Thank you for purchasing a **Smithco** product.

Read this manual and all other manuals pertaining to the Spray Star 1110 carefully as they contain safety, operating, assembly and maintenance instructions. Failure to do so could result in personal injury or equipment damage.

Keep manuals in a safe place after operator and maintenance personnel have read them. Right and left sides are from the operator's seat, facing forward.

### WARNING

Failure to follow cautious operating practices can result in serious injury to the operator or other persons.

The owner must understand these instructions, and must allow only trained persons who understand these instructions to operate this vehicle.

All **Smithco** machines have a Serial Number and Model Number. Both numbers are needed when ordering parts. The serial number plate on the Spray Star 1110 is located on the right hand frame rail. Refer to engine manual for placement of engine serial number. Refer to engine manual for placement of engine serial number.

For product and accessory information, help finding a dealer, or to register your product please contact us at www.Smithco.com.

Information needed when ordering replacement parts:

- 1. Model Number of machine
- 2. Serial Number of machine
- 3. Name and Part Number of part
- 4. Quantity of parts

For easy access record your Serial and Model numbers here.

### **SAFE PRACTICES**

- 1. It is your responsibility to read this manual and all publications associated with this machine.
- 2. Never allow anyone to operate or service the machine or its optional equipment without proper training and instructions. Never allow minors to operate any equipment.
- 3. Learn the proper use of the machine, the location and purpose of all the controls and gages before you operate the equipment. Working with unfamiliar equipment can lead to accidents.
- 4. Wear all the necessary protective clothing and personal safety devises to protect your head, eyes, ears, hands and feet. Operate the machine only in daylight or in good artificial light.
- 5. Inspect the area where the equipment will be used. Pick up all debris you can find before operating. Beware of overhead obstructions and underground obstacles. Stay alert for hidden hazards.
- 6. Never operate equipment that is not in perfect working order or without decals, guards, shields, or other protective devices in place.
- 7. Never disconnect or bypass any switch.
- 8. Carbon monoxide in the exhaust fumes can be fatal when inhaled, never operate a machine without proper ventilation.
- 9. Fuel is highly flammable, handle with care.
- 10. Keep engine clean. Allow the engine to cool before storing and always remove the ignition key.
- 11. Disengage all drives and set park brake before starting the engine.
- 12. Never use your hands to search for oil leaks. Hydraulic fluid under pressure can penetrate the skin and cause serious injury.
- 13. This machine demands your attention. To prevent loss of control or tipping of the vehicle:
  - A. Use extra caution in backing up the vehicle. Ensure area is clear.
  - B. Do not stop or start suddenly on any slope.
  - C. Reduce speed on slopes and in sharp turns. Use caution when changing directions on slopes.
  - D. Stay alert for holes in the terrain and other hidden hazards.
- 14. Before leaving operator's position:
  - A. Disengage all drives.
  - B. Set park brake.
  - C. Shut engine off and remove the ignition key.
  - D. If engine has to run to perform any maintenance keep hands, feet, clothing and all other parts of body away from moving parts.
- 15. Keep hands, feet and clothing away from moving parts. Wait for all movement to stop before you clean, adjust or service the machine.
- 16. Keep the area of operation clear of all bystanders.
- 17. Never carry passengers.
- 18. Stop engine before making repairs/adjustments or checking/adding oil to the crankcase.
- 19. Use parts and materials supplied by **Smithco** only. Do not modify any function or part.
- 20. Use caution when booms are down as they extend out beyond the center line of the machine.
- 21. The tank is a confined space, take precaution.

These machines are intended for professional maintenance on golf courses, sports turf, and any other area maintained turf and related trails, paths and lots. No guaranty as to the suitability for any task is expressed or implied.

### **SPECIFICATIONS SPRAY STAR 1110**

#### **WEIGHTS AND DIMENSIONS**

Length 130" (3.30m) with Boom 117" (2.97m) without Boom

 Width
 71" (1.8m)

 Height With 18' Boom

15-835	Tank Rinsing System	1102	Radion 8140 Spray System
10-365	Water Meter Kit	1101	3-Way Manual System
10-740	Foam Marker	1105/1108	DynaJet/Radion Spray System
15-622	Canopy	1115/1118	Matrix 908 Spray System
10-422	Hose Reel Mount Kit		
16-129	Manual Rewind Hose Reel, 200-foot/61	-meter capacity	
16-906	Electric Rewind Hose Reel, 200-foot/61	-meter capacity	

### **MAINTENANCE**

Before servicing or making adjustments to machine, stop engine and remove key from ignition.

Use all procedures and parts prescribed by the manufacturer's. Read the engine manual before operation.

#### **LUBRICATION**

Use No. 2 General purpose lithium base grease and lubricate every 100 hours. The Spray Star 1110 has 7 lube points.

- A. One on the rod end of hydraulic cylinder.
- B. One on each the right and left spindles.
- C. One on the reverse pedal.
- D. One on each end of tie rod.
- E. One on the forward pedal.

#### **ELECTRICAL CONNECTIONS**

Use dielectric grease on all electrical connections.

#### **AIR CLEANER**

- 1. Loosen cover retaining snaps and remove cover.
- 2. Remove pre-cleaner from paper element.
- 3. Check paper element. Replace element as necessary.
- 4. Wash pre-cleaner in warm water with detergent. Rinse pre-cleaner thoroughly until all traces of detergent are eliminated. Squeeze out excess water (do not wring). Allow pre-cleaner to air dry.
- 5. Saturate pre-cleaner with new engine oil. Squeeze out all excess oil.
- 6. Reinstall pre-cleaner over paper element.
- 7. Reinstall air cleaner cover. Secure cover with cover retaining knob.

