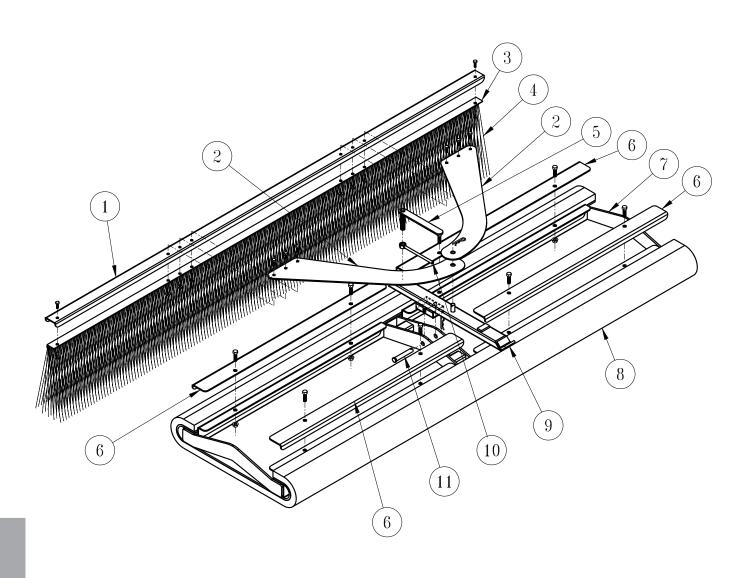

Make sure the spiker system has been installed and adjusted properly for your model of bunker rake. Always transport in fully raised position. Always remove flag pole before spiking green. Do not stop on green while spiking. Do not spike up steep slopes or loss of traction may result. Do not turn while spiking.

To begin spiking, lower unit all the way down as you come across collar and continue straight across green until reaching other collar and raise as you come off of green. Overlap stripes the same as if you were mowing.

#### INSTALLATION

Spiker blades must be installed so that the jagged side of the tooth cuts into the turf first. This allows only a piercing of the turf, whereas if the straight edge of the spiker blades enters first it will act more as a cutting effect

### 72" COCO MAT FINISHER PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	13-688	Brush Channel	1
	HB-14-20-075	Hex Bolt, <sup>1</sup> / <sub>4</sub> - 20 x <sup>3</sup> / <sub>4</sub>	2
	HNFL-14-20	Flange Lock Nut, 1/4 - 20	2
2	43-168	Brush Mount Arm	2
	HB-14-20-075	Hex Bolt, <sup>1</sup> / <sub>4</sub> - 20 x <sup>3</sup> / <sub>4</sub>	6
	HNFL-14-20	Flange Lock Nut, 1/4 - 20	6
3	13-683	Brush Track	1
4	13-682	Brush, 77 x 11	1
5	43-164	Adjustment Handle	1
6	43-166	Mat Clamp	4
	HB-38-16-125	Hex Bolt, <sup>3</sup> / <sub>8</sub> - 16 x 1 <sup>1</sup> / <sub>4</sub>	8
	HNFL-38-16	Flange Lock Nut, 3/8 - 16 x 11/4	8
7	43-165	Frame	1
8	43-167	CoCo Mat, 27 x 72	1
9	43-162	Draw Bar	1
	HHP-18	Bridge Pin, <sup>1</sup> / <sub>8</sub>	1
10	43-163	Lock Handle	1
11	HCP-12-300	Clevis Pin, <sup>1</sup> / <sub>2</sub> x 3	1
	HHP-18	Bridge Pin, <sup>1</sup> / <sub>8</sub>	1

Some components of your CoCo Mat Finisher have been assembled at the factory for your convenience.

