Warranty .....

Thank you for purchasing a **Smithco** product.

Read this manual and all other manuals pertaining to the Spray Star 3180 carefully as they contain safety, operating, assembly and maintenance instructions. Failure to do so could result in personal injury or equipment damage.

Keep manuals in a safe place after operator and maintenance personnel have read them. Right and left sides are from the operator's seat, facing forward.

## **WARNING:**

Engine exhaust and some of its constituents are known to the State of California to cause cancer, birth defects, and other reproductive harm.

For more information visit

www.P65Warning.ca.gov

### WARNING

Failure to follow cautious operating practices can result in serious injury to the operator or other persons.
The owner must understand these instructions, and must allow only trained persons who understand these instructions to operate this vehicle.

All **Smithco** machines have a Serial Number and Model Number. Both numbers are needed when ordering parts. Refer to engine manual for placement of engine serial number.

For product and accessory information, help finding a dealer, or to register your product please contact us at www.Smithco.com.

Information needed when ordering replacement parts:

- 1. Model Number of machine
- 2. Serial Number of machine
- 3. Name and Part Number of part
- 4. Quantity of parts

For easy access record your Serial and Model numbers here.

## **SAFE PRACTICES**

- 1. It is your responsibility to read this manual and all publications associated with this machine.
- 2. Never allow anyone to operate or service the machine or its optional equipment without proper training and instructions. Never allow minors to operate any equipment.
- 3. Learn the proper use of the machine, the location and purpose of all the controls and gauges before you operate the equipment. Working with unfamiliar equipment can lead to accidents.
- 4. Wear all the necessary protective clothing and personal safety devises to protect your head, eyes, ears, hands and feet. Operate the machine only in daylight or in good artificial light.
- 5. Inspect the area where the equipment will be used. Pick up all debris you can find before operating. Beware of overhead obstructions and underground obstacles. Stay alert for hidden hazards.
- 6. Never operate equipment that is not in perfect working order or without decals, guards, shields, or other protective devices in place.
- 7. Never disconnect or bypass any switch.
- 8. Carbon monoxide in the exhaust fumes can be fatal when inhaled, never operate a machine without proper ventilation.
- 9. Fuel is highly flammable, handle with care.
- 10. Keep engine clean. Allow the engine to cool before storing and always remove the ignition key.
- 11. Disengage all drives and set park brake before starting the engine.
- 12. Never use your hands to search for oil leaks. Hydraulic fluid under pressure can penetrate the skin and cause serious injury.
- 13. This machine demands your attention. To prevent loss of control or tipping of the vehicle:
  - A. Use extra caution in backing up the vehicle. Ensure area is clear.
  - B. Do not stop or start suddenly on any slope.
  - C. Reduce speed on slopes and in sharp turns. Use caution when changing directions on slopes.
  - D. Stay alert for holes in the terrain and other hidden hazards.
- 14. Before leaving operator's position:
  - A. Disengage all drives.
  - B. Set park brake.
  - C. Shut engine off and remove the ignition key.
  - D. If engine has to run to perform any maintenance keep hands, feet, clothing and all other parts of body away from moving parts.
- 15. Keep hands, feet and clothing away from moving parts. Wait for all movement to stop before you clean, adjust or service the machine.
- 16. Keep the area of operation clear of all bystanders.
- 17. Stop engine before making repairs/adjustments or checking/adding oil to the crankcase.
- 18. Use parts and materials supplied by **Smithco** only. Do not modify any function or part.
- 19. Use caution when booms are down as they extend out beyond the center line of the machine.
- 20. The tank is a confined space, take precaution.

These machines are intended for professional maintenance on golf courses, sports turf, and any other area maintained turf and related trails, paths and lots. No guaranty as to the suitability for any task is expressed or implied.

## **SPECIFICATIONS SPRAY STAR 3180**

#### **WEIGHTS AND DIMENSIONS**

Length 128" (3.3m) Width 72" (1.8m)

Width w/ Booms Open 20' - 260" (6.6m) 18' - 240" (6.1m)

Height w/ ROPS 84" (2.1m)

Height w/ Booms Folded 20' - 136" (3.5m) 18' - 110"(2.8m)

Wheel Base 68" (1.7m)

Weight Empty 2340 lbs (1061 kg) Weight Full 4950 lbs (2245 kg)

**SOUND LEVEL (DBA)** 

At ear level 88.4 dBA At 30 ft. (9.14 m) 77 dBA

**ENGINE** 

 Make
 Kubota

 Model#
 V1505

 Code / Spec#
 1G994-0000

 Horsepower
 35.5 hp (26.6 kW)

Fuel (EMISSIONS) No.1-D or No. 2-D, S500: Low Sulfur Diesel (LSD) less than 500 ppm or 0.05 wt.%

No1-D or No.2-D, S15: Ultra Low Sulfur Diesel (ULSD) less than 15 ppm or 0.0015 wt.%

Cooling System Liquid Cooled Lubrication System Full Pressure Alternator 40 Amp

**WHEELS & TIRE** Front: Two 22 x 11.00 x 10 Turf; 20 psi (1.4 bar)

Rear: Two 29 x 14.00 x 15 Multi-Trac; 30 psi (2.0 bar)

**SPEED** 

Infinitely Variable 0-10 m.p.h. (0-18 kph)

**BATTERY** Automotive type 24F - 12 volt

BCI Group Size 24
Cold Cranking Amps 900 minimum
Ground Terminal Polarity Negative (-)
Maximum Length 10.25" (26 cm)
Maximum Width 6.88" (17 cm)
Maximum Height 10" (25 cm)

**FLUID CAPACITY** 

Crankcase Oil See Engine Manual
Fuel 12 gallon (54.5 liters)
Hydraulic Fluid 10 gallon (37.8 liters)
Radiator 1.06 gallons (4 liters)

Grade of Hydraulic Fluid SAE 10W-40 API Service SJ or higher Motor Oil

## **OPTIONAL EQUIPMENT**

| 15-618 | Water Meter Kit                   | 30-009 | Manual Hose Reel      |
|--------|-----------------------------------|--------|-----------------------|
| 17-585 | 18' HD Super Boom                 | 30-010 | Electric Hose Reel    |
| 17-580 | 20' HD Super Boom                 | 30-004 | Foam Marker           |
| 30-006 | Fresh Water Tank                  | 15-835 | Tank Rinse System     |
| 30-007 | Chemical Cleanload Safe Fill      | 15-850 | Sunshade Canopy       |
| 31-004 | All Weather Top                   | 14-515 | Water Meter Kit (Gal) |
| 17-590 | Lazer-Beam Auto Boom for HD Booms | 30-140 | Electric Wash Tank    |

## MAINTENANCE

Before servicing or making adjustments to machine, stop engine and remove key from ignition.

Use all procedures and parts prescribed by the manufacturer's. Read the engine manual before operation.

#### **LUBRICATION**

Use No. 2 General purpose lithium base grease and lubricate every 100 hours. The Spray Star 3180 has 7 grease fittings.

- A. One on the rod end of hydraulic cylinder.
- B. One on each the right and left spindles.
- C. One on the center front pivot.
- D. One on the idler arm.
- E. One on each of the pedal relays.

#### **ELECTRICAL CONNECTIONS**

Use dielectric grease on all electrical connections.

#### **AIR CLEANER ON ENGINE**

Since the air cleaner on this engine is a dry type, never apply oil to it.