#### WHEEL MOUNTING PROCEDURE

- 1. Set park brake. Turn machine off and remove key.
- 2. Block wheel on opposite corner.
- 3. Loosen nuts slightly on wheel to be removed.
- 4. Jack up machine being careful not to damage underside of machine.
- 5. Place wheel on hub lining up bolt holes.
- 6. Torque to 64-74 ft/lb (87-100Nm) using a cross pattern. Re-torque after first 8 hours and every 250 hours thereafter.
- 7. Lower machine to ground and remove blocks and jack.

#### **TIRE PRESSURE**

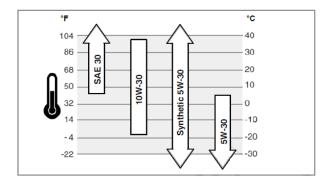

Caution must be used when inflating a low tire to recommended pressure. Over inflating can cause tires to explode. All tires should be 20 psi (1.4bar). Improper inflation will reduce tire life considerably.

#### **ENGINE OIL**

Change and add oil according to chart below. Do not overfill. Engine oil capacity is 2 quarts. We recommend high-quality detergent oils classified for service SF, SG, SH, SJ or higher. Do not use special additives. Out-door temperatures determine the proper oil viscosity for the engine. Use the chart to select the best viscosity for the outdoor temperature range expected

#### **SAE VISCOSITY GRADES**

Use of multi-viscosity oils (10W-30, etc.) above 80° F (27° C) will result in high oil consumption and possible engine damage. Check oil level more frequently if using these types of oils.

SAE 30 oil, if used below 40° F (4° C), will result in hard starting and possible engine bore damage due to inadequate lubrication.

#### **HYDRAULIC OIL**

- 1. Use SAE 10W-40 API Service SJ or higher motor oil.
- 2. For proper warranty, change oil every 500 hours or annually, which ever is first. Change the filter after the first 50 hours, then every 250 hours thereafter.
- 3. Oil level should be 2-21/2" (5-6.4cm) from top of the tank when fluid is cold. Do not overfill.
- 4. After changing oil, run the machine for a few minutes. Check oil level and for leaks.
- 5. Always use extreme caution when filling hydraulic oil tank or checking level to keep system free of contaminants. Check and service more frequently when operating in extremely cold, hot or dusty conditions.
- 6. If the natural color of the fluid has become black or smells burnt, it is possible that an overheating problem exists.
- 7. If fluid becomes milky, water contamination may be a problem.
- 8. If either of the above conditions happen, change oil immediately after fluid is cool and find the cause. Take fluid level readings when the system is cold.
- 9. In extreme temperatures you can use straight weight oil. We recommend SAE 30W API Service SG when hot (above 90°F (33°C)) and SAE 10W API Service SJ or higher when cold (below 32°F (0°C) ambient temperature. Use either motor oil or hydraulic oil, but do not mix.
- 10. Oil being added to the system must be the same as what is already in the tank. Mark the tank fill area as to which type you put in.

#### MAINTENANCE

#### **BATTERY**

Batteries normally produce explosive gases which can cause personal injury. Do not allow flames, sparks or any ignited object to come near the battery. When charging or working near battery, always shield your eyes and always provide proper ventilation.

Battery cable should be disconnected before using "Fast Charge".

Charge battery at 15 amps for 10 minutes or 7 amps for 30 minutes. Do not exceed the recommended charging rate. If electrolyte starts boiling over, decrease charging.

Always remove grounded (-) battery clamp first and replace it last. Avoid hazards by:

- 1. Filling batteries in well-ventilated areas.
- Wear eye protection and rubber gloves.
- 3. Avoid breathing fumes when electrolyte is added.
- Avoid spilling or dripping electrolyte.

Battery Electrolyte is an acidic solution and should be handled with care. If electrolyte is splashed on any part of your body, flush all contact areas immediately with liberal amounts of water. Get medical attention immediately.

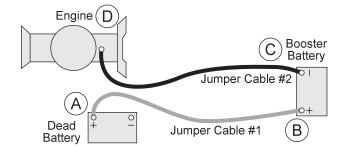

Use of booster battery and jumper cables. Particular care should be used when connecting a booster battery. Use proper polarity in order to prevent sparks.

#### TO JUMP START (NEGATIVE GROUNDED BATTERY):

- 1. Shield eyes.
- 2. Connect ends of one cable to positive (+) terminals of each battery, first (A) then (B).
- 3. Connect one end of other cable to negative (-) terminal of "good" battery (C).
- Connect other end of cable (D) to engine block on unit being started (NOT to negative (-) terminal of battery)

To prevent damage to other electrical components on unit being started, make certain that engine is at idle speed before disconnecting jumper cables.

### **STORAGE**

If the engine will be out of service for two or more months, use the following storage procedure.

- 1. Clean the exterior surfaces of the engine.
- 2. Change the oil and filter while the engine is still warm from operation.
- 3. The fuel system must be completely emptied, or the gasoline must be treated with a stabilizer to prevent deterioration.

