Thank you for purchasing a **Smithco** product.

Read this manual and all other manuals pertaining to the Big Vac V72-E carefully as they contain safety, operating, assembly and maintenance instructions. Failure to do so could result in personal injury or equipment damage.

Keep manuals in a safe place after operator and maintenance personnel have read them. Right and left sides are from the operator's seat, facing forward.

All Smithco machines have a Serial Number and Model Number. Both numbers are needed when ordering parts. The serial number plate on the Big Vac is located on the front cross member of the frame.

For easy access record your Serial and Model numbers here.

SMITHCO WAYNE, PENNSYLVANIA 19087 USA 610-688-4009 Fax 610-688-6069			CE
SERIAL NO.	kW/hp	DATE OF MFG.	
<input type="text"/>	<input type="text"/>	<input type="text"/>	
MODEL NO.	lb/kg Empty	lb/kg Full	
<input type="text"/>	<input type="text"/>	<input type="text"/>	

Information needed when ordering replacement parts:

1. Model Number of machine
2. Serial Number of machine
3. Name and Part Number of part
4. Quantity of parts

SAFE PRACTICES

1. It is your responsibility to read this manual and all publications associated with this machine (engine, accessories and attachments).
2. Never allow anyone to operate or service the machine or its attachments without proper training and instructions. Never allow minors to operate any equipment.
3. Learn the proper use of the machine, the location and purpose of all the controls and gauges before you operate the equipment. Working with unfamiliar equipment can lead to accidents.
4. Wear all the necessary Personal Protective Equipment (PPE) to protect our head, eyes, ears, hands and feet. **Ear and eye protection are required.** Operate the machine only in daylight or in good artificial light.
5. Inspect the area where the equipment will be used. Beware of overhead obstructions and underground obstacles. Stay alert for hidden hazards.
6. Never operate equipment that is not in perfect working order or without decals, guards, shields, or other protective devices in place.
7. Never disconnect or bypass any switch.
8. Carbon monoxide in the exhaust fumes can be fatal when inhaled, never operate a machine without proper ventilation.
9. Never use your hands to search for oil leaks. Hydraulic fluid under pressure can penetrate the skin and cause serious injury.
10. This machine demands your attention. To prevent loss of control or tipping of the vehicle:
 - A. Use extra caution in backing up the vehicle. Ensure area is clear.
 - B. Do not stop or start suddenly on any slope.
 - C. Reduce speed on slopes and in sharp turns. Use caution when changing directions on slopes.
 - D. Stay alert for holes in the terrain and other hidden hazards.
 - E. Operate equipment up and down slopes, never across the face.
11. Before leaving operator's position for any reason:
 - A. Disengage all drives.
 - B. Lower all attachments to the ground.
 - C. Shut engine off and remove the ignition key.
12. Keep hands, feet and clothing away from moving parts. Wait for all movement to stop before you clean, adjust or service the machine.
13. The rubber fingers, sweeper and vacuum pick up and propel debris and small objects in machines path during operation. Keep the area of operation clear of all bystanders.
14. Never carry passengers.
15. Use parts and materials supplied by Smitco only. Do not modify any function or part.
16. Avoid sharp turns. Watch the tires of the tractor while turning to make sure they do not contact the tongue of the Big Vac.
17. Shut down power source before attempting to unclog any part of the machine.
18. If reel deck and/or blower began to vibrate abnormally, immediately shut off power and determine the cause.

These machines are intended for professional maintenance on golf courses, sports turf, and any other area maintained turf and related trails, paths and lots. No guaranty as to the suitability for any task is expressed or implied.

SPECIFICATIONS FOR BIG VAC ENGINE DRIVE

WEIGHTS AND DIMENSIONS

Length	180" (458 cm)
Width	84" (214 cm)
Height	87" (221 cm)
Weight	2950 lb (1338 kg)

SOUND LEVEL

At ear level	98 dBA
At 30 ft (9.14 m)	92.5 dBA

ENGINE

Make	Briggs & Stratton
Model#	543477
Type/Spec	0160E1
Horsepower	31 Hp (23 kW)
Fuel	Unleaded 87 Octane Gasoline Minimum
Cooling System	Air Cooled
Lubrication System	Full Pressure
Alternator	24 Amp