1. Open evacuator valve (see engine manual) once a week to remove large particles of dust and dirt.

Ε

- 2. Wipe the inside of the air cleaner with a cloth if it gets wet or dirty.
- 3. Avoid touching the element except when cleaning.
- 4. When dust adheres to the element, gently tap element on flat surface.
- 5. When carbon or oil adheres to the element clean according to engine manual.
- 6. Replace the element every year or every 6 months.
- 7. IMPORTANT Make sure wing bolt for the element is tight enough. If it is loose, dust and dirt may be sucked in, wearing down the cylinder liner and piston ring, resulting in poor power output.

Do not use petroleum solvents, e.g.., kerosene, which will cause cartridge to deteriorate. Do not use pressurized air to clean cartridge. Pressurized air can damage cartridge.

В

#### FUEL

#### **CHECK EMISSION REGULATIONS OF YOUR AREA**

With Emission control now in effect diesel fuel specification type and sulfur content % (ppm) used must be in compliant with all applicable emission regulations for the area in which the engine is operated.

Use of diesel fuel with sulfur content less than 0.10% (1000 ppm) is strongly recommended.

If high sulfur fuel is used, change oil and oil filters twice as often.

DO NOT USE Fuels that have sulfur content greater than 1.0% (10000 ppm).

Diesel fuels specified in EN 590 or ASTM D975 are recommended.

Since KUBOTA diesel engines of less than 56kW (75 hp) utilize EPA Tire 4 and Interim Tier 4 Standards, the use of low sulfur fuel or ultra low sulfur fuel is mandatory for these engines, when operated in US EPA regulated areas. Therefore, use No.2-D S500 or S15 diesel fuel as a alternative toe No. 2-D for ambient temperatures below -10°C (14° F).

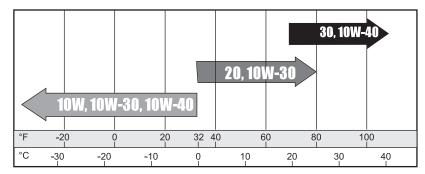

#### **ENGINE OIL**

With strict emission control regulations now in effect, the CF-4 and CG-4 engine oils have been developed for use with low sulfur fuels, for On-Highway vehicle engines. When Non-Road engines run on high sulfur fuel, it is advisable to use a "CF or better" classification engine oil with Total Base Number (a minimum TBN of 10 is recommended).

Check the engine oil before starting or more than 5 minutes after stopping the engine. If oil level is low, remove oil filler plug and add new oil to the prescribed level. Do not overfill.

| O= Recommended        | X= Not Rec | ommended |
|-----------------------|------------|----------|
| Lubricating Oil Class | Fı         | ıel      |
| CF-4                  | 0          | Х        |
| CG-4                  | 0          | Х        |

Engine oil should be MIL-L2104C or have properties of API Classifications CD grades or higher. Change the type of Engine oil according to the ambient temperature.

Starting Temperature Range Anticipated Before Next Oil Change

#### **HYDRAULIC OIL**

- 1. Use SAE 10W-40 API Service SJ or higher motor oil.
- 2. For proper warranty, change oil the first 50 hours and then every 500 hours or annually, which ever is first.
- 3. Oil level should be 2-2½" (5-6.4cm) from top of the tank when fluid is cold. Do not overfill.
- 4. After changing oil, run the machine for a few minutes. Check oil level and for leaks.
- 5. Always use extreme caution when filling hydraulic oil tank or checking level to keep system free of contaminants. Check and service more frequently when operating in extremely cold, hot or dusty conditions.
- 6. If the natural color of the fluid has become black or smells burnt, it is possible that an overheating problem exists.
- 7. If fluid becomes milky, water contamination may be a problem.
- 8. If either of the above conditions happen, change oil immediately after fluid is cool and find the cause. Take fluid level readings when the system is cold.
- 9. In extreme temperatures you can use straight weight oil. We recommend SAE 30W API Service SG when hot (above 90°F (33°C)) and SAE 10W API Service SJ or higher when cold (below 32°F (0°C) ambient temperature. Use either motor oil or hydraulic oil, but do not mix.
- 10. Oil being added to the system must be the same as what is already in the tank. Mark the tank fill area as to which type you put in.

#### **TIRE PRESSURE**

Caution must be used when inflating a low tire to recommended pressure. Over inflating can cause tires to explode. Front tires should be 20 psi (1.4bar) and rear tires should be 30 psi (2.0bar). Improper inflation will reduce tire life considerably.

## MAINTENANCE

#### **BATTERY**

Batteries normally produce explosive gases which can cause personal injury. Do not allow flames, sparks or any ignited object to come near the battery. When charging or working near battery, always shield your eyes and always provide proper ventilation.

Battery cable should be disconnected before using "Fast Charge".

Charge battery at 15 amps for 10 minutes or 7 amps for 30 minutes. Do not exceed the recommended charging rate. If electrolyte starts boiling over, decrease charging.

Always remove grounded (-) battery clamp first and replace it last. Avoid hazards by:

- 1. Filling batteries in well-ventilated areas.
- Wear eye protection and rubber gloves.
- 3. Avoid breathing fumes when electrolyte is added.
- 4. Avoid spilling or dripping electrolyte.

Battery Electrolyte is an acidic solution and should be handled with care. If electrolyte is splashed on any part of your body, flush all contact areas immediately with liberal amounts of water. Get medical attention immediately.

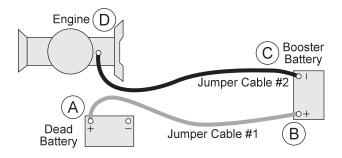

Use of booster battery and jumper cables. Particular care should be used when connecting a booster battery. Use proper polarity in order to prevent sparks.

#### TO JUMP START (NEGATIVE GROUNDED BATTERY):

- 1. Shield eyes.
- 2. Connect ends of one cable to positive (+) terminals of each battery, first (A) then (B).
- Connect one end of other cable to negative (-) terminal of "good" battery (C).
- Connect other end of cable (D) to engine block on unit being started (NOT to negative (-) terminal of battery)

To prevent damage to other electrical components on unit being started, make certain that engine is at idle speed before disconnecting jumper cables.

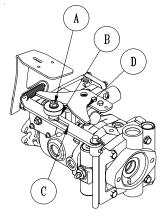

## WHEEL CREEP

#### WHEEL CREEF

"Creep" is when the engine is running and hydrostatic transmission is in neutral, but due to inadequate alignment, wheels still move. Do the following procedure to stop this motion.

- 1. Lift up and support machine so rear wheels are off the ground and can turn freely.
- 2. In the engine compartment, the hydrostatic pump is on the right side. The shift arm (D) is on top of the pump The idler arm (B) has a bearing that rides in the vee of the shift arm. Loosen bolt (A).
- 3. With engine running, move bearing (B) so it centers on the shift arm (D) and 'wheel creep' stops.
- Tighten all fasteners and test by using foot pedal linkage to see that 'creep' is removed.
- 5. Turn engine off and lower machine.

#### **SPRAY PUMP WITH BELT**

Located to the right of the engine. The belt should have approximately  $\frac{1}{2}$ " (13mm) of deflection in the center of the top strand.

#### **SAFETY INTERLOCK SWITCH**

To adjust the interlock switch on the back hydrostatic pump loosen the set screw on the front half of the switch, with the ignition switch OFF. With a continuity tester connected across the switch, it should light with the shift arm centered. Move the shift arm to the right or left and the light should go off. By turning the back half of the switch clockwise it will reduce the amount of travel on the shift arm that is required for the light to remain on. The light must be on ONLY with the shift arm centered.

#### **MASTER BOOM SWITCH (FOOT SWITCH)**

The master boom switch, located on the left floorboard is used to override the master switch on the computer console of the spray systems. By pushing down it will turn on/off the booms. For the TeeJet System the Master Switch on the computer **must be on** for the master boom control switch to work.