If you choose to use a stabilizer, follow manufacturers recommendations, and add the correct amount for the capacity of fuel system. Fill fuel tank with clean, fresh gasoline. Run engine for 2-3 minutes to get stabilized fuel into carburetor. Close fuel shut-off valve when unit is being stored or transported.

To empty the system, drain fuel tank and carburetor, or run engine until tank and system are empty.

- 4. Remove the spark plugs. Add one tablespoon of engine oil into each spark plug hole. Install plugs, but do not connect the plug leads. Crank the engine two or three revolutions.
- 5. Store machine in a clean, dry place.

Before servicing or making adjustments to the machine, stop engine, set park break, block wheels and remove key from ignition.

Follow all procedures and ONLY use parts prescribed by the manufacturer. Read the engine manual before maintenance.

Maintenance Service Interval	Maintenance Procedure
After the first 8 operating hours	Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm))
	Change the engine oil filter.
Before each use daily	Check the engine oil level.
	Clean area around muffler and controls.
	Check the hydraulic fluid level.
	Check the tire pressure.
	Check condition of hydraulic hoses and fittings.
	Inspect and clean the machine.
After the first 50 hours	Change Hydraulic Oil Filter.
Every 100 hours	Clean or change air filter.1
	Clean pre-cleaner.1
	Change engine oil and filter.
	Replace spark plug .
	Lubricate machine.
	Clean or change remote air cleaner.
	Check the battery fluid level and cable connections
	Check muffler and spark arrestor.
	Check belt tension.
Every 250 hours	Check engine valve clearance and adjust if necessary.
	Check idle speed.
	Clean battery terminals.
	Change hydraulic oil filter.
	Torque the wheel lug nuts. (64-74 ft/lb (87-100 Nm))
Every 500 hours or yearly	Change fuel filter.
	Change hydraulic oil and filter.
	Clean oil cooler fins.1
	Clean air cooling system.1
	Check safety filter in remote air cleaner.
1 In dusty conditions or when airbo	orne debris is present, clean more often.

## **END USER'S SERVICE CHART**

### Duplicate this page for routine use

Maintenance Check Item	For the week of:						
	Mon	Tues.	Wed.	Thurs.	Fri.	Sat.	Sun.
Check the Safety Seat Switch							
Check Steering Operation							
Check the fuel level							
Check the engine oil level.							
Clean the air filter							
Clean the engine cooling fins.							
Check for unusual engine noises							
Check the hydraulic oil level							
Check hydraulic hoses and fittings for							
damage							
Check for fluid leaks.							
Check the tire pressure							
Check the Instrumentation							
Inspect electrical system for frayed wires							
Check park brake adjustment							
Change oil filter.							
Change oil.							
Lubricate Machine							
Ensure all warning decals are intact.							
Areas of Concern							
Inspection Performed by:							
Item	Date		Informa	ation			

#### WHEEL CREEP

"Creep" is when the engine is running and hydrostatic transmission is in neutral, but due to inadequate alignment, wheels still move. Do the following procedure to stop this motion.

- 1. Lift up and support machine so rear wheels are off the ground and can turn freely.
- 2. On top of the pump there is a Creep arm. Loosen bolt (Ref A) on creep arm.
- 3. With engine running, adjust the 'creep arm' side to side so centering arm centers on the swash plate.
- 4. Tighten all fasteners and test by using foot pedal linkage to see that 'creep' is removed.
- 5. Turn engine off and lower machine.

#### **PARK BRAKE**

Park brake (Ref B) is located on the right side of seat. Turn knob clockwise on end of park brake to tighten. Turn it counter clockwise to loosen. If finer adjustment is needed turn clevis on brake cable to adjust length of cable.

#### **MASTER BOOM SWITCH (FOOT SWITCH)**

The master boom switch (Ref C), located on the left floorboard is used to override the master switch on the computer console of the Radion 8140 spray system. By pushing down it will turn on/off the booms.

#### **SPRAY BOSS CONTROL HANDLE**

The spray boss control lever (Ref D), located on the left side of the seat, engages and disengages the speed boss. Forward is engage and all the way back is disengage. When the lever is engaged it sets a stop for the accelerator. The accelerator pedal must be used to maintain this speed. To adjust speed use the knob on the end of the lever, counter clockwise increases speed and clockwise decreases speed. Disengage the lever and you will have full accelerator pedal range.

#### **CHOKE**

The choke(Ref E) is used in starting the engine. Pull choke out to close choke plate when starting a cold engine. Push in when engine starts. A warm engine may not require "choking" to start.

#### **SPRAY PUMP**

The spray pump is located to the rear and right of the engine. The belt should have approximately ½" (13mm) of deflection in the center of the top strand. Loosen two bolts holding the pump in place. Slide pump to the desired tension. Tighten the bolts.

Use dielectric grease on all electrical connections.

#### **15-301 ORBITAL SPECIFICATIONS**

Inlet Relief Valve Setting 1020 psi (70 bar)

Nominal Flow 3 gpm (11 lpm)

Displacement 4.50 cu. in/ R (73.8 cu cm/R)

Check Valve for Manual Steering Yes

Inlet Pressure Rating 2030 psi (140 bar)

Return Pressure Rating 145 psi (10 bar) Maximum

Fluid SAE 10W-40 API Service SJ or higher Motor Oil

Ports 9/16 - 18 SAE O-Ring 4 Ports

Α	20-807-02	Spare Parts Kit	

Quantity is per nozzle body. For 20' booms multiply quantity by 23.