TIRES & WHEELS

Two 26.5 - 1400 x 12 NHS (18 psi (1.3 bar)) Fairway Type Turf Tires
Castor: 13 x 5 x 6 (20 psi (1.4 bar))

BATTERY (optional)

	Automotive type 45 - 12 volt
BCI Group	Size 45
Cold Cranking Amps	480 minimum
Ground Terminal Polarity	Negative (-)
Maximum Length	9" (23 cm)
Maximum Width	5.38" (14 cm)
Maximum Height	9" (23 cm)

FLUID CAPACITY

Crankcase Oil	See Engine Manual
Fuel	6 gallon (22.7 liters)
Hydraulic Fluid	3.2 gallon (12.2 liters)
Grade of Hydraulic Fluid	SAE 10W-40 API Service SJ or higher Motor Oil

OPTIONAL EQUIPMENT

72-002 Rubber Finger Sweeper Head	73-003 Standard Clevis Hitch
72-005 Nylon Brush Head	73-004 5th Wheel Hitch for Turf Truckster w/ Electric brakes
72-006 Replacement Brush Reel	73-005 5th Wheel for Tractor
22-073 Battery	73-006 Vacuum Hose Hand Held

MAINTENANCE

CAUTION Before servicing or making adjustments to machine, stop engine on tow vehicle and remove key from ignition.

NOTE: Use all procedures and parts prescribed by the manufacturer's. Read the engine manual before operation.

LUBRICATION

Use No. 2 General Purpose Lithium Base Grease and lubricate **DAILY**. The Big Vac has 13 grease fittings. All bearings are sealed bearings. When inserting grease, be careful not to ruin the seal, if this happens, replace the bearing at once. Be sure to wipe grease fitting clean before injecting grease. Give only one or two pumps of grease at each lubrication.

REF# LOCATION

- 1 One on all four castor wheels.
- 2 Two on the fan shaft.
- 3 One on each mounted bearing for reel shaft.
- 4 One on all four castor wheel mount brackets.
- 5 One on the jack stand.

HYDRAULIC OIL

1. Use SAE 10W-40 API Service SJ or higher motor oil.
2. For proper warranty, change oil every 500 hours or annually, whichever is first and change the filter after the first 20 hours, then at 100 hours, then every 250 hours thereafter.
3. Inspect hydraulic lines for damage or leaks. Never use hands to inspect leaks.
4. Check hydraulic fluid level in tank. Look at the sight gauge on the front left side of the tank. The oil level should be at 90°C (194°F). If level is low, add SAE 10W-40 API Service SJ or higher motor oil.
5. After changing oil and/or filter, operate the machine for a few minutes. Check oil level and for leaks.
6. Always use caution when filling hydraulic oil tank or checking level to keep system free of contaminants. Check and service more frequently when operating in extremely cold, hot or dusty conditions.
7. If natural color of fluid is now black or smells burnt, it is possible that an overheating problem exists.
8. If fluid becomes milky, water contamination may be a problem.
9. If either of the above conditions happen, change oil and filter immediately after fluid is cool and find cause. Take fluid level readings when system is cold.
10. In extreme temperatures you can use straight weight oil. We recommend SAE 30W API Service SJ or higher when hot (above 90°F (33°C)) and SAE 10W API Service SJ or higher when cold (below 32°F (0°C)) ambient temperature. Use either motor oil or hydraulic oil, but do not mix.
11. Oil being added to the system must be the same as what is already in the tank. Mark tank fill area as to which type you put in.

TIRE PRESSURE

Caution must be used when inflating a low tire to recommended pressure. Over inflating can cause tires to explode. Tires on the machine should be 18 psi (1.3 bar), castor wheels should be 20 psi (1.4 bar). Improper inflation will reduce tire life considerably.

ENGINE OIL

Change and add oil according to charts below. Do not overfill. Use a high quality detergent oil. For Briggs engine use oil classified "For Service SJ or higher" SAE 30 oil. Use no special additives with recommended oils. Do not mix oil with gasoline.

SAE 30 oil, if used below 40° F (4° C), will result in hard starting and possible engine bore damage due to inadequate lubrication.

The use of non-synthetic multi-viscosity oils in temperatures above 40°F (4° C) will result in higher than normal oil consumption. Check oil level more frequently when using a multi-viscosity oil.