#### **GROUND SPEED CONTROL (FOOT SWITCH)**

The ground speed control does not work the same as an automotive type cruise. The ground speed control is located on the center floorboard and is used to lock forward speed.

#### TO ENGAGE:

- 1. Flip rocker switch 'On' (green light).
- 2. Obtain desired speed with foot pedal.
- 3. Step on foot switch to lock speed.
- 4. Push foot switch again to disengage.

#### **SPRAY BOSS CONTROL (ORANGE)**

Engages and disengages speed boss. Forward is engage and all the way back is disengage. When the lever is engaged it sets a stop for the accelerator. The accelerator pedal must be used to maintain this speed. To adjust speed use the knob on the end of the lever, counter clockwise increases speed and clockwise decreases speed. Disengage the lever and you will have full accelerator pedal range.

#### **BRAKE RELEASE**

Run machine at half-throttle minimum, prior to operating traction pedal. This will ensure proper brake release.

#### TOWING

Brake must be disengaged for towing. The brake disengage cover is located at the center of the Auburn wheel drive on the rear wheels. To disengage the brake, remove the disengage cover and assemble the disengage cover with the dimple center protruding inward. This will release the brake shaft. Road speeds must not exceed 20 MPH. Re-assemble the disengage cover back to its original way when done towing.

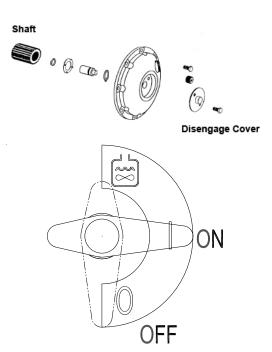

Machine is in free wheel mode when towing.

Machine has no braking capibilities when being towed.

#### **TANK AGITATION**

The valve to turn on and off the tank agitation is located on the front of the seat panel, drivers right hand side. Rotate valve handle down to shut off and rotate back up to turn on.

## **SERVICE CHART**

| <b>⚠</b> CAUTION |
|------------------|
|------------------|

Before servicing or making adjustments to the machine, stop engine, block wheels and remove key from ignition.

| A      | والمستورين والمستوين والمراجع والمتاريخ |  |
|--------|---|--|
| $\sim$ | IMPORTANT                               |  |
| 717    | IMPORTANT                               |  |
|        |   |  |

Follow all procedures and ONLY use parts prescribed by the manufacturer.

Read the engine manual before maintenance.

The suggested maintenance checklist is not offered as a replacement for the manufacturer's engine manual but as a supplement. You must adhere to the guidelines established by the manufacturer for warranty coverage. In adverse conditions such as dirt, mud or extreme temperatures, maintenance should be more frequent.

| ltem                              | Maintenance Procedure                                |
|-----------------------------------|--|
| After the first O an author have  | Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm)) |
| After the first 8 operating hours | Change the engine oil filter.                        |
|                                   | Check the engine oil level.                          |
|                                   | Clean area around muffler and controls.              |
|                                   | Check the hydraulic fluid level.                     |
| Before each use daily             | Check the tire pressure.                             |
|                                   | Check condition of hydraulic hoses and fittings.     |
|                                   | Check for oil or water leaks.                        |
|                                   | Proper function of glow lamp timer.                  |
| After the first 50 hours          | Change Hydraulic Oil Filter.                         |
|                                   | Change Engine oil and filter.                        |
|                                   | Clean or change air filter. <sup>1&amp;2</sup>       |
|                                   | Clean fuel filter element.¹                          |
| Every 100 hours                   | Lubricate machine.                                   |
|                                   | Check the battery fluid level and cable connections  |
|                                   | Check fan belt tension and damage.                   |
|                                   | Check radiator hoses and clamp bands.                |
|                                   | Change engine oil.¹                                  |
|                                   | Check idle speed.                                    |
| Every 200 hours                   | Replace oil filter cartridge.¹                       |
|                                   | Change hydraulic oil filter.¹                        |
|                                   | Check air intake line.¹                              |
|                                   | Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm)) |
| Every 500 hours or yearly         | Clean Water Jacket and radiator interior.            |
| Every 300 flours of yearry        | Replace fan belt.                                    |
| Every 800 hours                   | Check valve clearance.                               |
| Every 1500 hours                  | Check injection nozzle pressure.                     |
|                                   | Check turbo charger.                                 |
| Every 3000 hours                  | Check injection pump.                                |
|                                   | Check injection timing.                              |
|                                   | Change radiator coolant (L.L.C.)                     |
| Every 2 years                     | Replace radiator hoses and clamp bands.              |
| = 13. y 2 y 30.10                 | Replace fuel hoses and clamps.                       |
|                                   | Replace intake air lines.                            |

<sup>&</sup>lt;sup>1</sup> In dusty conditions or when airborne debris is present, clean more often.

<sup>&</sup>lt;sup>2</sup> Replace after every 6 times of cleaning

#### **↑** IMPORTANT

To prevent damage from freezing, pour window washer fluid into spray systems tank and operate pump to circulate mix through gun and hose back to tank. Open boom control to circulate through rest of spray

#### system.

- 1. Clean the exterior surfaces of the engine.
- 2. Change the oil and filter while the engine is still warm from operation.
- 3. Drain coolant from the radiator. Open cock at the bottom of the radiator, and remove the pressure cap to drain water completely. Leave the cock open. Hang a not written "No Water" on the pressure cap. Since water freezes when temperature drops below 0°C (32° F) it is important that no water is left in the machine.
- 4. Remove battery from the engine, adjust the electrolyte level, and recharge it. Store battery in a dry dark place.
- 5. Store machine in a clean, dry place.

#### **EXTENDED STORAGE**

- 1. Check for any damaged parts or missing decals. Replace as needed.
- 2. Drain crankcase completely and refill with recommended engine oil or equivalent.
- 3. Lubricate all grease points.
- 4. Check coolant protection and level.
- 5. Clean exterior surface of engine.
- 6. Seal all openings in engine and accessories with non-hygroscopic material. Mask off all areas to be used for electrical contact.
- 7. Tape all openings and make sure all surfaces are dry. Then spray all taped openings, all engine accessories including ignition wiring, and all exterior surfaces of engine with Insulation Compound.
- 8. Disconnect, remove and clean battery. Check electrolyte level. Charge the battery and store in a cool dry place (NOT directly on cement).
- 9. Put blocks or stands under the machine to take weight off tires.

#### **AFTER STORAGE**

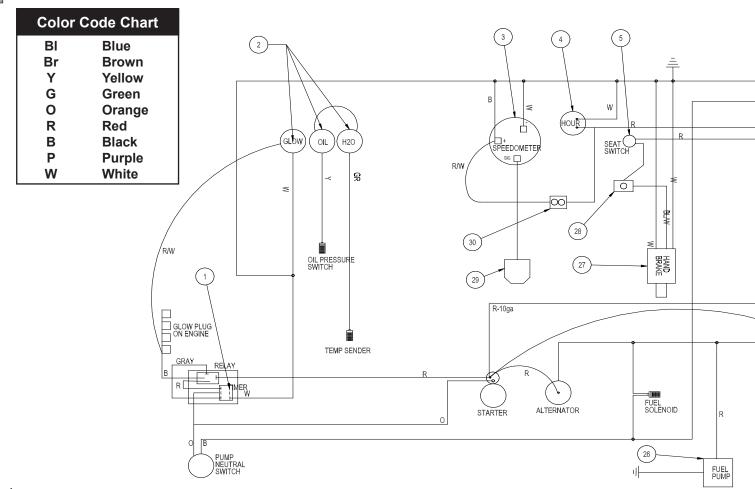

- 1. Check for any damaged parts or missing decals. Replace as needed.
- Lubricate all grease points.
- 3. Clean exterior surface of engine.
- 4. Remove all tape and obstructions from exterior engine surfaces.
- Charge and replace battery.
- 6. Check tire pressure.
- 7. Remove blocks or supports from under the machine.
- 8. Check engine oil level and coolant level and lubricate all grease points.
- 9. Fill fuel tank.
- 10. Check belt tension.
- 11. Run engine approximately 5 minutes before putting the engine under load.