Quantity is per nozzle body. For 18' booms multiply quantity by 21.

Quantity is per nozzle body. For 15' booms multiply quantity by 17.

Nozzles are located 10" (25 cm) apart on the right, left, and center tubes.

Nozzles are 20" high off ground.

#### 15-835 TANK RINSING DEVICE

REF#	PART#	DESCRIPTION	QUANTITY
1	16-961	1" Adapter	1
2	16-962	1" Coupler	1
3	16-864	1" FTP Elbow	1
4	16-158	Close Nipple	1
5	16-150	Double Thread Fitting	1
6	16-172	4" Nipple	1
7	15-834	Tank Rinsing Nozzle	1
8	16-163	Reducer Bushing	1

Drill 13/4" hole 5" from outside edge of cover.

Install Tank Rinsing kit as shown, with the Double Thread Fitting (Ref 5) going into the cover.

#### Basket Must be removed During Use.

REF# **DESCRIPTION QUANTITY** PART# 1 14-524 Filler Outlet 2 14-804 Water Meter 3 10-364 Filler Inlet 1 4 16-962 Quick Coupler (already on machine) 1 5 16-961 Quick Coupler (already on machine) 1 6 16-851 1" Nipple (already on machine) 1 7 18-448 1" Ball Valve (already on machine) 1

- 1. Thoroughly flush the service line upstream of the meter to remove dirt and debris.
- 2. Set meter in-line.
- 3. Make sure the water flow follows the arrow cast on the meter body.
- 4. The DLJ Meter is for use **only** with **COLD WATER** up to 122°F (50°C)
- 5. Slowly open any upstream valves to prevent damage to the meter.

#### **Gallons to Cubic feet Conversion:**

Multiply gallons reading by 0.1337 to get cubic feet.

There are 7.48052 gallon per cubic foot.

	HNTL-38-16	Lock Nut, <sup>3</sup> / <sub>8</sub> - 16	4

- 1. Wear protective clothing when draining the tank and taking apart the lines.
- 2. Drain tank and spray system in a safe and approved method insuring that no chemical or water remain in tank as you will be taking apart lines.
- 3. Remove key from ignition, set park brake and block wheels.
- 4. Install hose reel mount on the left side of the machine in front of the rear wheel. Mount arms pointing to the rear of the machine.
- 5. Use the four(4)  $^{3}/_{8}$  Hex Bolts and Lock Nuts to secure the mount to the machine.
- 6. Put hose reel on hose reel bracket with fitting to the rear of machine. Use four bolts 5/16 18 x 11/2 and four <sup>5</sup>/<sub>16</sub> - 18 lock nuts to hold in place. Tighten bolts.
- 7. Put 18-249 barb fitting into side of hose reel. Place 16-295 Fitting into center of hose reel. Run 55" hose from the 18-249 to the 15-749 hose barb.

#### 1102 & 1104 HOSE REEL PLUMBING DRAWING

### STAR COMMAND I & II HOSE REEL PLUMBING DRAWING

#### 1101 MANUAL HOSE REEL PLUMBING DRAWING

REF#	PART#	DESCRIPTION	QUANTITY
1	15-776	Tee	1
2	15-740	50 Series Clamp	3
3	15-738	Ball Valve	1
4	15-749	Hose Barb	1

#### **INSTALLATION INSTRUCTIONS**

- 1. Disconnect the ball valve from the bottom of the filter assembly. Install tee fitting (15-776) between the ball valve and the elbow. Use the clamp that was removed and one of the new ones provided. Only tighten clamps enough so it can be rotated.
- 2. Install hose barb (15-749) onto the ball valve (15-738) using a 50 series clamp (15-740) Tighten clamp. Install the ball valve/hose barb to the tee (15-776) that was installed in step 1 using a 50 series clamp (15-740).
- 3. Rotate the tee fitting so the valve points toward the outside of the machine. Tighten all clamps.
- 4. Route the 3/4" Black hose from the hose barb you installed in step 2 to the hose barb on the hose reel. Secure with 18-040 Hose clamps.
- 5. When installing the hose reel with a manual spray system you will have parts left over that you will not need.

#### **ELECTRIC HOSE REEL WIRING DIAGRAM**

REF#	PART#	DESCRIPTION	QUANTITY
	8843-132	Flex guard <sup>3</sup> / <sub>8</sub> ID	1
1	8919-144	10GA Red Wire 144"	1
	8901	Slide-On Connector	1
2	16-979	Wire, Switch to Solenoid Hot Terminal	1
3	33-251	Push Button Switch	1
4	16-978	Wire, Switch to Solenoid Start Terminal	1
6	12-015	Solenoid	1
	SOLENOID TER	MINALS	
	HN -516-24	<sup>5</sup> / <sub>16</sub> - 24 Hex Nut	2
	HN -10-32	10 - 32 Hex Nut	1
7	8931-144	10GA White Wire 144"	1
	8901	Slide-On Connector	1
8	33-273	Auto Blade Type Fuse 30Amp	1

#### **CONNECTION INSTRUCTIONS**

Route wire harness along side of tank and over to fuse block taking care to stay clear of moving parts or hot engine components. Cut off excess wire and strip back  $^3/_8$ ". Place one 8963 heat shrink ( $^1/_4$  x  $^1/_4$ ) on each wire before crimping 8901 slide on connectors to the red and white wires. Connect the two wires to the fuse block first the red to the (+) positive and the white to the (-) negative. Put the 33-273 auto blade type fuse (30 amp) into fuse block.