SAE VISCOSITY GRADES

Starting Temperature Range Anticipated Before Next Oil Change

WHEEL MOUNTING PROCEDURE

1. Turn machine off and remove key.
2. Be sure unit is on a level surface. Unhitch from tow vehicle if possible.
3. Block the opposite wheel then the one you are working on.
4. Loosen nuts slightly on wheel to be removed.
5. Jack up machine being careful not to damage underside of machine.
6. Remove nuts, remove wheel.
7. Place new wheel on hub lining up bolt holes.
8. Torque nuts to 64-74 ft/lb (87-100 Nm) using a cross pattern. Torque again after first 10 hours and every 200 hours thereafter.
9. Lower machine to ground and remove blocks and jack.

HOPPER LIFT SAFETY

The Hopper Lift Safety is used to support the ram on the hopper bottom in the extended position so you may service or repair the machine under the hopper. When not in use the Hopper Lift Safety can be stored on the hopper bed frame.

SERVICE CHART

CAUTION Before servicing or making adjustments to the machine, stop engine, set park break, block wheels and remove key from ignition.

NOTE: Follow all procedures and **ONLY** use parts prescribed by the manufacturer. Read the engine manual before maintenance.

The suggested maintenance checklist is not offered as a replacement for the manufacturer's engine manual but as a supplement. You must adhere to the guidelines established by the manufacturer for warranty coverage. In adverse conditions such as dirt, mud or extreme temperatures, maintenance should be more frequent.

Maintenance Service Interval	Maintenance Procedure
After the first 5 operating hours	Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm))
	Change the engine oil filter.
Before each use daily	Check the engine oil level.
	Clean area around muffler and controls.
	Check the tire pressure.
	Inspect and clean the machine.
Every 50 hours	Clean or change air filter.1&2
	Clean pre-cleaner.1
	Change engine oil and filter.
Every 100 hours	Replace spark plug.
	Lubricate machine.
	Clean or change remote air cleaner.
	Check the battery fluid level and cable connections..
	Change engine oil and filter
	Check belt tension .
Every 250 hours	Check Idle Speed.
	Clean battery terminals.
	Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm))
Every 400 hours or yearly	Change fuel filter.
	Clean oil cooler fins.1
	Replace air filter2
	Replace fuel filter
	Clean air cooling system.1
	Check safety filter in remote air cleaner.
1 In dusty conditions or when airborne debris is present, clean more often.	
2 Every third air filter change, replace the inner safety filter.

Service

OVERLOADING DEBRIS HOPPER AND VACUUM HOUSING WEAR

SMITHCO SWEEPER-VACS ARE DESIGNED TO CARRY THE FOLLOWING MAXIMUM LOADS:

Model 73-000 Big Vac V72E	1500 lbs. (608 kg)
Model 72-000 Big Vac V72	1500 lbs. (608 kg)

PLEASE NOTE THE FOLLOWING:

1. Loads heavier than that will damage the unit.
2. Such damage is not covered by warranty.
3. Overloading is particularly easy when collecting aerifier cores.
4. The hoppers on the Big Vac are large in order to hold 7 and 4 cubic yards respectively, of thatch, grass clippings, leaves and trash.
5. They will not hold 7 or 4 cubic yards of aerifier cores.
6. The maximum depth (in the debris hopper) of aerifier cores is:

Model 73-000 Big Vac V72E	12 in. (30 cm)
Model 72-000 Big Vac	12 in. (30 cm)

VACUUM HOUSING WEAR

The Big Vac are fitted with a wear resistant liner in the vacuum housing. This will provide additional housing life. Be sure the following points are explained to the user:

1. The vacuum housing and impeller must be cleaned each time the unit is used so the housing liner is inspected daily. Only Smithco Sweeper-Vacs provide a clean out/inspection port for easy inspection and cleaning.
2. When bare steel is visible at any point in the housing lining, the lining must be replaced. It is expected the liner will wear and be replaced. It is a vast improvement over competitive units with no liners.
3. Replacement of the liner or the vacuum housing due to wear is normal and is not covered by warranty.
4. Collection of aerifier cores causes extreme wear on the liner (and if unchecked, on the housing).
5. Caution users that, while Smithco Sweeper-Vacs do an excellent job collecting cores, the lining (and the housing) will wear quickly in such use.