### 3182 SYSTEM WIRING IRADION 81401

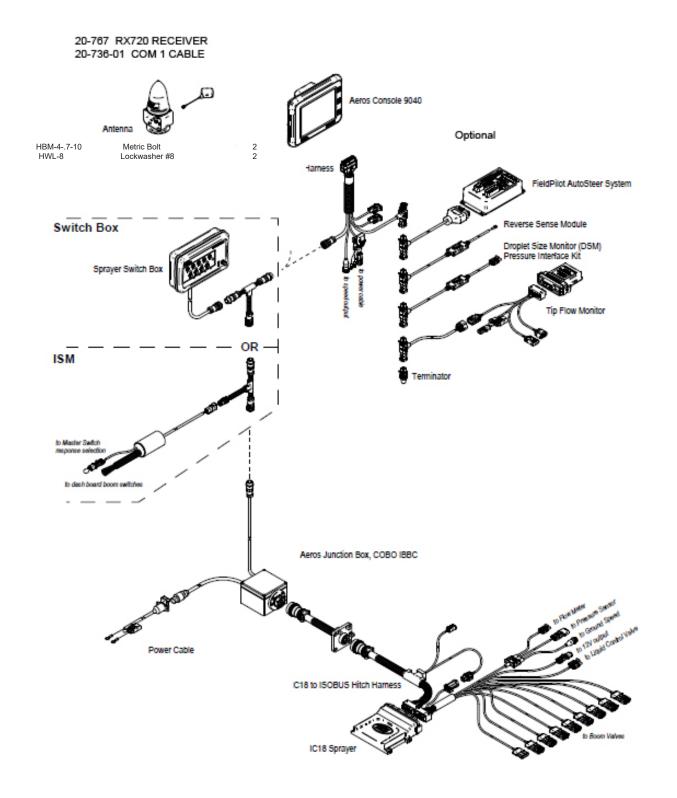

**MIMPORTANT** 

If using Simulated Speed with a Radion 8140, one needs to change back to Ground Speed for proper rate control when spraying.

Use Dielectric Grease On All Electrical Connections

### 3185/3186/3187/3188 WIRING TEEJET® DYNA JET SYSTEM

#### 16-524 MOTORIZED CONTROL VALVE DRAWING

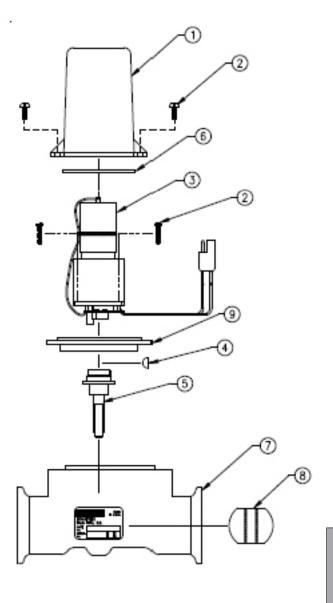

#### WHEN SERVICING VALVE:

Replace valve body with ISO-Body Kit if valve has been leaking internally.

Replace motor assembly if the motor will not run.

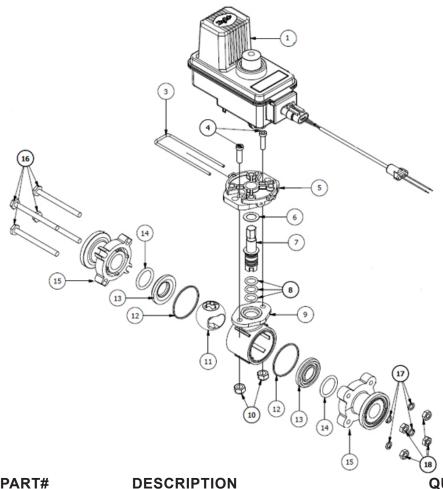

Before reassembling valve, remove the coupler shaft from the valve body. Apply Loctite to coupler shaft and woodruff key. Place the coupler shaft (Ref 5) and the woodruff key (Ref 4) onto the motor shaft. Plug motor into the valve connector coming from Sprayer Control Console. Check that the motor rotates in both directions. Motor must stop when coupler shaft CAM releases printed circuit board button.

When reassembling valve, grease both sealing surfaces of coupler shaft. Insert coupler shaft into Iso-flange and be sure seal properly seats on shaft. Install motor on valve body and apply silicon sealant to mounting holes. Reassemble remaining items as shown in parts diagram.

| 6    | 33-552 | Nozzle - Red (XR11004-VS)   | 1        |
| 7    | 33-554 | Nozzle - White (XR11008-VS) | 1        |
| 8    | 16-802 | Strainer                    | 3        |

Quantity is per nozzle body. For 20' booms multiply quantity by 12.

Quantity is per nozzle body. For 18' booms multiply quantity by 11.

Nozzles are located 20" (51 cm) apart on the right, left, and center tubes. Nozzles are 20" high off ground.

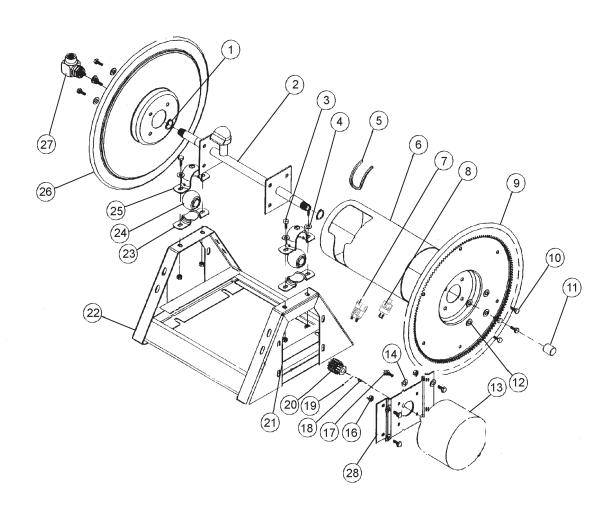

For reordering Nozzle Kits the following numbers apply

33-540 Triple Nozzle Kit for 18' Booms

33-542 Triple Nozzle Kit for 20' Booms

|      | HN -10-32    | 10 - 32 Hex Nut                           | 1        |
| 7    | 8931-144     | 10GA White Wire 144"                      | 1        |
|      | 8901         | Slide-On Connector                        | 1        |
| 8    | 33-273       | Auto Blade Type Fuse 30Amp                | 1        |

#### **CONNECTION INSTRUCTIONS**

Route wire harness along side of tank and over to fuse block taking care to stay clear of moving parts or hot engine components. Cut off excess wire and strip back  $^{3}/_{8}$ ". Place one 8963 heat shrink ( $^{1}/_{4}$  x  $^{11}/_{4}$ ) on each wire before crimping 8901 slide on connectors to the red and white wires. Connect the two wires to the fuse block first the red to the (+) positive and the white to the (-) negative. Put the 33-273 auto blade type fuse (30 amp) into fuse block.