Make certain you are connecting positive (+) to positive; negative (-) to negative while attaching power leads. If you do not observe polarity, damage will result to electrical components.

#### **HOSE REEL ADJUSTMENTS**

#### **OPERATIONAL CHECK:**

- 1. Pull hose off drum at least one full revolution. A clicking noise should be heard from locking mechanism.
- 2. Let the hose retract.
- 3. Pull the hose off until the first click is heard. Drum should lock when the hose tension is removed.
- 4. Continue pulling the hose, no more than one revolution, until no clicking is heard. Hose should rewind when tension is removed.

#### **HOSE REPLACEMENT PROCEDURE:**

- 1. Facing swivel, turn the hose drum clockwise until all of the hose is removed from the drum and the drum is held by locking mechanism. Make sure spring is locked.
- 2. Remove hose clamps and disconnect hose from swivel. Remove old hose.
- 3. Insert new hose through roller guide, connect to swivel and reinstall hose clamps. Use spring guard over hose to protect the hose from being cut by the drum.
- 4. Remove check ball from old hose and install on replacement hose.
- 5. Carefully, keeping the tension on the hose, pull the hose to release the locking mechanism. Let the hose wind on the drum.

Use Dielectric Grease On All Electrical Connections

#### **10-740 FOAM MARKER CONTROL PANEL**

	11/2 1	/ 4/	
REF#	PART#	DESCRIPTION	QUANTITY
1	10-739	Switch Mount Plate	1
	15-725	Panel Mount End	2
2	15-782	Switch, Unlit	1
	15-727	Rocker, No Light	1
3	15-918	Switch, 2 Red LED	1
	15-917	Rocker, 2 Red Lenses	1
4	30-374	Decal, Foamer	1

Safety: Before working on machine stop engine, set park brake, remove key from ignition and block wheels. Disconnect negative (-) battery terminal

- 1. Place decal(Ref 4) on Switch mount plate. Place panel mount ends in mount plate.
- 2. Mount switches (Ref 2 & 3) to switch mount plate (Ref 1)as shown above. Mount the switch mount plate(Ref 1) on the side control panel using existing bolts.

#### Tank Mount Drawing

- 3. Position the right and left hand mount brackets(Ref 2 and 4) on the boom tubes facing the front of the machine, using two <sup>5</sup>/<sub>16</sub> x 3 bolts. Install the foamer plate (Ref 5) on the right and left bracket with curve towards poly spray tank.
- 4. Place the piece of trim (Ref 13) on the foamer bracket to prevent rubbing of hoses for a cleanload system.
- 5. Place foamer unit onto mount plate, with cap facing to the right side of machine. Using ¼ bolts and flange nuts, bolt foam marker to mount plate. The left rear mount of the foamer will bolt through the mount plate and brace. Tighten all hardware.
- 6. Make sure all bolts are tightened.

6	15-504-04	Foam Marker Wiring Harness	1
7	32-574	Foamer Wire Harness	1
8	15-918	Switch, 2 Red LED	1
	15-917	Rocker, 2 Red Lenses	1
9	30-374	Decal, Foamer	1
10	10-739	Switch Mount Plate	1
11	15-782	Switch, Unlit	1
	15-727	Rocker, No Light	1

#### **INSTALLATION**

- 1. Connect the compressor wire harness (Ref 6) to the switches using the wire harness (Ref 7).
- 2. Use dielectric grease on all electrical connections. Route the wire harness to the battery and out of the way of any heat or moving parts. Use nylon ties as needed. Connect the wire harness to the battery. Red to positive(+), black to negative(-).

#### **HOSES**

Being careful not to cut the tubing, cut the over-sleeve back approximately 2" (5 cm) to expose blue and clear tubing. Remove blue wing nut from top connector of foam nozzle and slide it on the blue tube with the threads facing toward end of tube. Slide blue tube all the way over the top of the small tube on foam nozzle. Slide wing nut back to the threads and hand tighten. Follow the same steps for the clear tube and tube nut.

Route the tubing along underside of main frame using tie downs as necessary.

Install opposite ends of air-liquid tubes to compressor, again cutting back the oversleeve approximately 2" (5 cm) and inserting blue and clear tubes for the left boom section into the tubing connectors on the right side of compressor as far as possible. Follow the same steps for the right boom tubing. Notice the right boom is inserted into left side of compressor. To release tubing from compressor, hold black ring around tubing, and pull tube out.

### **FOAMER NOZZLE MOUNT DRAWING**

#### **10-378 FOAM MARKER PARTS LIST**

REF#	PART#	DESCRIPTION	QUANTITY
2	16-987	Foam Nozzle Mounting Kit	1 per boom
3	15-507	Foamer Tubing	1
4		Clear Tubing	
5	15-511	Foam Nozzle	2
6		Blue Tubing	
7	15-510-01	Nozzle Mounting Rod	2
8		Boom	
9	16-795	Square Clamp	4