RUBBERIZED BOOT

The rubberized boot between main unit and sweeper head is subject to wear and damage from debris. Unless defective, replacement of this boot is not covered by warranty.

STORAGE

1. Before storing clean machine thoroughly.
2. Check bolts and nuts, tighten as necessary.
3. Make all repairs that are needed and remove any debris.
4. Store in a clean and dry area.

ADJUSTMENT OF BELT TENSIONER

There are four maximum belt tensioners on the Big Vac. Two control the tension on the belts on the blower housing, one each on the finger reel and the thatcher reel. The proper tension of the idler should be 12 to 15 as per the gauge (A) on the side of the tightener. Over tightening the belt will shorten the life of the belt and the machine may not perform to the best of its ability. To adjust belt tensioner, loosen bolt holding tensioner. Bring idler pulley tight to belts and turn tensioner into belts to 15°. Tighten holder bolt.

(A)

CONTROL PANEL ADJUSTMENT ARM

On the right hand side of machine is the adjustment lock arm, by lifting up you can adjust the control panel by moving it forward or rearward. Make certain that the lock arm is locked back in place after adjustment. For up and down adjustment loosen the four adjustment bolts place the control panel to where you want it and tighten the four bolts.

HITCH OPTIONS

You may use the clevis hitch that is shipped with your machine or a 2⁵/₁₆ ball hitch that is an optional accessory. Both mount in the same location with three different bolt hole options.

CASTOR WHEELS

Install castor wheels onto the brush/finger head assembly. You may put the machine bushings and spacers (A) on in any combination to get desired height. You should leave one machine bushing on the very bottom and one on the very top next to the lockpin. Check the tire pressure on Castor Wheels they should be 20 psi (1.4 bar).