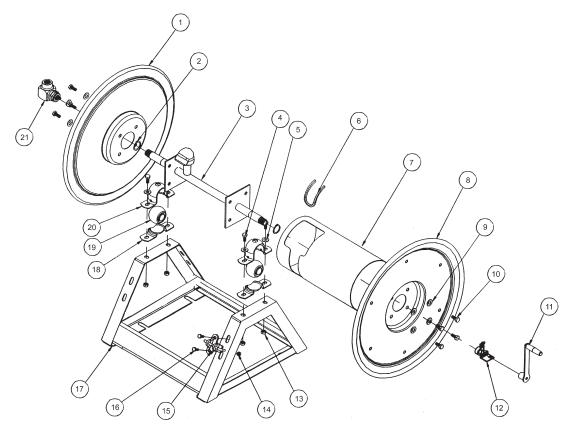

Make certain you are connecting positive (+) to positive; negative (-) to negative while attaching power leads. If you do not observe polarity, damage will result to electrical components.

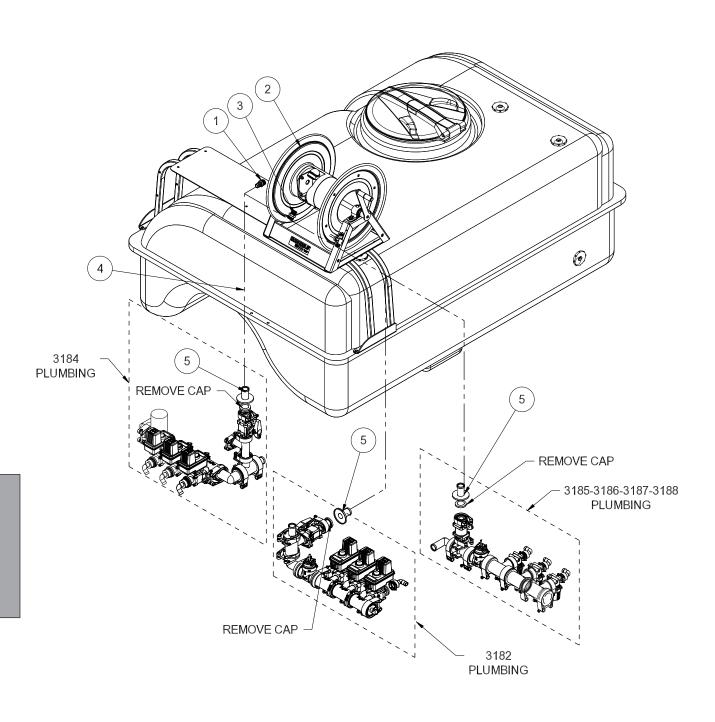

Use Dielectric Grease On All Electrical Connections

| 3    | 16-295        | Hose Fitting 3/ <sub>4</sub>  | 1        |
| 4    | 9032-110      | ³/₄" Black Hose 110"  | 1        |
|      | 18-040        | Hose Clamp  | 2        |
| 5    | 15-749        | Hose Barb <sup>3</sup> / <sub>4</sub>                                 | 1        |

- 1. Wear protective clothing when draining the tank and taking apart the lines.
- 2. Drain tank and spray system in a safe and approved method insuring that no chemical or water remain in tank as you will be taking apart lines.
- 3. Remove key from ignition, set park brake and block wheels.
- 4. Put hose reel on hose reel bracket with fitting to the rear of machine. Use four bolts  $\frac{5}{16}$  18 x  $\frac{11}{2}$  and four  $\frac{5}{16}$  18 lock nuts to hold in place. Tighten bolts.
- 5. Put 18-249 barb fitting into hose reel side.
- 6. Place the 16-295 Hose Fitting into the Hose reel center.
- 7. Remove the blank cover from the ball valve by the manifold valve and place the 15-749 Hose Barb. Tighten clamp.
- 8. Route hose from the hose barb on the ball valve to the barb fitting on the side of the hose reel. Hold in place with the two 18-040 clamps.
- 9. Be sure all clamps and hardware are tight before using.

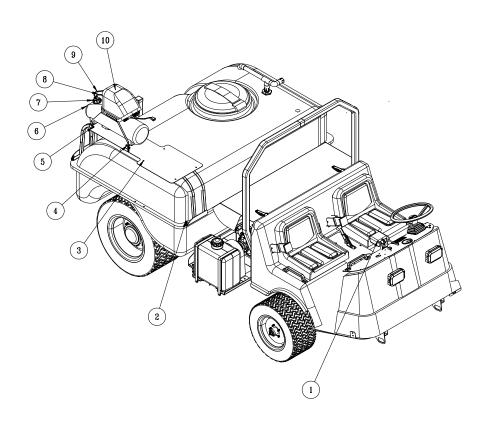

### **HOSE REEL ADJUSTMENTS**

#### **OPERATIONAL CHECK:**

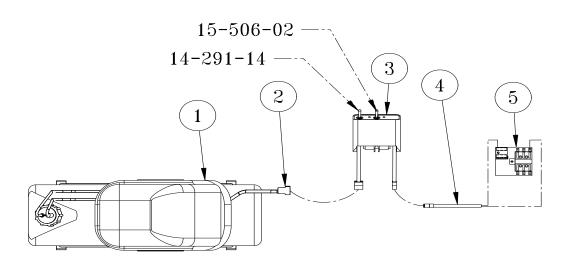

- 1. Pull hose off drum at least one full revolution. A clicking noise should be heard from locking mechanism.
- 2. Let the hose retract.
- 3. Pull the hose off until the first click is heard. Drum should lock when the hose tension is removed.
- 4. Continue pulling the hose, no more than one revolution, until no clicking is heard. Hose should rewind when tension is removed.

#### **HOSE REPLACEMENT PROCEDURE:**

- 1. Facing swivel, turn the hose drum clockwise until all of the hose is removed from the drum and the drum is held by locking mechanism. Make sure spring is locked.
- 2. Remove hose clamps and disconnect hose from swivel. Remove old hose.
- 3. Insert new hose through roller guide, connect to swivel and reinstall hose clamps. Use spring guard over hose to protect the hose from being cut by the drum.
- 4. Remove check ball from old hose and install on replacement hose.
- 5. Carefully, keeping the tension on the hose, pull the hose to release the locking mechanism. Let the hose wind on the drum.

## **30-004 FOAM MARKER DRAWING**

### **INSTALLATION INSTRUCTIONS**

Safety: Before working on machine stop engine, set park brake, remove key from ignition and block wheels. Disconnect negative (-) battery terminal.

#### **BOX MOUNT**

Mount the switch box to the lower center of the dashboard. Remove the two Phillips head bolts. Reinstall the #10 x 1 phillips head bolts and lockwashers to hold the switch box onto the dashboard. Tighten all bolts.

#### WIRING

Use dielectric grease on all electrical connections. Connect power cable (15-509) to the switch box. Turn the switch off. Route the power wire down through the grommet in the dashboard. Follow the wire harness down under the floorboard, then back along the main frame and up to the fuse block in the engine compartment behind the passenger seat. The power cable will need to be cut and shortened. Attach slide-on terminals to the wire ends with heat shrink, then connect to fuse block. Red to positive(+), black to negative(-). Insert 10 AMP fuse into slot which has red wire attached to it.

Route Control Harness (15-504) from switch box on dashboard same as the power wire. Only continue all the way to the rear of the machine. Then pull the cable up over the back of the spray tank so it can be connected to the compressor.

#### **CONNECTING THE CAP ASSEMBLY**

Connect the blue tube to the tank cap connector which is also connected to the large blue tube which hangs below the cap. This is the soap outlet tube. Connect the clear tube to the other connector on the tank cap. This is the air input tube. Tighten connectors hand tight, assembly tank cap onto tank.