- 1. Slide hose clamp onto drop tube of foam nozzle and attach restrictor bell.
- 2. Place splined end of Nozzle mounting rod (Ref 7) into top of foam nozzle (Ref 5). Tighten screw.
- 3. Slide two foam nozzle mounts (Ref 2) onto the rod. Place square clamps (Ref 9) on foam nozzle mounts and mount the square clamps to the boom (Ref 8). Adjust foam nozzle mounts and clamps so nozzle assembly will clear end of boom. Tighten foam nozzle mounts and square clamps to prevent side to side movement. Do the same to the other side.
- 4. Being careful not to cut the tubing (Ref 3), cut the over-sleeve back approximately 2" (5 cm) to expose blue (Ref 6) and clear tubing (Ref 4).
- 5. Remove blue wing nut from top connector of foam nozzle and slide it on the blue tube with the threads facing toward end of tube. Slide blue tube all the way over the top of the small tube on foam nozzle. Slide wing nut back to the threads and hand tighten. Follow the same steps for the clear tube and tube nut.
- 6. Route the tubing along underside of main frame using tie downs as necessary.
- 7. Install opposite ends of air-liquid tubes to compressor, again cutting back the over-sleeve approximately 2" (5 cm) and inserting blue and clear tubes for the left boom section into the tubing connectors on the right side of compressor as far as possible.
- 8. Follow the same steps for the right boom tubing. Notice the right boom is inserted into left side of compressor. To release tubing from compressor, hold black ring around tubing, and pull tube out.
- 9. Hose's must be routed along the side of the boom square tubing.
- 10. Mark 6 inches in from inside edge of foamer nozzle mounting bracket on square boom tubing.
- 11. Cut cable and strip casing, allowing enough length to connect to fuse block.
- 12. Strip and connect slide on connectors to each wire and use the heat shrink.
- 13. Connect black negative (-) wire to the ground and connect red wire to the positive (+).
- 14. Insert 10 amp fuse into slot which red wire was attached to.

#### **30-006 FRESH WATER WASH TANK - REAR MOUNT**

REF#	PART#	DESCRIPTION	QUANTITY
1	10-234	Wash Tank	1
2	16-158	Close Nipple	1
3	16-151	Elbow	1
4	16-960	Spigot	1
5	HB-516-18-075	Hex Bolt, <sup>5</sup> / <sub>16</sub> - 18 x <sup>3</sup> / <sub>4</sub>	4
	HWL-516	Lockwasher, 5/16	4
	HW-516	Flat Washer, <sup>5</sup> / <sub>16</sub>	4

- 1. Fresh Water Wash Tank mounts on the rear of all the machines.
  - 2. The Bracket is already attached to the Super Boom center boom post.
  - 3. Install the nipple (Ref 2), elbow (Ref 3) and spigot (Ref 4) into the bottom of wash tank (Ref 1). Use thread tape on all threads.
  - 4. Mount the tank onto the mount bracket using four 5/16 x 3/4 bolts, washers and lockwashers. Tighten.
  - 5. Rinse tank with clear water and check for leaks around fittings.

**⚠ WARNING** 

This tank is for fresh clear water ONLY. Do not put chemicals in this tank.

## 10-734 16 GALLON RINSE TANK

REF#	PART#	DESCRIPTION	QUANTITY
1	HB-516-18-075	Hex Bolt, 5/16 -18 x 3/4	2
	HW-516	Flat Washer, 5/16	2
	HNFL-516-18	Flange Whiz-loc Nut, 5/16 - 18	2
2	10-738	Mounting Bracket	2
3	HSTP-516-18-100	Truss HEad Screw, 5/16 -18 x 1	2
	HNFL-516-18	Flange Whiz-loc Nut, 5/16 - 18	2
4	HB-516-18-075	Hex Bolt, 5/16 -18 x 3/4	2
	HNFL-516-18	Flange Whiz-loc Nut, 5/16 - 18	2
5	10-737	Rinse Tank Mount	1
6	HB-516-18-200	Hex Bolt, <sup>5</sup> / <sub>16</sub> -18 x 2	1
	HNTL-516-18	Lock Nut, <sup>5</sup> / <sub>16</sub> - 18	1

You will have to drill 2 holes in the Floorboard of your Sprayer.

- 2. Mount the two mounting brackets (Ref 2) on the rinse tank mount(Ref 5) using <sup>3</sup>/<sub>4</sub>" bolts and flange whiz-loc nuts (Ref 2).
- 1. Center the rinse tank mount on the front bumper and mark one <sup>5</sup>/<sub>16</sub> hole on the front tubing and 2 on the rear of the floorboard where the mounting bracket lines up
- 3. Drill through the front tubing.
- 4. Place the 2" bolt (Ref 6) and fasten with a lock nut.
- 5. Drill the two holes in the floorboard. Using the 2 truss head screws and flange whiz-loc nuts(Ref3) secure the back of the rinse tank mount to the bottom of the floorboard.
- 6. Use the slots in the mounting brackets to adjust and tighten mount to main frame. Tighten all bolts.
- 7. Mount the 16 gallon tank on the rinse tank mount (Ref 5) using the 5/16 hardware.
- 8. Make sure bolts are all tightened.

## 10-734 16 GALLON RINSE TANK

- 9. With wire cutter. Remove the alligator clamps from the ends of the pump wiring.
- 10. Strip about 1" on both ends of the black and red wires. Figure 1.
- 11. Slide on heat shrink and connectors. Figure 2.
- 12. Connect the 12' red wire to the red wire on the electric pump using the connector. Crimp the wires together. Flgure 3 & 4.
- 13. Slide heat shrink over the connector. Figure 5.
- 14. Heat in place with just enough heat to melt shrink over connection. Do not over heat. Figure 6.
- 15. On the opposite end of the 12' black and red wire place a heat shrink and the slide on connector. Crimp the connector into place and place the heat shrink over the end of the wire. Heat the shrink into place. Figure 7.
- 16. Run the wire below the floorboard to the fuse box. Plug slide on connectors into fuse block.
- 17. Follow the instructions in the Spray Tanks Owner Manual for proper operation.