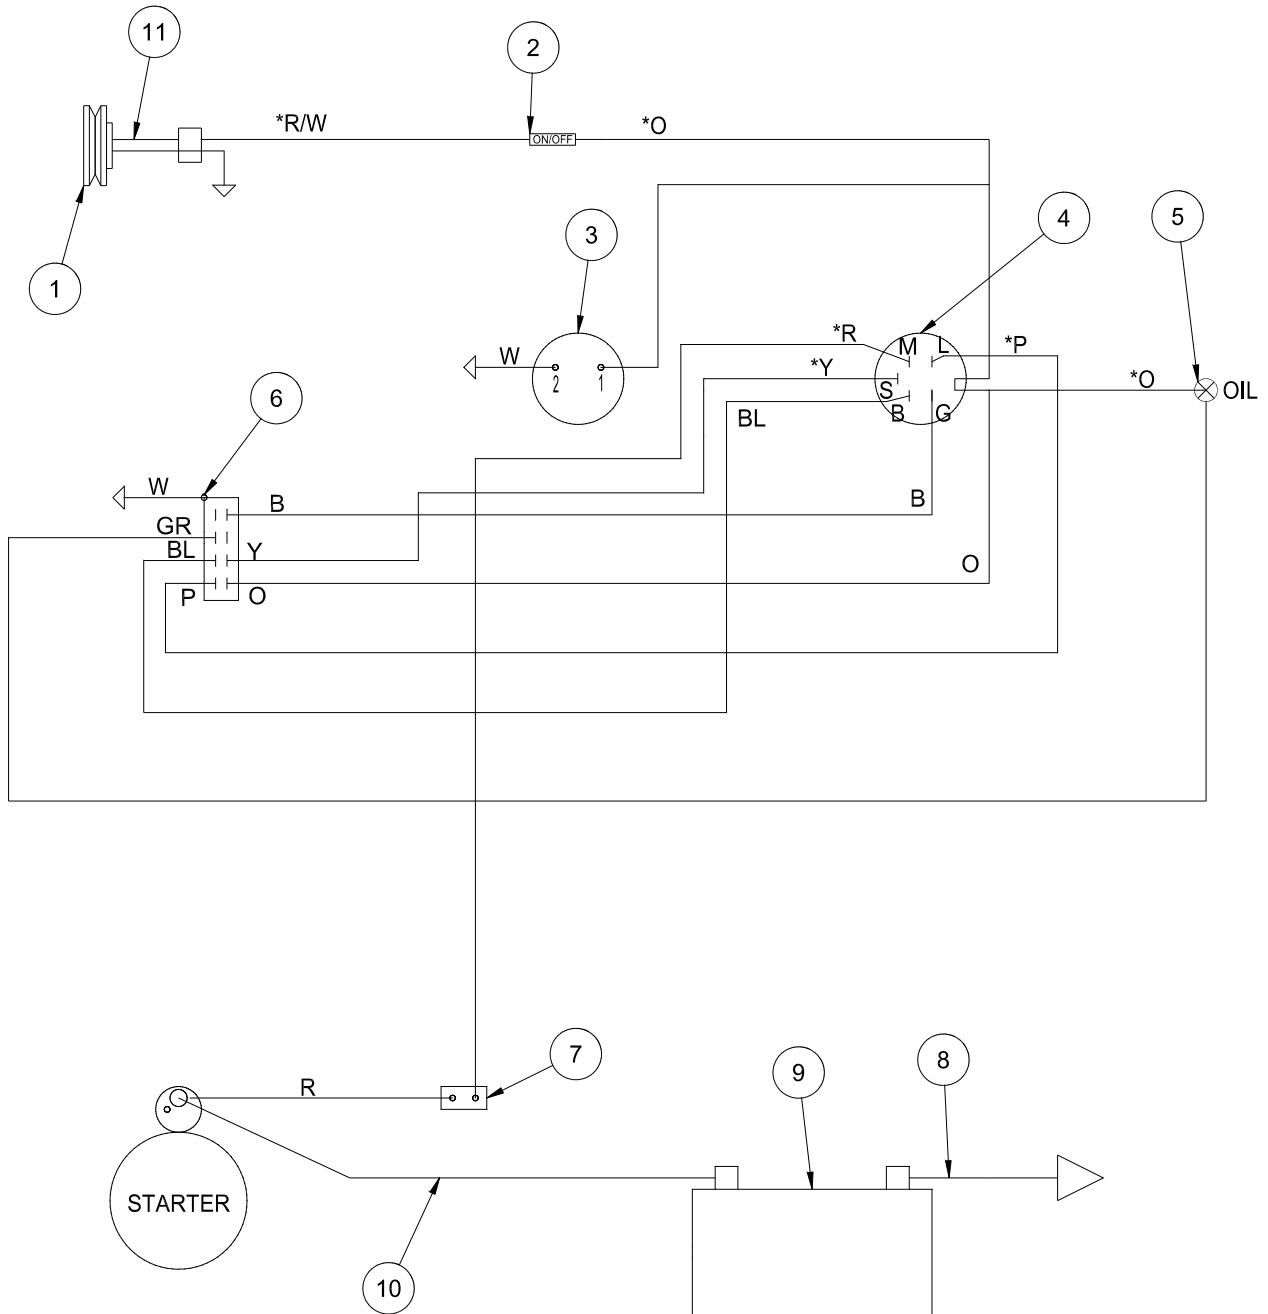

SINGLE REEL HOUSING

Normal setting is two slots down (H) both front and rear (both sides).

VERTICUT REEL VALVE HANDLE

If the rubber finger sweeper head is installed on your unit and verticut reel handle is activated, the hydraulic system may be damaged due to overheating the oil. Remove the verticut reel valve handle when using the rubber finger sweeper head (72-002).

	HNFL-14-20	Flange Lock Nuts $\frac{1}{4}$ - 20	4

INSTALLATION INSTRUCTIONS

Use two people to install hitches.