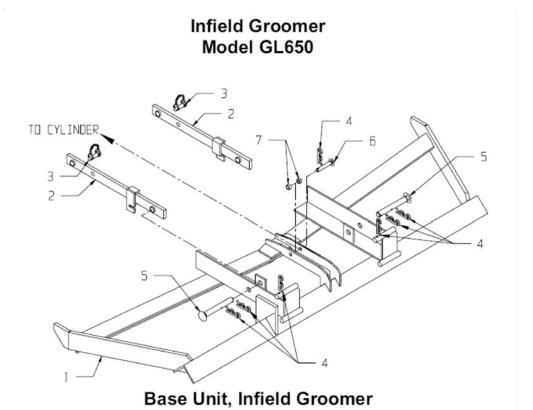

- 1. Start by mounting the Drawbar (Ref 9) to the Frame (Ref 7) using the Clevis Pin and Bridge Pin (Ref 11). Position the Drawbar, using either set of holes, as illustrated.
- 2. Next, mount the Brush assembly (Ref 1, 3 & 4) to the Brush Mount Arms (Ref 2), as illustrated, using the (6) <sup>1</sup>/<sub>4</sub> 20 x <sup>3</sup>/<sub>4</sub> Hex Bolts and <sup>1</sup>/<sub>4</sub> 20 Flange Lock Nuts. Secure fasteners tight.
- 3. The holes on each of the Brush Mount Arms will line up. Mount to the pin on the Drawbar (Ref 9) and secure using the remaining Bridge Pin.
- 4. Thread the Lock Handle (Ref 10) on to the Adjustment Handle (Ref 5). Thread the Adjustment Handle into the nut on top of the Drawbar (Ref 9), continuing until the threaded rod is through the Drawbar tube. Turn the Lock Handle clockwise (\*\mathcal{O}\*) to lock the Adjustment handle in place.

#### Adjusting the CoCo Mat Finisher.

Adjusting the leading edge (front) will affect the performance of the *Finisher*. Various field compositions and conditions can benefit from fine tuning of the *Finisher's* leading edge angle.

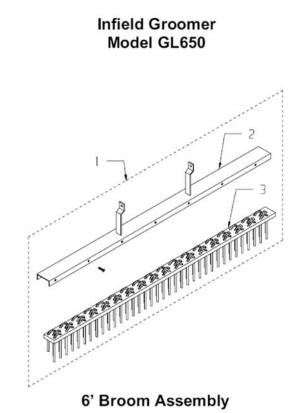

- 1. Release the Lock Handle (Ref 10) by holding the Adjustment Handle (Ref 5) and turning the Lock Handle counterclockwise ( $\circlearrowleft$ ).
- 2. To raise the leading edge (front) of the *Finisher*, turn the Adjustment Handle clockwise (U). When you obtain your desired position, turn the Lock Handle clockwise (U) to lock the Adjustment handle in place.
- 3. To lower the leading edge (front) of the *Finisher*, turn the Adjustment Handle counterclockwise (ひ). When you obtain your desired position, turn the Lock Handle clockwise (ひ) to lock the Adjustment handle in place.