REF#	PART#	DESCRIPTION	QUANTITY
1	30-246	Tank Rinsing Nozzle	1
2	30-247	8" Nipple	1
3	33-495	Bulk Head Fitting	1
4	16-937	Elbow	1
5	18-186	Clamp	1

The rinsing system can be placed on any flat surface on the top of the spray tank as long as the hose from the 16 gallon spray tank will reach the elbow in the bulkhead. 1-5/8 " hole saw will be needed.

# 10-417 CHEMICAL CLEAN-LOAD ®

# TROUBLE SHOOTING

Symptom	Corrective Action
Low eduction rate	Check pump pressure and flow. Cleanload Eductor performance is based on flow and pressure to the system. Note requirements for high eduction rates.
	Increase outlet hose size back to tank.
Plugged or clogged bottle rinse nozzle	Disassemble rotary portion of nozzle from lower valve assembly and back flush until nozzle ports are clear of debris.
Plugged or clogged tank rinse nozzle	Disassemble rotary portion of nozzle from NPT hose barb and back flush until nozzle ports are clear of debris. Remove screen and flush with water to clear away foreign material.
Fitting leaks	Check for cracks in fitting. Replace fitting if necessary.
	Disassemble and add more joint seal in compound if leak occurs on threads.

### **10-417 CHEMICAL CLEAN-LOAD® PART LIST**

REF#	PART#	DESCRIPTION	QUANTITY
1	16-159	Tank Fitting	1
2	15-620	Cleanload Eductor	1
3	8897-41	Hose to fitting on Back of Tank	1
4	18-116	Hose Clamps	4
5	18-161	Fitting	1
6	18-391	Reducer Coupling	1
7	16-972	Elbow	1
8	16-156	90° Hose Barb	2
9	8897-83	Hose to Tee by Valve	1
10	HBFL-516-18-075	Flange Bolt 5/16 -18 x 3/4	4
	HNFL-516-18	Flange Lock Nut 5/16 -18	4
11	17-635	Mount Bracket SOLD SEPERATELY	1

## **INSTALLATION INSTRUCTIONS**

- 1. Make sure all chemicals have been flushed out of spray system, as you will be disconnecting fittings from the pump. Remember to use threaded tape on all new fitting connections.
- 2. Remove the 1<sup>1</sup>/<sub>4</sub>" plug from the tee on the outlet side of the pump and install one hose barb (16-156). Then tighten so it points to the left side of the machine.
- 3. Install mounting brackets onto left side of center boom between boom pivot and vertical boom support. Secure with  $^{3}/_{8}$  x 3 bolt, flatwasher (top and bottom) and lock nut.
- 4. Bolt cleanload assembly onto mounting bracket using four flange bolts <sup>5</sup>/<sub>16</sub>-18-x <sup>3</sup>/<sub>4</sub> and flange nuts. Install 90° fitting (16-972) into inlet side of Cleanload (valve with yellow handle). Install 90° hose barb (16-156) into the 16-972 then tighten.
- 5. Install one reducer coupling (18-391) and one straight Barb (16-161) onto the outlet side of Cleanload. Tighten.
- 6. Remove plug from top rear center of spray tank and discard. <u>Install one hose barb (16-159)</u> into tank fitting and tighten.
- 7. Route 80" hose from the 90° hose barb on spray pump to the inlet side of the Cleanload and secure with hose clamps (18-116).
- 8. Route 41" hose form 90° hose barb on outlet side on Cleanload to the hose barb on the top rear of the tank.
- 9. Make sure all hardware, fittings, and clamps are tight. Add about 25 gallons of water to the spray tank. **CLOSE** tank lid. Start Sprayer and circulate water through system and check for leaks.
- 10. Be sure to read start up and shutdown instructions for Cleanload assembly before using it with chemicals. When working with chemicals always wear protective clothing, goggles and gloves.

SPRAY TANK LID MUST BE CLOSED WHEN USING CLEANLOAD.

### 10-417 CHEMICAL CLEAN-LOAD® OPERATING INSTRUCTIONS

### **START-UP**

- 1. All Clean-load valves must be closed prior to starting: inlet ball valve, knife valve and hopper rinse ball valve.
- 2. Open lid to check for foreign objects which may hinder performance or contaminate the system.
- 3. Close and lock lid by turning cover clockwise.
- 4. Divert pump flow to Clean-load inlet line. A pressure of 30 PSI minimum and 150 PSI maximum must be used. Highest pressures increase eduction rate and available wand suction.
- 5. Turn inlet ball valve on (yellow handle).
- 6. Open knife valve, located on the bottom of hopper, by pushing handle in (red handle).
- 7. Unlock and open lid slowly by turning cover counterclockwise.