1. Block both wheels so machine does not roll.
2. Use the jack that is part of the sweeper to raise or lower sweeper to comfortable working height.
3. Slide the tongue (Ref 8) under the sweeper frame. Use the eight $\frac{1}{2}$ - 13 x 1 $\frac{1}{4}$ bolts (Ref 7) and lock nuts to secure tongue. Tighten all hardware.
4. Block up machine and remove jack from machine and place it on the tongue. Use the jack here for more support.
5. Install the control panel leg (Ref 17) and the adjustment leg (Ref 18) as shown, using two $\frac{3}{8}$ - 16 x 2 $\frac{1}{2}$ bolts (Ref 5 and 12). Install the control panel adjustment plates (Ref 1) using hardware (Ref 2 and 3) as shown. Install control panel arm (Ref 4).
6. Install the adjustment lock arm (Ref 16) with the bolt and the spring (Ref 13 and 14) as shown. Put the hand grip (Ref 15) on the arm. Tighten all hardware.
5. The control panel has all hose, wiring and throttle cable connected to it and the sweeper. The control panel is wrapped and fastened to the front of the sweeper.
6. Remove the control panel from the sweeper, bring it forward with the hoses to the rear and the throttle on the left hand side.
7. Fasten the control panel to the control panel mount with the four Truss Head Bolts $\frac{1}{4}$ - 20 x $\frac{3}{4}$ (Ref 19) and four Flange Lock Nuts. Tighten all hardware.

Do not tow on public roads.

73-004 5TH WHEEL HITCH FOR TURF TRUCKSTER W/ ELECTRIC BRAKES

INSTALLATION INSTRUCTIONS

1. Remove tires (Ref 9) from wheels on sweeper and mount on new tires(72-204) supplied with kit. Block rear of machine up. Remove the rear tires.
2. There is a right and left brake. Place the brake on the axle and bolt to axle using the $7/16$ - 20 nuts and lockwashers (Ref 11).
3. Then place the hub and drum assembly (Ref 8) over the brake. Be sure to install the grease seal and the bearing cup and cone.
4. Put new tires back on and hold in place with the $1/2$ -20 lug nuts.
5. Check all nuts and be sure they are tight.
6. Take the wire harness and hook the female butt connectors to the wires on the brake assemblies. Run wire harness up side of main frame to front of machine. Hold wire harness in place with the tie straps.
7. Dealer must provide the connector that hooks to the tow unit. Place one side of connector onto wire harness, connect the other half to the tow unit.
8. Check all connections and hardware. Test brakes before putting machine into service.

	HNFL-14-20	Flange Lock Nuts 1/4 - 20	4

INSTALLATION INSTRUCTIONS

Use two people to install hitches.

1. Block both wheels so machine does not roll.
2. Use the jack that is part of the sweeper to raise or lower sweeper to comfortable working height.
3. Slide the gooseneck (Ref 5) under the sweeper frame. Use the eight 1/2 - 13 x 1 1/4 bolts (Ref 6) and lock nuts to secure gooseneck. Tighten all hardware.
4. Install the control panel mount (Ref 19) on the front of the gooseneck (Ref 5) as shown, using two 3/8 - 16 x 2 1/4 bolts (Ref 17 and 18). On the bottom bolt use lock nut (Ref 18) and just tighten snug. On the top bolt use the 3/8 washer and wing nut (Ref 17). Tighten both after adjusting for the proper position.
5. The control panel has all hose, wiring and throttle cable connected to it and the sweeper. The control panel is wrapped and fastened to the front of the sweeper.
6. Remove the control panel from the sweeper, bring it forward with the hoses to the rear and the throttle on the left hand side.
7. Fasten the control panel to the control panel mount with the four Truss Head Bolts 1/4 - 20 x 3/4 (Ref 19) and four Flange Lock Nuts. Tighten all hardware.
9. Lay the hoses, wiring and throttle cable on top of the gooseneck in hose guard(Ref 4). secure hose guard cover (Ref 1) with Bolt 5/16 - 18 x 3/4 (Ref 3) and Flange Lock Nuts.

Do not tow on public roads.

73-005 5TH WHEEL FOR TRACTOR

Accessories

Do not tow on public roads.

	HNFL-14-20	Flange Lock Nuts 1/4 - 20	4
*	73-007	3pt Add-On Kit (includes all * items)	

INSTALLATION INSTRUCTIONS

Use two people to install hitches.