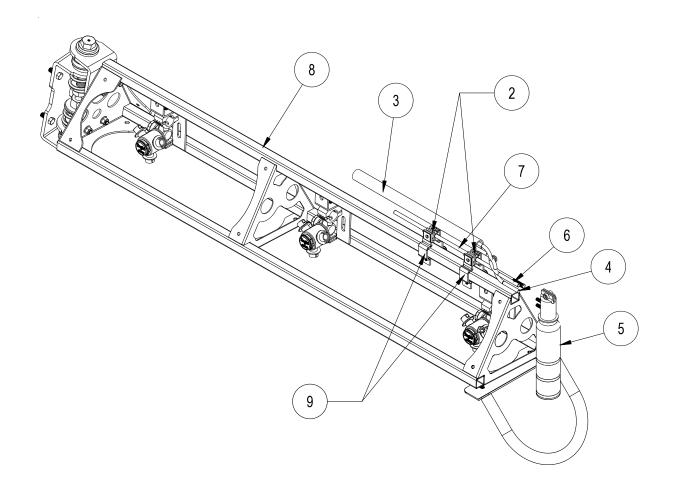

#### HOSES

Being careful not to cut the tubing, cut the oversleeve back approximately 2" (5 cm) to expose blue and clear tubing. Remove blue wing nut from top connector of foam nozzle and slide it on the blue tube with the threads facing toward end of tube. Slide blue tube all the way over the top of the small tube on foam nozzle. Slide wing nut back to the threads and hand tighten. Follow the same steps for the clear tube and tube nut.

Route the tubing along underside of main frame using tie downs as necessary.

Install opposite ends of air-liquid tubes to compressor, again cutting back the oversleeve approximately 2" (5 cm) and inserting blue and clear tubes for the left boom section into the tubing connectors on the right side of compressor as far as possible. Follow the same steps for the right boom tubing. Notice the right boom is inserted into left side of compressor. To release tubing from compressor, hold black ring around tubing, and pull tube out.

## FOAMER NOZZLE MOUNT & HOSE GUARD MOUNT DRAWING

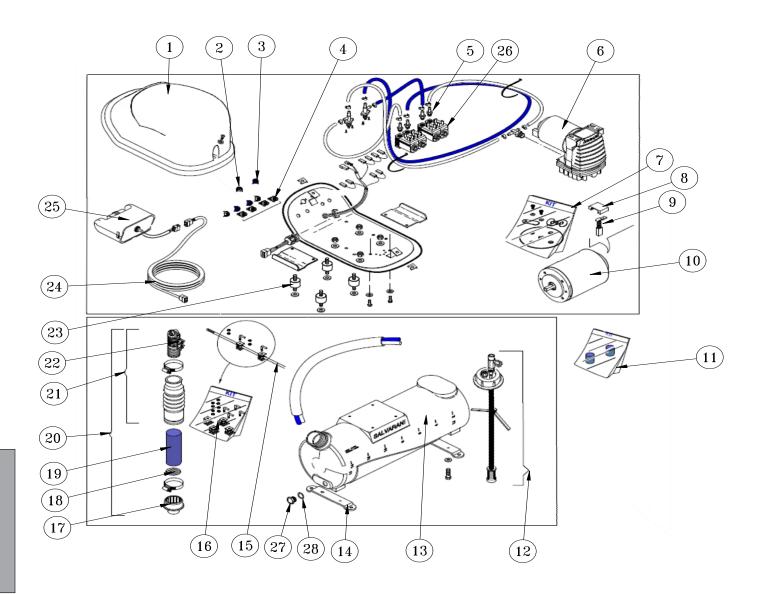

### **30-162 FOAM MARKER PARTS LIST**

| REF# | PART#        | DESCRIPTION                                    | QUANTITY   |
|------|--------------|--|------------|
| 1    | 15-537       | Foamer Hose Guard 31"                          | 4          |
|      | HSDPS-14-075 | Stainless Steel Pan Head Drill Screw 1/4 x 3/4 | 8          |
| 2    | 16-987       | Foam Nozzle Mounting Kit                       | 1 per boom |
| 3    | 15-507       | Foamer Tubing                                  | 1          |
| 4    |              | Clear Tubing                                   |            |
| 5    | 15-511       | Foam Nozzle                                    | 2          |
| 6    |              | Blue Tubing                                    |            |
| 7    | 15-510-01    | Nozzle Mounting Rod                            | 2          |
| 8    |              | Boom   |            |
| 9    | 16-795       | Square Clamp                                   | 4          |

- 1. Slide hose clamp onto drop tube of foam nozzle and attach restrictor bell.
- 2. Place splined end of Nozzle mounting rod (Ref 7) into top of foam nozzle (Ref 5). Tighten screw.
- 3. Slide two foam nozzle mounts (Ref 2) onto the rod. Place square clamps (Ref 9) on foam nozzle mounts and mount the square clamps to the boom (Ref 8). Adjust foam nozzle mounts and clamps so nozzle assembly will clear end of boom. Tighten foam nozzle mounts and square clamps to prevent side to side movement. Do the same to the other side.
- 4. Being careful not to cut the tubing (Ref 3), cut the oversleeve back approximately 2" (5 cm) to expose blue (Ref 6) and clear tubing (Ref 4).
- 5. Remove blue wing nut from top connector of foam nozzle and slide it on the blue tube with the threads facing toward end of tube. Slide blue tube all the way over the top of the small tube on foam nozzle. Slide wing nut back to the threads and hand tighten. Follow the same steps for the clear tube and tube nut.
- 6. Route the tubing along underside of main frame using tie downs as necessary.
- 7. Install opposite ends of air-liquid tubes to compressor, again cutting back the oversleeve approximately 2" (5 cm) and inserting blue and clear tubes for the left boom section into the tubing connectors (Ref A) on the right side of compressor as far as possible.
- 8. Follow the same steps for the right boom tubing. Notice the right boom is inserted into left side of compressor. To release tubing from compressor, hold black ring around tubing, and pull tube out.
- 9. Hose's must be routed on bottom of the boom square tubing.
- 10. Mark 6 inches in from inside edge of foamer nozzle mounting bracket on square boom tubing.
- 11. Place hose guard (Ref 1) flush with top of square tubing with edge on previous mark. The channel covers hoses on the bottom of the square tubing.
- 12. Install hose guard using 2 drill screws (you may want to drill a 3/16 pilot hole first).
- 13. Place another hose guard against first and install in same manner.
- 14. Repeat process for other boom side.
- 15. Connect small plastic electrical plug under compressor to electrical extension cable.
- For Spray Star 1600 route extension cable under engine along the mainframe cross bar, using tie downs as necessary.
- 17. Cut cable and strip casing, allowing enough length to connect to fuse block.
- 18. Strip and connect slide on connectors to each wire and use the heat shrink.
- 19. Connect black negative (-) wire to the ground and connect red wire to the positive (+).
- 20. Insert 10 amp fuse into slot which red wire was attached to.

### 14-291 FOAMER REPLACEMENT PARTS

## 14-291 FOAMER REPLACEMENT PARTS

| REF# | PART#     | DESCRIPTION               | QUANTITY |

### 14-515 WATER METER KIT (GALLONS)

### **15-618 WATER METER KIT (LITERS)**

| REF# | PART#  | DESCRIPTION                                   | QUANTITY |
|------|--------|---|----------|
| 1    | 14-524 | Filler Outlet                                 | 1        |
| 2    | 14-514 | Water Meter (Gallons)                         | 1        |
|      | 14-527 | Water Meter (Liters)                          | 1        |
| 3    | 14-525 | Filler Inlet                                  | 1        |
| 4    | 16-962 | 1" Quick Coupler (already on machine)         | 1        |
| 5    | 16-961 | 1" Adapter Quick Coupler (already on machine) | 1        |
| 6    | 16-851 | 1" Nipple (already on machine)                | 1        |
| 7    | 18-448 | 1" Ball Valve (already on machine)            | 1        |

- 1. Thoroughly flush the service line upstream of the meter to remove dirt and debris.
- 2. The DLJ Meter is for use **only** with **COLD WATER** up to 122°F (50°C)
- 3. Slowly open any upstream valves to prevent damage to the meter.