### **LOADING LIQUID OR POWDERED CHEMICAL INTO HOPPER**

- 8. Pour required amount of chemical into hopper. Avoid splashing liquids or powdered chemicals outside of hopper.
- 9. Rinse empty chemical containers if applicable. Place container opening over container rinse valve and press down. This will activate the rinse valve and rinse container.
- 10. Rinse Clean-load hopper. Close and lock lid by turning cover clockwise. Release the safety locking band on the hopper rinse ball valve and turn on for 20 seconds. Close ball valve and return locking band to locked position.
- 11. Open lid and inspect for chemical residue. Repeat step 10 as necessary.
- 12. Close knife valve by pulling red handle out towards you. Turn inlet (yellow handle) off.

#### LOADING LIQUID AND/OR POWDERED CHEMICAL WITH SUCTION LANCE

Note: Lance suction is dependent upon eductor pressure and flow. For best results, use highest pressure available up to 150 PSI maximum.

- 8. Insert lance body with o-ring into eductor until the o-ring is sealed.
- 9. Use the free end of the lance to pierce bag or container to vacuum powdered or liquid chemical.
- 10. Rinse lance. Place lance end into a clean container of water to rinse lance assembly.
- 11. Remove lance body from eductor and drain any remaining fluid into hopper.
- 12. Close knife valve (red handle). Turn inlet valve (yellow handle) off.

### SHUTDOWN

- 1. Ensure that:
  - · All valves are closed. Be sure to close knife valve first. (Close by pulling red handle out towards you.)
  - · Chemical residue has been cleaned.
  - Hopper lid is closed and locked by turning cover clockwise.
- Divert pump flow back to normal operation.

## **DECAL LIST**

### The Smithco Commercial Products Two-Year Limited Warranty

Smithco, Inc. (Smithco) warrants your 2016 or newer Smithco Commercial Product ("Product") purchased after October 1, 2016 to be free from defects in materials or workmanship for the period of time listed below. Where a warrantable condition exists, Smithco will repair the Product at no cost to you including diagnosis, labor (at the Smithco standard labor rate, subject to the Smithco flat rate schedule), and parts.

#### **Warranty Duration is:**

- (1) Two years, 1500 operational hours\* from the date of delivery to the original purchaser or Five years from the date of original manufacturer of the product, whichever occurs first. (\*Products equipped with hour meter).
- (2) Products used in rental situations are covered for 90 days from date of delivery to original user/renter.

#### Owner Responsibilities:

As the Product owner, you are responsible for required maintenance and adjustments stated in your Owner's Manual. Failure to perform required maintenance and adjustments can be grounds for disallowing a warranty claim. You are particularly responsible to train all present and future operators of this product on the safe operation of this product at your location.

#### **Instructions for Obtaining Warranty Service:**

You are responsible for notifying the Authorized Smithco Products Distributor from whom you purchased the Product as soon as you believe a warrantable condition exists and not later than 30 days from discovery of the condition.

If you need help locating an Authorized Smithco Distributor, or if you have questions regarding your warranty rights or responsibilities, you may contact us at:

Smithco Product Support Department 200 West Poplar Ave. Cameron, Wisconsin 54822

Telephone: 800-891-9435 E-Mail: ProductSupport@Smithco.com

#### **Maintenance Parts:**

Parts scheduled for replacement as required maintenance ("Maintenance Parts"), are warranted for the period of time up to the scheduled replacement time for that part.

#### **Items/Conditions Not Covered:**

Not all product failures or malfunctions that occur during the warranty period are defects in materials or workmanship. The items/conditions listed below are not covered by this warranty:

Product failures which result from the use of non-Smithco replacement parts, or from installation and use of addon, modified, or unapproved accessories are not covered.

Product failures which result from failure to perform required maintenance and/or adjustments are not covered.

Product failures that result from operating the Product in an abusive, negligent or reckless manner are noT covered.

This warranty does not apply to parts subject to consumption through use, unless found to be defective. Examples of parts which are consumed, or used up, during normal Product operation include, but are not limited to: blades, tines, teeth, scarifiers, rakes, plates, wear plates, castor wheels, tires, batteries, filters, belts, nozzles, etc.

This warranty does not apply to failures caused by outside influence. Items considered to be outside influence include, but are not limited to, weather, storage practices, contamination, use of unapproved coolants, lubricants, additives, or chemicals, etc.

This warranty does not apply to normal "wear and tear" items. Normal "Wear and Tear" includes, but is not limited to, damage to seats due to wear or abrasion, worn painted surfaces, scratched decals or windows, etc.

Smithco may require the return of failed parts or components in order to determine the validity of any warranty claim.

Smithco will not be obligated to replace components of other manufacturers if inspection by the original component manufacturer indicates that failure was due to normal wear and tear, expected consumption through use or improper care or service.

### Other Legal Disclaimers:

The above remedy for product defects through repair or replacement by an authorized Smithco distributor or dealer is the purchaser's sole remedy for any defect. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

THERE ARE NO OTHER EXPRESS WARRANTIES OTHER THAN THOSE SET FORTH ABOVE. ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR USE ARE LIMITED TO THE DURATION OF THE LIMITED WARRANTIES CONTAINED HEREIN.

Some states may not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

THE SMITHCO COMPANY IS NOT LIABLE FOR INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH THE USE OF THE PRODUCT, INCLUDING ANY COST OR EXPENSE OF PROVIDING A SUBSTITUTE PRODUCT OR SERVICE DURING PERIODS OF MALFUNCTION OR NON-USE.

Some states may not allow the exclusion of indirect, incidental or consequential damages, so the above exclusion may not apply to you.

Smithco neither assumes, nor authorizes any person to assume for it, any other liability in connection with the sale or use of this product.