- Block both wheels so machine does not roll.
- Remove tires (Ref 6) from wheels on sweeper and mount on new wheels (Ref 7) supplied with kit. Block rear of machine up. Remove the rear tires and rear hubs. All parts except hubs to be reused.
- Put new wheel assembly back on and hold in place with the 1/2-20 lug nuts.
- Check all nuts and be sure they are tight.
- Use the jack that is part of the sweeper to raise or lower sweeper to comfortable working height.
- Slide the gooseneck (Ref 2) under the sweeper frame. Use the eight 1/2 - 13 x 1 1/4 bolts (Ref 3) and lock nuts to secure gooseneck. Tighten all hardware.
- Install the control panel mount (Ref 1) on the front of the gooseneck (Ref 2) as shown, using two 3/8 - 16 x 2 1/4 bolts (Ref 15 and 16). On the bottom bolt use lock nut (Ref 15) and just tighten snug. On the top bolt use the 3/8 washer and wing nut (Ref 16). Tighten both after adjusting for the proper position.
- The control panel has all hose, wiring and throttle cable connected to it and the sweeper. The control panel is wrapped and fastened to the front of the sweeper.
- Remove the control panel from the sweeper, bring it forward with the hoses to the rear and the throttle on the left hand side.
- Fasten the control panel to the control panel mount with the four Truss Head Bolts 1/4 - 20 x 3/4 (Ref 17) and four Flange Lock Nuts. Tighten all hardware.
- Intall 3-point Hitch (Ref 13) on tractor. Install 2" Ball (Ref 12) into 3-point hitch.

73-006 HAND HELD VACUUM HOSE DRAWING

Accessories

73-006 HAND HELD VACUUM HOSE PARTS LIST

You will need two people and the tailgate open with an empty hopper **and the machine not operating.**

Note: **Left** and **Right** sides are determined by standing and facing the rear of the machine.

1. Start by drilling four(4) $\frac{9}{32}$ holes in the front panel on the left side, under the hopper chute opening, as illustrated. Start with the top right hole at 28 inches down from the top and $8\frac{3}{4}$ inches in from the right, as illustrated in the drawing.
2. Drill the three remaining holes in a square pattern as illustrated in the drawing. Deburr holes and mount the Hose Plate(Ref 7) and secure with four(4) $\frac{1}{4}$ -20 x $\frac{3}{4}$ Bolts and Flange Whiz-Lock nuts.
3. To mount the Handle Holder(Ref 4) drill two(2) $\frac{9}{32}$ holes through the front vertical tube and hopper side panel on the Left Hand Hopper Side. Mark hole locations by measuring from the top of the hopper side, down $13\frac{3}{4}$ inches to the first hole and $33\frac{3}{4}$ inches to the second hole. Drill holes centered ($\frac{1}{2}$ ") from the side of the tube. Reference illustration to the left.
4. Install Boom Mount Bracket with Boom(Ref's 5 & 17) and Handle Holder(Ref 4) using two(2) $\frac{1}{4}$ -20 x $2\frac{3}{4}$ Bolts and $\frac{1}{4}$ -20 Flange Whiz-Lock nuts(Ref 19) in the holes drilled in the previous step. Mount parts (Ref's 5 & 4) loosely, do not tighten yet. Pull boom mount bracket outward in the slots and tighten bolts.
5. Mount one Hose Hanger(Ref 15) on the front of the hopper using the existing hardware. Tighten hardware.
5. To mount the second hose hanger, remove the drill screw in the upright to the front of hopper door arm plate. In the remaining screw hole, drill a $\frac{9}{32}$ hole completely through to the inside and deburr. Mount the remaining Hose Hanger(Ref 15) using the lower hole of the hanger with one(1) $\frac{1}{4}$ - 20 x $1\frac{3}{4}$ Bolt and Flange Whiz-Lock nut(Ref 16). Position the hanger in the vertical position and drill another $\frac{9}{32}$ " hole using the second hole as a guide. Drill hole completely through to inside of hopper. Deburr and install the remaining bolt and nut.
6. Mount Latch Bracket(Ref 13) on the rear Hose Hanger(Ref 15) in the top holes using two(2) $\frac{1}{4}$ - 20 x $\frac{3}{4}$ Machine Screws and Flange Whiz-Lock nuts(Ref 14). Tighten hardware.
7. Next, swing the Boom back alongside the hopper until it comes in contact with the Latch Bracket(Ref 13). Slide Latch Bracket up until it lifts the Boom $\frac{1}{8}$ ". Tighten the hardware(Ref 14) for the Latch Bracket and the hardware(Ref 19) for the Boom Mount Bracket.
8. Now connect the Hose(Ref 18) to the Hose Handle(Ref 2) in the position illustrated and secure with one Hose Clamp(Ref 1). Connect the other end of the hose to the Remote Hose Connector(Ref 8) and secure with the remaining Hose Clamp.
9. Bolt Hose Clamps(Ref 10) together over the Hose(Ref 18), close to center. Use one(1) $\frac{5}{16}$ - 18 x $\frac{3}{4}$ Bolt and Flange Whiz-Lock nut(Ref 9) for one side. For the other side, use the remaining $\frac{5}{16}$ - 18 x $\frac{3}{4}$ Bolt, $\frac{5}{16}$ Washer and Flange Whiz-Lock nut(Ref 11) to connect the Chain(Ref 12). Place the Washer between the Bolt and the Chain with the bolt going through the end link in the chain first, then through the clamp.
10. Slide the two round Grips(Ref 3) on to the Hose Handle.
11. For storage, place Remote Hose Connector(Ref 8) in Hose Plate(Ref 7) on the front panel. Drape hose over the top and go toward the back of machine, past the rear hose hanger bring hose to the side of machine and up into the Hose Hangers. At the front place the Hose Handle(Ref 2) into the Handle Holder(Ref 4).
12. To use the remote vacuum, remove the Cover Plate from either side of the vacuum housing and replace with the Remote Hose Connector(Ref 8). Store the Cover Plate in the Hose Plate(Ref 7). Before using the vacuum the lever on the left hand side of the vacuum housing must be pulled out and turned counterclockwise 90° and secured in the handle bracket with lynch pin.
13. You may want to remove the hose handle, hose and remote hose connector if you are not going to use the remote vacuum for an extended amount of time.