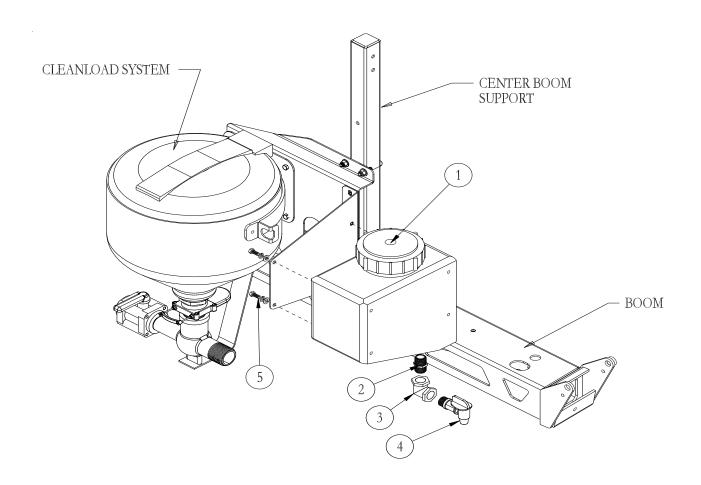

#### **Gallons to Cubic feet Conversion:**

Multiply gallons reading by 0.1337 to get cubic feet.

There are 7.48052 gallon per cubic foot.

## **30-006 FRESH WATER TANK DRAWING**

### **30-006 FRESH WATER TANK PARTS LIST**

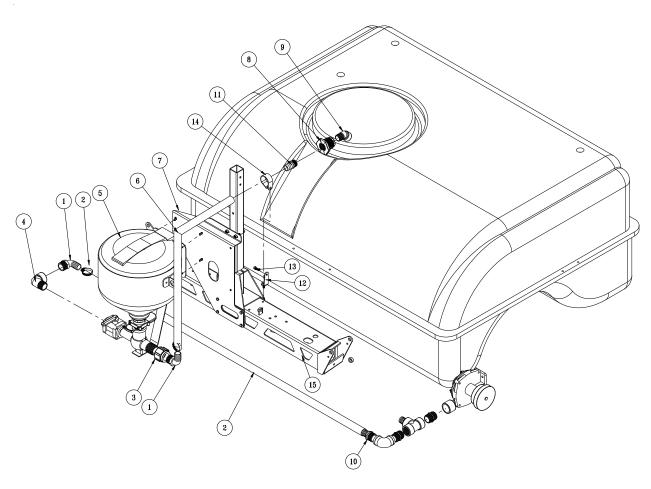

| REF# | PART#         | DESCRIPTION  | QUANTITY |
|------|---------------|--|----------|
| 1    | 10-234        | Wash Tank  | 1        |
| 2    | 16-158        | Close Nipple   | 1        |
| 3    | 16-151        | Elbow  | 1        |
| 4    | 16-960        | Spigot   | 1        |
| 5    | HB-516-18-075 | Bolt <sup>5</sup> / <sub>16</sub> - 18 x <sup>3</sup> / <sub>4</sub> | 4        |
|      | HWL-516       | Lockwasher <sup>5</sup> / <sub>16</sub>                              | 4        |
|      | HW-516        | Washer <sup>5</sup> / <sub>16</sub>                                  | 4        |

### **INSTALLATION INSTRUCTIONS**

- 1. Fresh Water Wash Tank mounts on the rear of all the machines.
- 2. The Bracket is already attached to the Super Boom center boom post.
- 3. Install the nipple (Ref 2), elbow (Ref 3) and spigot (Ref 4)into the bottom of wash tank (Ref 1). Use thread tape on all threads.
- 4. Mount the tank onto the mount bracket using four  $^{5}/_{16}$  x  $^{3}/_{4}$  bolts, washers and lockwashers. Tighten.
- 5. Rinse tank with clear water and check for leaks around fittings.

This tank is for fresh clear water ONLY. Do not put chemicals in this tank.

## **30-007 CHEMICAL CLEAN-LOAD DRAWING**

| REF# | PART#         | DESCRIPTION                                       | QUANTITY |
|------|---------------|---|----------|
| 1    | 16-156        | Elbow   | 2        |
| 2    | 8897-125      | 1¹/₄" Discharge Hose 125"                         | 1        |
|      | 18-116        | Hose Clamp  | 2        |
| 3    | 18-391        | Coupling  | 1        |
| 4    | 16-972        | 90° Elbow   | 1        |
| 5    | 15-620        | Clean-load Assembly                               | 1        |
| 6    | 8897-43       | 1¹/₄" Discharge Hose 43"                          | 1        |
|      | 18-116        | Hose Clamp  | 2        |
| 7    | 17-635        | Clean Load Mount (part of boom)                   | 1        |
| 8    | 16-945        | Fitting (part of tank)                            | 1        |
| 9    | 16-971        | 45° Elbow (part of tank)                          | 1        |
| 10   | 16-161        | Fitting   | 1        |
| 11   | 16-159        | Hose Barb   | 1        |
| 12   | 14-604        | Loom Clamp Mount                                  | 1        |
| 13   | HB-516-18-100 | Bolt <sup>5</sup> / <sub>16</sub> - 18 x 1        | 2        |
|      | HNFL-516-18   | Flange Lock Nut <sup>5</sup> / <sub>16</sub> - 18 | 2        |
| 14   | HLC-A-200     | Loom Clamp  | 1        |
| 15   |               | Center Boom                                       |          |

#### **START-UP**

- 1. All Clean-load valves must be closed prior to starting: inlet ball valve, knife valve and hopper rinse ball valve.
- 2. Open lid to check for foreign objects which may hinder performance or contaminate the system.
- 3. Close and lock lid by turning cover clockwise.
- 4. Divert pump flow to Clean-load inlet line. A pressure of 30 PSI minimum and 150 PSI maximum must be used. Highest pressures increase eduction rate and available wand suction.
- 5. Turn inlet ball valve on (yellow handle).
- 6. Open knife valve, located on the bottom of hopper, by pushing handle in (red handle).
- 7. Unlock and open lid slowly by turning cover counterclockwise.

#### **LOADING LIQUID OR POWDERED CHEMICAL INTO HOPPER**

- 8. Pour required amount of chemical into hopper. Avoid splashing liquids or powdered chemicals outside of hopper.
- 9. Rinse empty chemical containers if applicable. Place container opening over container rinse valve and press down. This will activate the rinse valve and rinse container.
- 10. Rinse Clean-load hopper. Close and lock lid by turning cover clockwise. Release the safety locking band on the hopper rinse ball valve and turn on for 20 seconds. Close ball valve and return locking band to locked position.
- 11. Open lid and inspect for chemical residue. Repeat step 10 as necessary.
- 12. Close knife valve by pulling red handle out towards you. Turn inlet (yellow handle) off.

#### LOADING LIOUID AND/OR POWDERED CHEMICAL WITH SUCTION LANCE

Note: Lance suction is dependent upon eductor pressure and flow. For best results, use highest pressure available up to 150 PSI maximum.