## 43-170 RAHN GROOMER

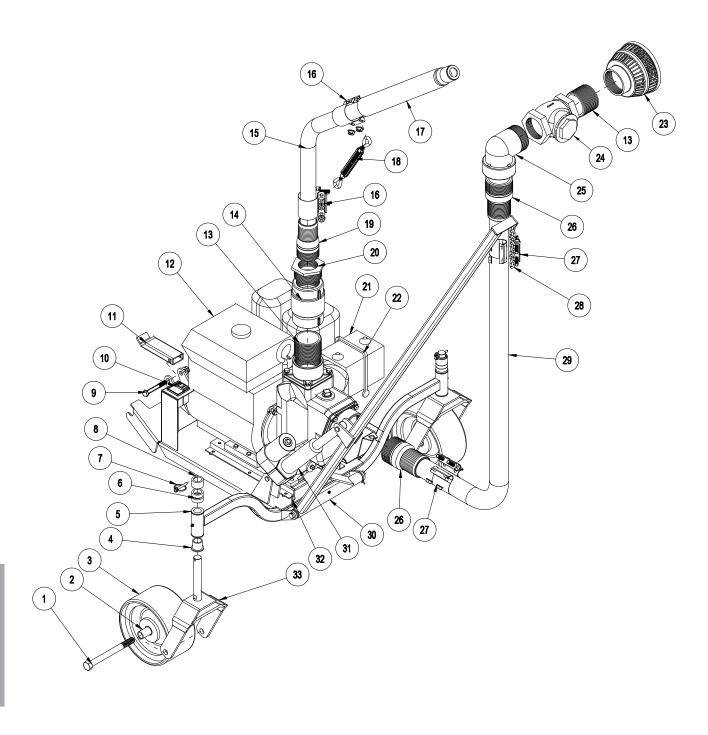

Picture #1

Picture #2

#### SMITHCO QUICK ATTACH MOUNTING INSTRUCTIONS

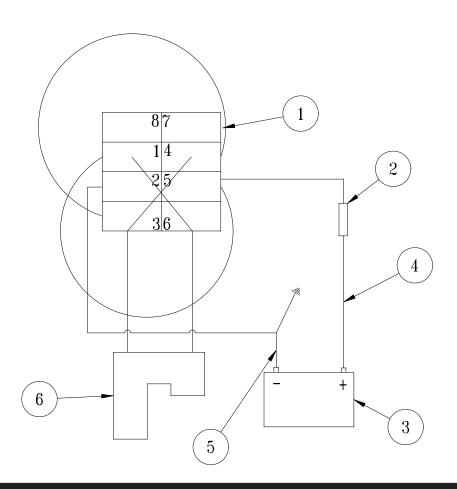

- 1. INSTALL RAHN CENTER LIFT ASSEMBLY INTO THE SMITHCO QUICK ATTACH MOUNTING SLOT UNTIL IT ENGAGES WITH THE SPRING ASSISTED STOP. MAKE SURE THE 3/4" RODS ARE BELOW THE QUICK ATTACH CROSS MEMBER. (PICTURE #1)
- 2. INSTALL THE RAHN PULL ARM BRACKETS (LEFT & RIGHT) ON TOP OF THE BRACKETS USED FOR THE QUICK ATTACH SYSTEM USING THE HARDWARE PROVIDED. WHEN INSTALLING THE BRACKETS, THE BOLT HOLES ARE LOCATED TOWARD THE WHEELS AND THE EARS OF THE BRACKET ARE TO THE INSIDE.
- 3. REMOVE CLEVIS PIN IN THE ROD END OF THE CYLINDER. INSTALL CYLINDER MOUNT EX-TENDER OVER EXISTING EAR ON CROSS MEMBER. TIGHTEN BOLT AND REPLACE PIN. (PICTURE #2)

# READ ENGINE MANUAL PRIOR TO STARTING THIS MACHINE. Machine is shipped with NO OIL in engine. Fill Engine with oil as suggested in Engine Manual.

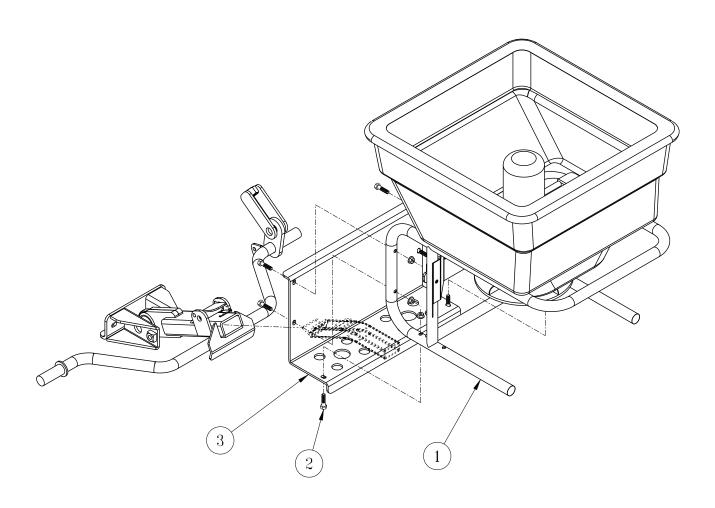

- 1. You must prime pump before starting the engine. To do so, insert garden hose in Discharge Tube and fill system to full. Full is when you see water in both suction hoses.
- 2. Fill engine up with 4-stroke motor oil as advised in the engine manual.
- 3. Install a U-1 300 Amp Battery into the battery box on the right side of the engine. Connect battery cables and strap battery into place.
- 4. Make yourself familiar with engine controls located on the engine by reading the Engine Owner's Manual.
- 5. Once the pump is primed, battery installed, and the engine oil is filled you may hook the Typhoon up to the Super Star Bunker Rake.
- 6. The Typhoon is equipped with a quick hitch attachment. Insert quick hitch bar into hitch on Super Star and lock in place with lock pin.
- 7. There are 1/2" and 1" spacers on the castor wheels that can be arranged in any combination to achieve the desired height. Please keep both side adjusted the same.
- 8. Transport the Typhoon to the water hole that needs to be siphoned. Back Typhoon to edge of water.
- 9. Using the rocker switch on the left side of the engine, lower the boom and suction screen into the water.
- 10. Stand clear of the discharge tube. Make sure the discharge tube is pointing in a direction that is free of bystanders and buildings.
- 11. Start engine. There will be immediate water discharge from the discharge tube. There is a swivel tube that allows you to turn the discharge in any direction you desire. There is also a turnbuckle that can be lengthened to give a longer flow or shortened for a closer distance. For best performance keep hand on discharge tube to prevent it from straying.
- 12. When water is siphoned, shut off engine, leaving water in the pump and discharge hose, so you do not run the pump dry.

#### DO NOT RUN THE PUMP DRY!

13. Using the rocker switch, raise boom out of the water hole.

Rear Attachment

## 41-50212V BROADCAST SPREADER PARTS LIST

REF#	PART#	DESCRIPTION	QUANTITY
1	41-533	12V Earthway Spreader, Model M40	1
2	HB-516-18-125	Hex Bolt, $\frac{5}{16}$ - 18 x 1 $\frac{1}{4}$	6
	HNFL-516-18	Flange Whiz-Loc Nut, <sup>5</sup> / <sub>16</sub> - 18	6
3	41-534	Spreader Mount	1

## *INSTALLATION INSTRUCTIONS*

The 12 Volt Broadcast Spreader is great option for your seeding and fertilizing needs.