NOTES

DECAL LIST

16-088	Decal, Moving Parts Hot	Right Main Frame
25-277	Decal, Battery Warning	By Battery Plate
25-298	Decal, Warning Hot	Muffler Guard and Belt Guard
25-279	Decal, Safety Warning	Left Frame Front
25-286	Decal, Pinch Point	Right and Left Tailgate Lift Arms.
25-355	Decal, Tire Pressure 18 PSI	Rear Wheels
25-356	Decal, Tire Pressure 20 PSI	All Castor Wheel
25-374	Decal, Smithco 12"	Blower Chute
25-362	Decal, Danger Fire	Hopper Front
25-363	Decal, Max. Depth	Front Hopper
25-376	Decal, 98 dBA	behind seat
27-093	Decal, Hydraulic Oil	Oil Tank Bracket
72-047	Decal, Big Vac (Large)	Hopper Front
72-061	Decal, Big Vac (Small)	Each Side of Hopper
72-089	Decal, Hose Routing	Left side frame in front
72-182	Decal, Max Load	Front Hopper
73-034	Decal, V72E (large)	Hopper Front
72-035	Decal, V72E (small)	Each Side of Hopper
75-651	Decal, Hopper Lift Safety	Hopper Lift Safety
76-304	Decal, Crush Points	Front Hopper Sides
76-305	Decal, Rotating Parts	Cover Plant and Access Plate
76-307	Decal, Tower Warning	One On Each Side of Deck
78-217	Decal, Control Panel	Control Panel
78-438	Decal, Hang Tag Dumping	Control Panel

QUICK REFERENCE REPLACEMENT PARTS

REPLACEMENT FILTER

23-031	Hydraulic Oil Filter Element	
76-395-01	Air Cleaner Cartridge	Briggs # 841497
76-395-02	Safety Filter Cartridge	Briggs #8241497

REPLACEMENT BELTS

78-277	Belt 3V x 315 (finger reel) 3
--------	-------------------------------

SEAL KITS

78-416	Hydraulic Valve 3 Bank
10-187	Hydraulic Cylinder
14-273	Seal Kit
72-040	Hydraulic Cylinder
72-040-01	Seal Kit
72-040-02	Pin with Clips (2 per cylinder)
*72-199	Hydraulic Motor (finger reel)
72-199-01	Seal Kit
78-413	Hydraulic Pump
78-413-01	Seal Kit
72-077	Hearing Protection
76-354	Fire Extinguisher

* NO OTHER PARTS ARE REPLACEABLE FOR HYDRAULIC MOTOR OR PUMP

HYDRAULIC FLUID

SAE 10W-40 API Service SJ or higher motor oil