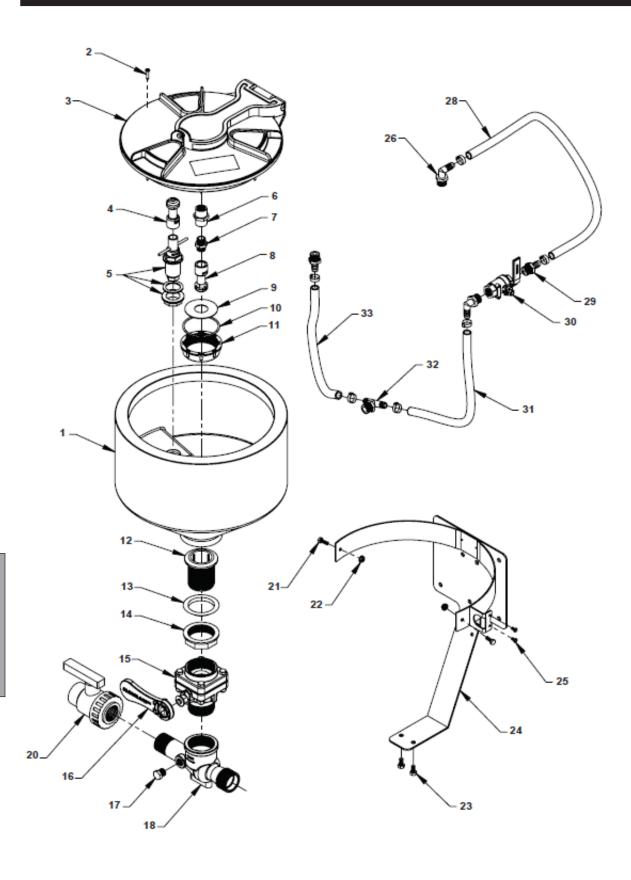

- 8. Insert lance body with o-ring into eductor until the o-ring is sealed.
- 9. Use the free end of the lance to pierce bag or container to vacuum powdered or liquid chemical.
- 10. Rinse lance. Place lance end into a clean container of water to rinse lance assembly.
- 11. Remove lance body from eductor and drain any remaining fluid into hopper.
- 12. Close knife valve (red handle). Turn inlet valve (yellow handle) off.

#### **SHUTDOWN**

- 1. Ensure that:
  - · All valves are closed. Be sure to close knife valve first. (Close by pulling red handle out towards you.)
  - · Chemical residue has been cleaned.
  - Hopper lid is closed and locked by turning cover clockwise.
- 2. Divert pump flow back to normal operation.

| Symptom                                | Corrective Action   |  |
|--|---|--|
| Low eduction rate                      | Check pump pressure and flow. Cleanload Eductor performance is based on flow and pressure to the system. Note requirements for high eduction rates.                               |  |
|  | Increase outlet hose size back to tank.   |  |
| Plugged or clogged bottle rinse nozzle | Disassemble rotary portion of nozzle from lower valve assembly and back flush until nozzle ports are clear of debris.   |  |
| Plugged or clogged tank rinse nozzle   | Disassemble rotary portion of nozzle from NPT hose barb and back flush until nozzle ports are clear of debris. Remove screen and flush with water to clear away foreign material. |  |
| Fitting leaks                          | Check for cracks in fitting. Replace fitting if necessary.  |  |
|  | Disassemble and add more joint seal in compound if leak occurs on threads.  |  |

### 15-620 CHEMICAL CLEAN LOAD® PARTS DRAWING

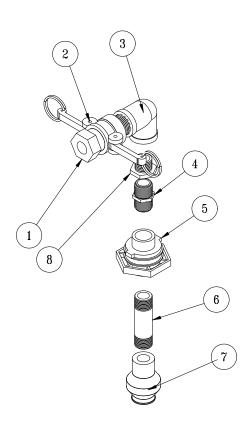

## 15-620 CHEMICAL CLEAN LOAD® PARTS LIST

| REF# | PART#     | DESCRIPTION   | QUANTITY |
|------|-----------|---|----------|

#### The Smithco Commercial Products Two-Year Limited Warranty

Smithco, Inc. (Smithco) warrants your 2016 or newer Smithco Commercial Product ("Product") purchased after October 1, 2016 to be free from defects in materials or workmanship for the period of time listed below. Where a warrantable condition exists, Smithco will repair the Product at no cost to you including diagnosis, labor (at the Smithco standard labor rate, subject to the Smithco flat rate schedule), and parts.

#### **Warranty Duration is:**

- (1) Two years, 1500 operational hours\* from the date of delivery to the original purchaser or Five years from the date of original manufacturer of the product, whichever occurs first. (\*Products equipped with hour meter).
- (2) Products used in rental situations are covered for 90 days from date of delivery to original user/renter.

#### Owner Responsibilities:

As the Product owner, you are responsible for required maintenance and adjustments stated in your Owner's Manual. Failure to perform required maintenance and adjustments can be grounds for disallowing a warranty claim. You are particularly responsible to train all present and future operators of this product on the safe operation of this product at your location.

#### **Instructions for Obtaining Warranty Service:**

You are responsible for notifying the Authorized Smithco Products Distributor from whom you purchased the Product as soon as you believe a warrantable condition exists and not later than 30 days from discovery of the condition.

If you need help locating an Authorized Smithco Distributor, or if you have questions regarding your warranty rights or responsibilities, you may contact us at:

Smithco Product Support Department 200 West Poplar Ave. Cameron, Wisconsin 54822

Telephone: 800-891-9435 E-Mail: ProductSupport@Smithco.com

#### **Maintenance Parts:**

Parts scheduled for replacement as required maintenance ("Maintenance Parts"), are warranted for the period of time up to the scheduled replacement time for that part.

#### **Items/Conditions Not Covered:**

Not all product failures or malfunctions that occur during the warranty period are defects in materials or workmanship. The items/conditions listed below are not covered by this warranty:

Product failures which result from the use of non-Smithco replacement parts, or from installation and use of addon, modified, or unapproved accessories are not covered.

Product failures which result from failure to perform required maintenance and/or adjustments are not covered.

Product failures that result from operating the Product in an abusive, negligent or reckless manner are noT covered.

This warranty does not apply to parts subject to consumption through use, unless found to be defective. Examples of parts which are consumed, or used up, during normal Product operation include, but are not limited to: blades, tines, teeth, scarifiers, rakes, plates, wear plates, castor wheels, tires, batteries, filters, belts, nozzles, etc.

This warranty does not apply to failures caused by outside influence. Items considered to be outside influence include, but are not limited to, weather, storage practices, contamination, use of unapproved coolants, lubricants, additives, or chemicals, etc.

This warranty does not apply to normal "wear and tear" items. Normal "Wear and Tear" includes, but is not limited to, damage to seats due to wear or abrasion, worn painted surfaces, scratched decals or windows, etc.

Smithco may require the return of failed parts or components in order to determine the validity of any warranty claim.

Smithco will not be obligated to replace components of other manufacturers if inspection by the original component manufacturer indicates that failure was due to normal wear and tear, expected consumption through use or improper care or service.

#### Other Legal Disclaimers:

The above remedy for product defects through repair or replacement by an authorized Smithco distributor or dealer is the purchaser's sole remedy for any defect. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

THERE ARE NO OTHER EXPRESS WARRANTIES OTHER THAN THOSE SET FORTH ABOVE. ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR USE ARE LIMITED TO THE DURATION OF THE LIMITED WARRANTIES CONTAINED HEREIN.

Some states may not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

THE SMITHCO COMPANY IS NOT LIABLE FOR INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH THE USE OF THE PRODUCT, INCLUDING ANY COST OR EXPENSE OF PROVIDING A SUBSTITUTE PRODUCT OR SERVICE DURING PERIODS OF MALFUNCTION OR NON-USE.

Some states may not allow the exclusion of indirect, incidental or consequential damages, so the above exclusion may not apply to you.

Smithco neither assumes, nor authorizes any person to assume for it, any other liability in connection with the sale or use of this product.