- 1. Using the six(6)  $\frac{5}{16}$  18 x  $\frac{11}{4}$  Hex Bolts and Whiz-Loc nuts (Ref 2) mount the Spreader (Ref 1) to the Spreader Mount (Ref 3). Tighten all hardware.
- 2. Connect to the Quick Hitch Receiver on your **5MITHCO** machine.
- 3. Connect the wires to the battery according to the directions given in the Earthway Spreader manual.
- 4. Refer to the manual that came with the Earthway Spreader for operation instructions and to determine your desire spreading rate.

For replacement parts for the Spreader, refer to the Earthway Spreader manual.

#### The Smithco Commercial Products Two-Year Limited Warranty

#### The Smithco Commercial Products Two-Year Limited Warranty

Smithco, Inc. (Smithco) warrants your 2016 or newer Smithco Commercial Product ("Product") purchased after October 1, 2016 to be free from defects in materials or workmanship for the period of time listed below. Where a warrantable condition exists, Smithco will repair the Product at no cost to you including diagnosis, labor (at the Smithco standard labor rate, subject to the Smithco flat rate schedule), and parts.

#### **Warranty Duration is:**

- (1) Two years, 1500 operational hours\* from the date of delivery to the original purchaser or Five years from the date of original manufacturer of the product, whichever occurs first. (\*Products equipped with hour meter).
- (2) Products used in rental situations are covered for 90 days from date of delivery to original user/renter.

#### **Owner Responsibilities:**

As the Product owner, you are responsible for required maintenance and adjustments stated in your Owner's Manual. Failure to perform required maintenance and adjustments can be grounds for disallowing a warranty claim. You are particularly responsible to train all present and future operators of this product on the safe operation of this product at your location.

#### **Instructions for Obtaining Warranty Service:**

You are responsible for notifying the Authorized Smithco Products Distributor from whom you purchased the Product as soon as you believe a warrantable condition exists and not later than 30 days from discovery of the condition.

If you need help locating an Authorized Smithco Distributor, or if you have questions regarding your warranty rights or responsibilities, you may contact us at:

Smithco Product Support Department 200 West Poplar Ave.
Cameron, Wisconsin 54822

Telephone: 800-891-9435 E-Mail: ProductSupport@Smithco.com

#### **Maintenance Parts:**

Parts scheduled for replacement as required maintenance ("Maintenance Parts"), are warranted for the period of time up to the scheduled replacement time for that part.

#### **Items/Conditions Not Covered:**

Not all product failures or malfunctions that occur during the warranty period are defects in materials or workmanship. The items/conditions listed below are not covered by this warranty:

Product failures which result from the use of non-Smithco replacement parts, or from installation and use of add-on, modified, or unapproved accessories are not covered.

Product failures which result from failure to perform required maintenance and/or adjustments are not covered

Product failures that result from operating the Product in an abusive, negligent or reckless manner are not covered.

This warranty does not apply to parts subject to consumption through use, unless found to be defective. Examples of parts which are consumed, or used up, during normal Product operation include, but are not limited to: blades, tines, teeth, scarifiers, rakes, plates, wear plates, castor wheels, tires, batteries, filters, belts, nozzles, etc.

This warranty does not apply to failures caused by outside influence. Items considered to be outside influence include, but are not limited to, weather, storage practices, contamination, use of unapproved coolants, lubricants, additives, or chemicals, etc.

This warranty does not apply to normal "wear and tear" items. Normal "Wear and Tear" includes, but is not limited to, damage to seats due to wear or abrasion, worn painted surfaces, scratched decals or windows, etc.

Smithco may require the return of failed parts or components in order to determine the validity of any warranty claim.

Smithco will not be obligated to replace components of other manufacturers if inspection by the original component manufacturer indicates that failure was due to normal wear and tear, expected consumption through use or improper care or service.

#### Other Legal Disclaimers:

The above remedy for product defects through repair or replacement by an authorized Smithco distributor or dealer is the purchaser's sole remedy for any defect. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

THERE ARE NO OTHER EXPRESS WARRANTIES OTHER THAN THOSE SET FORTH ABOVE. ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR USE ARE LIMITED TO THE DURATION OF THE LIMITED WARRANTIES CONTAINED HEREIN.

Some states may not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

THE SMITHCO COMPANY IS NOT LIABLE FOR INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH THE USE OF THE PRODUCT, INCLUDING ANY COST OR EXPENSE OF PROVIDING A SUBSTITUTE PRODUCT OR SERVICE DURING PERIODS OF MALFUNCTION OR NON-USE.

Some states may not allow the exclusion of indirect, incidental or consequential damages, so the above exclusion may not apply to you.
